## Commenting on the Entitlement Offer, Triton Managing Director, Peter Canterbury said:

*“2017 has been a transformational year for Triton with significant milestones being reached. We are very focussed on continuing to rapid commercialisation of Ancuabe targeting production in the second half of 2019. Funds raised in the Entitlement Offer will enable Triton to continue to accelerate the Ancuabe Graphite Project to a development decision, supporting a range of project activities across product test-work, offtake negotiations, approvals, and early engineering works. The definitive feasibility study remains on track for completion in December 2017.*

*The Company has received strong expressions of interest in relation to product offtake, financing and development of the Ancuabe Graphite Project, as demonstrated by the conditional, non-binding, agreements with SINOMA, Tianshengda and Haida (refer to respective ASX announcements). In determining the structure and nature of the financing required at this time, Triton considered a number of factors, and concluded that offering eligible shareholders the opportunity to participate in the future growth of the Company through the Entitlement Offer was in the best interests of shareholders.*

*Triton welcomes the strong support shown by the Underwriter and existing shareholders for the underwritten Entitlement Offer, which we believe is reflective of continuing strong demand for graphite, rising graphite prices, industry growth in expandable graphite and lithium-ion batteries, and Triton’s high quality portfolio of near-term development assets.”*
