

ASX RELEASE**Kleos signs MoU with ImageSat International, a global leader in geospatial intelligence**

- **ImageSat International N.V. (iSi) is an Israeli based global leader in end-to-end geospatial intelligence solutions for defence and intelligence customers.**
- **Under the MoU, the companies will develop a value-add proposition for current and future iSi maritime customers.**

Luxembourg, 27th March 2019: Kleos Space S.A (ASX: KSS, Frankfurt: KS1), space-powered Radio Frequency Reconnaissance data provider, has signed a collaborative, non-binding, Memorandum of Understanding with leading Israeli based end-to-end geospatial intelligence company ImageSat International N.V. (iSi) to explore opportunities to use Kleos' maritime RF activity-based satellite data to enhance geospatial intelligence analytics.

Under the MoU, the companies will develop a value-add proposition for current and future iSi maritime customers using Kleos' geolocation data. The MoU also covers the development of a methodology to reduce collection to dissemination latency.

iSi has more than 20 years' experience in end-to-end space, intelligence and analytical solutions for defence and intelligence customers. Israel-based, the company's areas of expertise include integrated ISR solutions, Very High-Resolution satellite services, GEOINT and data analysis. Its innovative ground-segment is designed to manage high-revisit satellite constellations.

Kleos is on track to launch its initial Scouting Mission satellites on a Rocket Lab Electron rocket from New Zealand by the end of the second quarter of 2019. The multi-satellite Scouting Mission system will form the cornerstone of a constellation that delivers a global picture of hidden maritime activity, enhancing the intelligence capability of government and commercial entities when AIS (Automatic Identification System) is defeated, imagery unclear and targets out of patrol range.

Andy Bowyer, CEO of Kleos Space said: "iSi is a global leader in satellite imagery and analysis. This collaboration is a good example of the value of Kleos' activity-based maritime reconnaissance information as an extra data-set for end-customers in the defence and intelligence sectors. The launch of our Scouting Mission satellites will enable Kleos to commence generating revenue by delivering this commercially available data-as-a-service through collaboration with strategic global partners within the defence and intelligence sectors."

About Kleos Space S.A.

Kleos Space S.A. (ASX: KSS, Frankfurt: KS1) is a space enabled, activity-based intelligence, data as a service company based in Luxembourg. Kleos Space aims to guard borders, protect assets and save lives by delivering global activity-based intelligence and geolocation as a service. The first Kleos Space satellite system, known as Kleos Scouting Mission (KSM), will deliver commercially available data and perform as a technology demonstration. KSM will be the keystone for a later global high capacity constellation. The Scouting Mission will deliver targeted daily services with the full constellation delivering near-real-time global observation. For more information please visit: www.kleos.space.
