WINCHESTER MAGNESIUM CARBONATE PROJECT UPDATE – NOTICE OF INTENT

Korab Resources Ltd (“Korab”, or “Company”) (ASX: KOR) and its subsidiaries (“Korab Group”) refer to the ASX announcement dated 22 March 2019 titled: “WINCHESTER MAGNESIUM CARBONATE PROJECT UPDATE” and a reference therein (among others) to the lodgment of the notice of intent to mine (NoI) likely taking place in April 2019 rather than March 2019 following the completion of the review by the parties advising Korab Group.

Following shareholder query, Korab Group is pleased to advise that there is no change to the envisaged timing of the lodgment of the NoI.

The report released yesterday afternoon (28 March 2019) was only referring to the reporting of the results of the assessment of the potential economic impact of the sales of the low grade material (as a new product stream) which are still being verified with outside advisors. We anticipate that this process will be completed over the next few days with the results expected to be released to the market early next week.

ABOUT WINCHESTER

The proposed magnesium carbonate quarry at Winchester is located 2 km from the regional centre of Batchelor some 70km south of Darwin along Stuart Highway. Please refer to Figure 1 for details of the location of the proposed Winchester magnesium carbonate quarry, and Korab Group’s various mineral tenements in the area. Deposit is at shallow depth and is covered by a thin layer (few meters) of unconsolidated clay and gravel (see Figure 2). Winchester magnesium carbonate rock can be quarried using drill and blast, shovel, and truck method.

DISCLAIMER AND CAUTIONARY STATEMENT

Forward-looking statements are statements that are not historical facts. Words such as "expect(s)", "expected", "feel(s)", "believe(s)", "will", "may", "anticipate(s)", "should", "envisage(s)" and similar expressions are intended to identify such forward-looking information. This information includes, but is not limited to statements regarding future exploration results, resources, or reserves, and production. Anyone reading this report is cautioned not to place undue reliance on these forward-looking statements. All of such statements are subject to risks and uncertainties (many of which are difficult to predict and which generally are beyond the control of the Company) that could cause actual results to differ materially from those expressed in, or implied or projected by, the forward-looking information and statements. These risks and uncertainties include, but are not limited to: those relating to the interpretation of exploration results (including drill results), the geology, grade and continuity of mineral deposits and conclusions of economic evaluations; risks relating to possible variations in reserves, grade, mining dilution, ore loss, and recovery rates; risks relating to changes in project financial and technical parameters; risks relating to the potential for delays in exploration programs, project evaluation/review, completion of feasibility studies and project development; risks related to commodity prices and foreign exchange rate fluctuations; risks related to failure to secure adequate financing on a timely basis and on acceptable terms; risks related to delays in obtaining governmental, or other permits and approvals; risks related to security of tenure; and other risks and uncertainties related to the Company's prospects, properties and business strategy. Any forward-looking information contained in this report is provided as of the date of this report. Except as required under applicable listing rules and securities laws, the Company does not intend, and does not assume any obligation, to update this forward-looking information.
