Appendix 4D
Half Year ended 30 September 2019

Results for announcement to the market for the half year ended 30 September 2019

	30 September 2019	30 September 2018	% change	Up / down
Revenue from ordinary activities (\$M)	1,020.7	995.8	2.5%	Up
Net profit from ordinary activities after tax attributable to shareholders (\$M)	171.8	181.5	5.3%	Down
Net profit for the period attributable to shareholders (\$M)	171.8	181.5	5.3%	Down
Net tangible assets per share (cents)	69 cents	83 cents		

Dividends paid during the interim period were a 4.86 cent per share final dividend (2.19 cents franked, 2.67 cents unfranked) for the year ended 31 March 2019 paid on 27 June 2019.

Dividends for the half year ended 30 September 2019

	30 September 2019 Cents per share	30 September 2018 Cents per share
Interim dividend:		
Franked dividend	2.55	1.94
Unfranked dividend	<u>2.55</u>	<u>2.92</u>
Total interim dividend	5.10	4.86
Ex-dividend date	18 Nov 2019	19 Nov 2018
Record date	19 Nov 2019	20 Nov 2018
Payment date	19 Dec 2019	20 Dec 2018

Refer to the Directors' report within the attached Interim Financial Report for explanation of revenues, profits after income tax and dividends.

Dividend Reinvestment Plan ("DRP")

The DRP continues to operate for the FY2020 interim dividend. A 2% discount to the average trading price will apply. The average trading price will be the average of the volume weighted average price of shares sold in ordinary market transactions (as more particularly described in the DRP Rules) on the ASX during the 10 trading days from 21 November 2019 to 4 December 2019 (inclusive).

The deadline for the receipt of elections for DRP participation for the FY2020 interim dividend is 5.00pm (Australian Eastern Daylight Time) on 20 November 2019. Participation, including eligibility, is subject to the DRP Rules - available at www.ausnetservices.com.au (> Investor Centre > Shares and Investors > Dividend Reinvestment Plan).

Consolidated interim income statement	11
Consolidated interim statement of comprehensive income	12
Consolidated interim statement of financial position	13
Consolidated interim statement of changes in equity	14
Consolidated interim statement of cash flows	16
Condensed notes to the consolidated interim financial statements	17
Directors' declaration	35
Independent auditor's review report	36

This interim financial report covers the consolidated entity consisting of AusNet Services Ltd and its subsidiaries. The interim financial report is presented in Australian dollars.

AusNet Services Ltd is a company limited by shares, incorporated and domiciled in Victoria, Australia. Its registered office and principal place of business is:

Level 31, 2 Southbank Boulevard
Southbank, Victoria 3006
Australia

This interim financial report does not include all the notes of the type normally included in an annual financial report. Accordingly, this report is to be read in conjunction with the annual report of the Group for the year ended 31 March 2019 and any public announcements made by AusNet Services Ltd during the interim reporting period in accordance with the continuous disclosure requirements of the *Corporations Act 2001* (Cth).

The interim financial report was authorised for issue by the Directors on 12 November 2019.

Directors' Report

Introduction

The Directors of AusNet Services Ltd present their report on the general purpose interim financial report of the consolidated entity for the financial period ended 30 September 2019.

The financial report is for AusNet Services Ltd and its controlled entities (we, us, our, AusNet Services or the Group).

Our Board of Directors

The persons listed below were Directors of AusNet Services Ltd during the whole of the financial period and up to the date of this report unless otherwise noted.

Non-executive Directors

Peter **Mason** (Chairman)

Alan **Chan** Heng Loon

Ralph **Craven**

Sally **Farrier**

Li Lequan

Robert **Milliner**

Nora **Scheinkestel**

Tan Chee Meng

Executive Director

Nino **Ficca** – *Managing Director (retired 31 October 2019)*

Tony **Narvaez** – *Managing Director (appointed 1 November 2019)*

Directors' Report (continued)**Interim review of operations**

This discussion and analysis is provided to assist readers in understanding the general purpose interim financial report.

\$M	30 September 2019	30 September 2018	Movement	%
Revenue	1,020.7	995.8	24.9	2.5
Earnings before interest, tax, depreciation and amortisation (EBITDA)	625.8	631.6	(5.8)	(0.9)
Net profit after tax	171.8	181.5	(9.7)	(5.3)
Capital expenditure	458.0	462.4	(4.4)	(1.0)

Financial performance for the half year, while slightly down compared to the previous period, was consistent with expectations, noting that there are a number of one-off and pass-through items that have impacted the results. Revenues were in line with regulatory determinations and underlying operating expenditure growth was constrained as we continued to manage our cost base through the ongoing delivery of efficiency initiatives.

During the period, we executed a five-year contract with Downer EDI Limited (Downer), expanding its operational and maintenance services to cover the entire electricity distribution network. This resulted in the transfer of 240 employees to Downer in early September 2019. The one-off transition and mobilisation costs incurred to date have been largely offset within net profit by a defined benefit curtailment gain as a result of transferring employees prior to their retirement age. From an operating cash flow perspective, we have paid Downer \$20 million, primarily for the transferred employee entitlements. Some further transition costs will be incurred in the second half and we will also collect proceeds from inventory and motor vehicle transfers.

The \$24.9 million revenue increase reflects the net impact of the following:

- \$17.0 million increase in transmission easement tax revenue (collected on behalf of the Victorian State Revenue Office), which is a pass-through of higher expense;
- \$11.1 million revenue from sale of inventory to Downer as part of the transferring of our electricity distribution field workforce and scheduling function, which was sold at book value and resulted in an offsetting increase in operating costs;
- \$22.9 million increase in electricity distribution due to volume outperformance (\$4.1 million), higher incentive revenues (\$5.4 million) and regulated price increases; partly offset by
- \$17.3 million reduction in Mondo as a result of the scope change to a number of low margin field services contracts as well as the change in lease accounting standard which resulted in \$3.4 million of Mondo revenue becoming part of net finance charges; and
- \$9.5 million reduction in gas revenues as a result of prior year inclusion of Government grant income from Energy for the Regions program as well as a reduction due to phasing of gas tariffs in CY2019 out of the winter peak.

Operating expenses (excluding easement tax and the materials cost of the inventory sale described above) increased by \$2.6 million. The regulated business recorded a \$12.3 million increase due to higher vegetation management costs (\$7.0 million) associated with timing of cutting activities and higher Transmission Use of System (TUOS) costs (\$5.9 million) which will be recovered via future revenues. Partly offsetting the regulated cost increase is a \$9.7 million decrease in Mondo as a result of reduced costs following contract rationalisation.

In addition, depreciation increased \$6.4 million due to the new lease accounting standard as extra depreciation arose from right-of-use lessee assets, partly offset by a \$1.9 million depreciation reduction from the removal of lessor assets that were reclassified to other financial assets.

Capital expenditure is in line with the previous period, with no material change in capital expenditure levels in any of the four segments.

Directors' Report (continued)**Interim review of operations (continued)****Electricity transmission business**

	30 September 2019	30 September 2018	Movement	%
Segment revenue (\$M)	322.8	311.9	10.9	3.5
Segment result - EBITDA (\$M)	193.7	201.5	(7.8)	(3.9)
Capital expenditure (\$M)	88.7	98.1	(9.4)	(9.6)

Transmission revenues increased as a result of the \$17.0 million increase in easement tax (pass-through revenue – no impact on EBITDA) offset by lower customer-initiated relocation revenues as the prior period included a significant relocation project. Easement tax reflects \$85.2 million or 66 per cent of total transmission operating expenses.

Capital expenditure decreased primarily as a result of the completion of major terminal station rebuilds in the prior year, partly offset by \$14.0 million of new spend on the North-West Communications Loop.

Electricity distribution business

	30 September 2019	30 September 2018	Movement	%
Segment revenue (\$M)	484.8	446.4	38.4	8.6
Segment result - EBITDA (\$M)	297.9	277.2	20.7	7.5
Volume (GWh)	3,950	3,937	13	0.3
Connections	747,740	732,523	15,217	2.1
Capital expenditure (\$M)	228.3	224.3	4.0	1.8

Regulated revenues increased by \$22.9 million primarily due to the combination of higher incentive revenues (\$5.4 million), volume outperformance (\$4.1 million) and regulated price increases. In addition, revenue increased \$11.1 million due to the sale of inventory to Downer, which was at nil margin. As discussed earlier, during the period the operational and maintenance services were transitioned to Downer, with 240 employees transferring. The transition has not had a material impact on the electricity distribution segment result.

Capital expenditure increased due to a \$13.0 million increase in rapid earth fault current limiter (REFCL) expenditure partly offset by lower replacement projects.

Future revenue impacts

Revenue for distribution services is recognised when those services are provided, based on the prevailing tariffs at the time. Our electricity distribution business is regulated by the Australian Energy Regulator (AER) and revenue is set on a calendar year basis which differs to our financial year. Given the nature of the regulatory model and how tariffs are set, there are a number of items that will impact future revenues for our electricity distribution business as follows:

- There is a difference between the regulated revenue recognised under our accounting policy, and the revenue cap under the Electricity Distribution Price Review (EDPR) determination. This difference is trued-up as an adjustment to tariffs in future periods. At 30 September 2019, we have a cumulative over-recovery of \$3.4 million which will reduce our revenue for the remainder of CY2019 and CY2020.
- The AER's decision on our 2016 Advanced Metering Infrastructure (AMI) Transition Charges Application will result in future revenue reduction of \$14.8 million, \$4.2 million in the remainder of CY2019 and \$10.6 million in CY2020.
- In CY2019, we re-commenced earning incentive revenues under the Service Target Performance Incentive Scheme (STPIS) and are entitled to \$12.1 million of future revenue as a result of our CY2017 network reliability performance of which we will receive approximately \$2.4 million in the remainder of CY2019 and \$9.7 million in CY2020. Our CY2020 tariffs are also expected to include a reduction of STPIS revenues of \$5.2 million as a result of our CY2018 network reliability performance (resulting in expected net STPIS revenues of \$4.5 million for CY2020).

Directors' Report (continued)**Interim review of operations (continued)****Gas distribution business**

	30 September 2019	30 September 2018	Movement	%
Segment revenue (\$M)	143.1	152.6	(9.5)	(6.2)
Segment result - EBITDA (\$M)	111.0	122.1	(11.1)	(9.1)
Volume (PJ)	43.6	42.8	0.8	1.9
Connections	722,458	701,682	20,776	3.0
Capital expenditure (\$M)	51.0	48.6	2.4	4.9

Regulated revenues decreased \$3.7 million due to changes in tariff profiling in CY2019, which saw higher fixed charges resulting in a smoothing of tariffs over the year reducing winter peak tariffs. In addition, customer contributions reduced by \$5.8 million due to the completion of the Energy for the Regions program in the prior period.

The increase in capital expenditure reflects higher levels of customer connections.

Mondo

	30 September 2019	30 September 2018	Movement	%
Segment revenue (\$M)	75.0	92.3	(17.3)	(18.7)
Segment result – EBITDA (\$M)	23.2	30.8	(7.6)	(24.7)
Lease interest income (\$M)	11.4	5.7	5.7	100.0
EBITDA after lease income (EBITDAaL) (\$M)	34.6	36.5	(1.9)	(5.2)
EBITDAaL Margin (%)	40.0	37.2	2.8	7.5
Capital expenditure (\$M)	90.0	91.4	(1.4)	(1.5)

During the period, the adoption of the new lease accounting standard resulted in a change in accounting treatment for a substantial number of Mondo's infrastructure assets. Dedicated customer connection assets are now accounted for as a finance lease, with revenue streams now split between interest income, principal repayment and operating revenue. Year on year revenues are not directly comparable since no restatement for assets now accounted for as finance income has been made in the prior period.

This change in accounting standard has resulted in a restatement of Mondo's key performance metrics to earnings before interest, depreciation and tax after lease interest income (EBITDAaL) and EBITDAaL margin (previously EBITDA and EBITDA margin) as these measurements are better reflections of business performance. The segment note continues to show the whole of business measure as EBITDA. Lease interest income in the prior year represents the income under the desalination plant connection agreement, which has historically been accounted for as a financial asset.

Revenues decreased \$17.3 million mainly due to the scope change of several high volume low margin field services contracts during the second half of FY2019 as well as non-recurring software development projects in the prior year. The change in accounting as described above has also resulted in a reduction in revenues of \$3.4 million, now recognised mainly as lease interest income. The additional increase in lease interest income reflects revenues arising from new windfarm connection projects completed since September 2018. EBITDAaL margins have increased as a result of the shift away from lower margin contract revenues to higher margin contracted infrastructure income.

Capital expenditure in the current period is consistent with the previous period and predominantly relates to Murra Warra, Stockyard Hill and Dundonnell wind farm transmission connections completed or currently under construction that are expected to conclude in the second half of FY2020. The prior period included capex in relation to four smaller wind farms, which were largely completed in the second half of FY2019.

Directors' Report (continued)

Financial position

Total equity of the Group was \$3,097.3 million as at 30 September 2019, a decrease of \$191.8 million compared to 31 March 2019, primarily attributed to the hedge reserve movement for the period due to lower interest rates and Australian dollar depreciation.

Our current liabilities exceed current assets by \$1,090.0 million at 30 September 2019. This includes \$1,360.8 million of current borrowings with upcoming debt maturities (at face value) of \$400.0 million of AUD notes in February and March 2020, \$100.0 million of Hong Kong bonds in March 2020, and \$709.7 million of Euro bonds in July 2020. The financial report has been prepared on a going concern basis, which contemplates the continuity of normal trading operations. The Group is, and is expected to continue, trading profitably, generating positive operating cash flows and successfully refinancing maturing debt. In addition, at 30 September 2019 we have available a total of \$650 million of undrawn but committed non-current bank debt facilities, \$100 million of undrawn but committed current bank debt facilities and \$180.9 million of cash.

Capital management

We manage our capital structure to maximise long-term returns to shareholders, as well as providing the flexibility to fund organic growth and other investment opportunities. An appropriate capital structure is also maintained to ensure an efficient cost of capital is available. Through our cash flows from operations and by maintaining an appropriate and prudent mix of debt and equity, we aim to achieve our targeted credit metrics that support an 'A' range credit rating.

Debt raising

Our common or central funding vehicle (CFV) operates through AusNet Services Holdings Pty Ltd, a subsidiary of AusNet Services Ltd. The Group has access to funds through the CFV.

In line with our Treasury Risk Policy, we maintain a diversified debt portfolio by maturity and source. AusNet Services has an A- credit rating from Standard and Poor's and A3 from Moody's Investor Services. This contributed to the successful completion of an A\$350 million 10-year bond issue in July 2019. This issuance satisfies our refinancing requirements for the remainder of FY2020, being the \$500 million of bonds maturing in February and March 2020 noted above.

Dividends

The final FY2019 dividend paid to shareholders on 27 June 2019 was as follows:

	Cents per share	Total dividend \$M
Unfranked dividend	2.67	97.5
Franked dividend	2.19	80.0
Total dividend	4.86	177.5

In relation to the final FY2019 dividend, \$65.0 million was utilised in the allotment of new shares issued under the Dividend Reinvestment Plan.

Environmental regulation and climate change

We were subject to both Federal and State Government environmental legislation during the period. The most significant areas of environmental legislation applying to AusNet Services are those which regulate noise emissions, greenhouse gas emissions, the discharge of emissions to land, air and water, the management of oils, chemicals and dangerous goods, the disposal of wastes, and those which govern the assessment of land use including the approval of developments. The Directors are not aware of any breaches of legislation during the period which are material in nature.

Under the *National Greenhouse and Energy Reporting (NGER) Act 2007 (Cth)*, corporations that meet or exceed thresholds are required to report greenhouse gas emissions and energy usage by 31 October each year. We meet these thresholds and have lodged our current year's NGER reporting with the Clean Energy Regulator for the period from 1 July 2018 to 30 June 2019.

Directors' Report (continued)

Material risks and uncertainties

We are committed to understanding and effectively managing risk to enhance our ability to deliver on our strategic objectives and meet expectations of our shareholders, employees, customers, suppliers and the communities in which we operate. We maintain oversight of our material business risks (financial and non-financial) at an enterprise-wide level, with regular reporting to the Audit and Risk Management Committee and the Board of Directors on the effectiveness of the management of these risks. In our 31 March 2019 Financial Report, we detailed the following principal risks, which may materially impact the execution and achievement of our business strategy and financial prospects:

- Industry and regulatory risks;
- Network risks;
- Funding and market risks;
- Climate change and sustainability risks;
- Information and communication technology risks; and
- Taxation risks.

We provide the following update since the 31 March 2019 Financial Report:

Industry and regulatory risks update

Rapid Earth Fault Current Limiter (REFCL) update

On 3 October 2019, the AER made a final decision on AusNet Services' contingent project application for Tranche three of the REFCL installation program, approving total capital expenditure of \$94 million, which was \$12 million lower than our application as the AER did not accept our proposal to build a second zone substation at Kalkallo. This is the final contingent project application and provides funding certainty for the REFCL program. AusNet Services will make a further submission in relation to Kalkallo expenditure as part of the Electricity Distribution Price Review (EDPR) determination process.

Under the *Electricity Safety (Bushfire Mitigation) Regulations 2013*, AusNet Services was required to meet a defined quota of zone substations with compliant REFCLs by 1 May 2019 (tranche one), with additional targets by 1 May 2021 and 1 May 2023. In addition, the regulations also specify strict performance criteria that the REFCLs are required to operate under. As disclosed in the March 2019 Financial Report, there is the potential for substantial financial penalties to arise in the event of non-compliance.

The REFCL Tranche one compliance period is now in place and AusNet Services received conditional compliance on six of the eight zone substations and extensions of time on the remaining two until 1 November 2019. In early October 2019, AusNet Services applied for further time extensions on the remaining two zone substations until November 2020 and May 2021 to address the harmonics and damping issues currently prohibiting full compliance. AusNet Services previously contemplated pursuing technical exemptions in relation to these issues however, we now believe that we have workable solutions that will take additional time to implement. AusNet Services is awaiting an ESV decision on the further time extensions.

In addition, the conditions of conditional compliance are being actively addressed, with a submission to Energy Safe Victoria (ESV) made in October 2019 demonstrating the conditions have either been met or plans are in place to address the conditions by 31 December 2019. In November 2019, the ESV accepted this plan and granted an extension of the conditional compliance period to 31 December 2019.

AusNet Services is required to report monthly to ESV to demonstrate progress. In the event that ESV is not satisfied with our progress, ESV or the Minister could decide to file legal proceedings and the Court could impose pecuniary penalties on AusNet Services. ESV has sole discretion over whether any extensions are granted, and for how long.

This summer is the first summer that REFCL devices will be in operation. We continue to monitor and manage the impact of these devices on our network and note that their effective operation may result in increased outages in our network, potentially affecting our customers and our future reliability incentives.

Tranche two is predominately in urban areas, with a number of high voltage customers connecting to these zone substations. While we continue to work with these customers, there is a risk of delay as a result of these customers requiring connection modifications. As a result, it is expected that a number of these zone substations will require extensions of time to meet the compliance period (1 May 2021).

As detailed in the March 2019 Financial Report, this program presents several other risks, which continue to be present and are being actively managed.

Directors' Report (continued)

Material risks and uncertainties (continued)

Bushfire Risks

Recent fire events, such as those in California, have resulted in substantial losses. These events are impacting the availability and pricing of bushfire liability insurance globally.

Risk management for these risks includes reviewing engineering standards and ratings for equipment, a significant annual investment in bushfire mitigation activities and the ongoing development and testing of emergency response plans. Investment is also being made in network resilience to strengthen critical parts of the electricity distribution network and enhance contingency planning. AusNet Services' safety record, network asset management and network maintenance programs are consistent with industry practice. We have achieved the targeted bushfire mitigation index of zero (a zero index means that no works are outstanding beyond their scheduled dates) by the bushfire season declaration and our vegetation management programs are prepared pursuant to the Electricity Safety (Bushfire Mitigation) Regulations. In addition, we continue to focus our customer engagement on community resilience, including pre-summer communications and media for customers to be bushfire ready.

AusNet Services has liability insurance which specifically provides cover for bushfire liability. AusNet Services reviews its insurance cover annually and seeks cover commensurate with the scale and size of its operations, the risks assessed to be associated with its operations and with industry standards and practice. Recent events have seen some insurers withdraw from the market and premiums rise. This may continue to occur for future renewals. There are regulatory mechanisms in place under which, in certain circumstances, we may apply to the AER for a pass through of any reasonable and prudent residual costs that may ultimately be incurred in relation to bushfires above our liability insurance.

Significant changes in the state of affairs

Other than referred to above, in the opinion of the Directors, there were no significant changes in the state of affairs of the Group that occurred during the period under review.

Matters subsequent to the end of the financial period

Dividend

Since the end of the financial period, the Directors have approved an interim dividend for FY2020 of \$188.2 million (5.10 cents per share) 50 per cent franked to be paid on 19 December 2019. The AusNet Services Ltd Dividend Reinvestment Plan will be in operation for the FY2020 interim dividend, with shares allocated at a two percent discount to the volume weighted average price.

Rounding of amounts

AusNet Services is a company of a kind referred to in Instrument 2016/191, issued by the Australian Securities and Investments Commission, relating to the 'rounding off' of amounts in the Directors' report. Amounts in the Directors' report have been rounded off in accordance with that Instrument to the nearest hundred thousand dollars unless otherwise stated.

This report is made in accordance with a resolution of the Directors.

Peter Mason

Managing Director

Melbourne
12 November 2019

Lead Auditor's Independence Declaration under Section 307C of the Corporations Act 2001

To the Directors of AusNet Services Ltd

I declare that, to the best of my knowledge and belief, in relation to the review of AusNet Services Ltd for the half-year ended 30 September 2019 there have been:

- i. no contraventions of the auditor independence requirements as set out in the *Corporations Act 2001* in relation to the review; and
- ii. no contraventions of any applicable code of professional conduct in relation to the review.

Consolidated interim statement of changes in equity

For the period ended 30 September 2019

- (i) Under the corporate restructure, AusNet Services Ltd shares were issued to shareholders in return for their stapled securities. AusNet Services Ltd share capital was measured at fair value on the date of the transaction, being the market capitalisation of the AusNet Services Stapled Group on the date of implementation of 18 June 2015 (\$4,957.7 million). The difference between the contributed equity of AusNet Services Ltd and the pre-restructure contributed equity of the Stapled Group at the date of the transaction was recognised as a restructure reserve.
- (ii) The hedge reserve comprises the effective portion of the cumulative net change in the fair value of cash flow hedging instruments. These gains or losses are transferred to the income statement when the hedged item affects income, except for highly probable forecast purchases of an asset where the gains or losses are included in the initial measurement of that asset.
- (iii) This amount represents the fair value uplift to the assets of the AusNet Services Transmission Group on the date that the previous Stapled Group was formed. The fair value uplift was applied to easements which are considered to have an indefinite useful life. The amount was carried into the asset revaluation reserve of the Group following the corporate restructure on 18 June 2015.
- (iv) The share based payment reserve represents the tax-effected fair value of the performance rights granted under the 2017-2019 tranches of the long-term incentive plan. This takes into account estimated vesting and service conditions as at 30 September 2019.
- (v) The other equity component results from the application of reverse acquisition accounting and represents the difference between the net assets of AusNet Services (Transmission) Ltd and AusNet Finance Pty Ltd and the purchase price paid by the legal acquirer, AusNet Services (Transmission) Ltd on 20 October 2005.

The above consolidated interim statement of changes in equity should be read in conjunction with the accompanying notes.

Consolidated interim statement of cash flows

For the period ended 30 September 2019

	30 September	30 September
	2019	2018
	\$M	\$M
Cash flows from operating activities		
Profit for the period	171.8	181.5
Add back interest, tax, depreciation	454.0	450.1
Non-cash gifted assets revenue	(23.8)	(19.9)
Other non-cash items	(2.2)	10.8
Working capital movement	(33.2)	(61.3)
Income tax paid	(57.2)	(10.7)
Net interest paid	(153.2)	(141.4)
Net cash inflow from operating activities	356.2	409.1

Condensed notes to the consolidated interim financial statements

30 September 2019

Section A Overview

(a) Basis of preparation

The consolidated general purpose interim financial report, prepared by a for-profit entity for the period ended 30 September 2019, represents the consolidated financial statements of the Group, which comprises AusNet Services Ltd and its subsidiaries. The Group is also referred to as we, us, our or AusNet Services.

The financial report has been prepared:

- in accordance with Australian Accounting Standard AASB 134 *Interim Financial Reporting* and the *Corporations Act 2001* (Cth);
- on a going concern basis, which contemplates the continuity of normal trading operations. The Group's current liabilities exceed current assets by \$1,090.0 million at 30 September 2019 primarily due to \$1,360.8 million of current borrowings. The Group is, and is expected to continue trading profitably, generating positive operating cash flows, and successfully refinancing maturing debt. In addition, at 30 September 2019 we have available a total of \$650 million of undrawn but committed non-current bank debt facilities, \$100 million of undrawn but committed current bank debt facilities and \$180.9 million of cash. Upcoming debt maturities include (at face value), \$400.0 million of AUD notes in February and March 2020, \$100.0 million of Hong Kong bonds in March 2020, and \$709.7 million of Euro bonds in July 2020;
- under the historical cost convention, except for certain financial assets and liabilities (including derivative financial instruments) measured at fair value; and
- with amounts rounded off to the nearest hundred thousand dollars, unless otherwise stated, in accordance with Instrument 2016/191 issued by the Australian Securities and Investments Commission.

The interim financial report does not include all the notes of the type normally included in an annual financial report. Accordingly, this report is to be read in conjunction with the annual report of the Group for the year ended 31 March 2019 and any public announcements made by AusNet Services Ltd during the interim reporting period in accordance with the continuous disclosure requirements of the *Corporations Act*.

This general purpose interim financial report is presented in Australian dollars.

The interim financial statements were approved by the Board of Directors on 12 November 2019.

Except for the adoption of AASB 16 *Leases*, the accounting policies applied by the Group in this consolidated interim financial report are the same as those applied by the Group in its consolidated financial report as at and for the year ended 31 March 2019.

(b) Critical accounting estimates and judgements

The preparation of the financial report requires management to make estimates and judgements concerning the future. The resulting accounting estimates will, by definition, seldom equal the related actual results.

In preparing this consolidated interim financial report, other than the adoption of AASB 16 and the areas of judgement outlined in note A(c), the key sources of estimation uncertainty were the same as those applied by the Group in its consolidated financial report as at and for the year ended 31 March 2019. Some of the critical judgements and estimates used by management in applying the Group's accounting policies for the period ended 30 September 2019 have been updated to reflect the latest available information. These updates have not had a significant impact on the financial performance or financial position of the Group as at and for the period ended 30 September 2019.

Condensed notes to the consolidated interim financial statements

30 September 2019

Section A Overview (continued)**(c) Change in accounting policies – AASB 16 Leases****i. As a lessee**

On adoption of AASB 16, the Group recognised lease liabilities and right-of-use assets in relation to leases which had previously been classified as 'operating leases' under the principles of AASB 117 *Leases*. AASB 16 was adopted from 1 April 2019, using the modified retrospective transition method.

The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted using the Group's incremental borrowing rate. The lease liability is subsequently increased by the interest cost on the lease liability and decreased by the lease payment made. It is remeasured when there is a change in future lease payments arising from a change in an index or a rate (including reassessment of extension options), or a change in the discount rate.

At transition, the right-of-use asset is measured at the same value as the lease liability and is subsequently measured at cost less any accumulated depreciation and impairment losses, and adjusted for certain remeasurements of the lease liability.

The Group has applied judgement to determine the lease term for some lease contracts in which it is a lessee that include renewal options. The assessment of whether the Group is reasonably certain to exercise such options impacts the lease term, which significantly affects the amount of lease liabilities and right-of-use assets recognised. Further judgement is used to determine the discount rate, which is the Group's incremental borrowing rate reflective of terms and conditions of the lease.

The Group has elected not to recognise right-of-use assets and lease liabilities for some leases of low value and/or that expire within 12 months of lease term. The Group recognises the lease payments associated with these leases as an expense on a straight-line basis over the lease term.

ii. As a lessor

Under AASB 16, the Group has determined that its dedicated unregulated customer connection assets now meet the new definition of a finance lease, resulting in de-recognition of property, plant and equipment and the recognition of a financial asset. The financial asset is initially measured at the present value of remaining revenue receipts, discounted at the interest rate implicit in the lease. In order to calculate the interest rate implicit in the lease, the Group has determined that the construction costs of the asset is equivalent to its fair value.

At transition, certain contract assets and contract liabilities recognised under AASB 15 *Revenue from Contracts with Customers* for dedicated unregulated customer connections were de-recognised and adjusted to retained profits.

The Group continues to act as lessor in certain operating lease arrangements and the accounting treatment of these is unchanged by AASB 16.

iii. Reconciliation of FY2019 operating lease commitments to AASB 16 lease liability:

	1 April 2019 \$M
Operating lease commitments at 31 March 2019	155.0
Discounted using the incremental borrowing rate at 1 April 2019 (i)	99.8
- Extension options reasonably certain to be exercised (ii)	4.0
Lease liabilities recognised at 1 April 2019	103.8

- (i) When measuring lease liabilities, the Group discounted lease payments using its incremental borrowing rate at 1 April 2019. The weighted-average rate applied was 5.64%.
- (ii) Relates to a 20 year extension option beginning in 2048 for land at one of the Group's terminal stations.

Condensed notes to the consolidated interim financial statements

30 September 2019

Section A Overview (continued)**(c) Change in accounting policies – AASB 16 Leases (continued)****Impacts on financial statements:**

The following tables summarise the impact of adopting AASB 16 on the Group's consolidated interim statement of financial position as at 30 September 2019, the Group's consolidated interim income statement and consolidated interim statement of cash flows for the half year then ended.

Consolidated interim statement of financial position as at 30 September 2019

Section B Operating our business

This section highlights the performance of the Group for the period, including results by operating segment, analysis of revenue and earnings per share.

Note B.1 Segment information

Segment information is based on the information that management uses to make decisions about operating matters and allows users to review operations through the eyes of management. We present our reportable segments and measure our segment results for each of our networks as well as our unregulated Mondo business.

(a) Description of reportable segments

An operating segment is a component of the Group that engages in business activities from which it earns revenues and incurs expenses for which discrete financial information is available and whose operating results are regularly reviewed by the chief operating decision maker. The Group is organised into the following segments:

(i) Electricity distribution

The electricity distribution network carries electricity from the high voltage transmission network to end users, including metering. We charge retailers and some large customers regulated rates for the use of the electricity distribution network. The performance obligation is the provision of the access to the network and as such use of system revenue is recognised over the contract period which is deemed to be the regulatory reset period. The transaction price is deemed to be the determined recoverable revenue over that period. Variable consideration relating to volumes is constrained to the period in which it occurs, and volume over or under recoveries under the revenue cap are not considered to comprise variable consideration in accordance with AASB 138 *Intangible Assets*.

Excluded ancillary and alternative control services including public lighting, cross boundary charges and new connection charges are rendered to customers for a fixed rate with revenue recognised at a point in time when the services are rendered. The electricity distribution segment does not purchase or sell electricity. Our electricity distribution network covers eastern Victoria including the eastern metropolitan region of Melbourne.

Customer Contributions

Customer contributions include the receipt of cash from a customer for the construction of assets, or the contribution of completed assets to us.

Non-refundable contributions received from customers towards the cost of extending or modifying our networks are generally recognised as revenue and an asset respectively once control is gained of the contribution or asset and it is operating as intended. The performance obligation is at a point in time being the time at which the customer is connected to the network.

For some customer projects, the performance obligation will be linked to an ongoing service contract, and hence the performance obligation will be satisfied over time, being the contract term.

Customer contributions of cash are measured with reference to the cash contribution received and customer contributions of assets are measured at the fair value of the assets contributed at the date we gain control of the asset. Fair value is determined with reference to the depreciated replacement cost of the asset, unless another measure of fair value is considered more appropriate.

(ii) Gas distribution

The gas distribution network carries natural gas to commercial and residential end users, including metering. We charge retailers and some large customers regulated rates for the use of the gas distribution network. The performance obligation is the provision of the access to the network and as such use of system revenue is recognised over the contract period which is deemed to be the regulatory reset period. The transaction price is deemed to be the determined recoverable revenue over that period. Variable consideration, being the volume fluctuations or true ups for unaccounted for gas are constrained to the period to which they apply. The gas distribution segment does not purchase or sell gas. Our gas distribution network covers central and western Victoria.

Customer contributions in the gas distribution segment are accounted for in the same way as the electricity distribution segment.

Condensed notes to the consolidated interim financial statements

30 September 2019

Note B.1 Segment information (continued)

(a) Description of reportable segments (continued)

(iii) Electricity transmission

We own and manage the vast majority of the electricity transmission network in Victoria. Our electricity transmission network consists of the transmission lines and towers which carry electricity at high voltages from power generators to electricity distributors around Victoria forming the backbone of the Victorian electricity network. We charge the Australian Energy Market Operator (AEMO), distribution network service providers and electricity generators for connections and use of the electricity transmission network. Prescribed excluded services revenue is generated from assets that will be rolled into the regulated asset base (RAB) in the next regulatory reset period and included in regulated transmission revenue from that date. Negotiated excluded services revenue is generated from assets that are excluded from the RAB but for which revenue is controlled under a regulated negotiating framework. In each case, contracts are based on fixed fees over the life of the asset and performance obligations are satisfied over time. The electricity transmission segment does not purchase or sell electricity.

(iv) Mondo

The Mondo business provides contracted infrastructure asset services and specialised technology solutions to enable energy data and asset intelligence services. The contracted infrastructure asset services business unit owns and operates a portfolio of assets that fall outside the regulated asset base. The investments are made through directly negotiated agreements, pursuant to which Mondo typically receives fixed fee revenue over the contract period in exchange for the infrastructure and operational services provided. Variable consideration includes penalty regimes for unplanned outages, early completion bonuses and other incentives/penalties which vary between contracts and is constrained to the period in which it arises.

Specialised technology solutions relate to the development and maintenance of asset management software solutions for utility and rail customers. Performance obligations are typically split between the development and the maintenance of the software. Performance obligations for development revenue are based on milestones, and are recognised at a point in time. Performance obligations for software maintenance are satisfied over the life of the contract. There is no variable consideration in these contracts.

For customer contributions in the Mondo business, the performance obligation will be linked to an ongoing service contract, and hence the performance obligation will be satisfied over time, being the contract term.

The customers of this business primarily operate in the utility, renewables and essential infrastructure sectors of electricity, water, gas and rail.

(ii) EBITDA after lease income

(iii) For FY2019, \$5.7 million of finance income has been re-allocated from the \$149.4 million of net finance costs presented in the consolidated interim income statement representing desalination interest income now presented within EBITDAaL.

Condensed notes to the consolidated interim financial statements

30 September 2019

Note B.1 Segment information (continued)**(c) Notes to and forming part of the segment information***(i) Accounting policies*

Segment revenues and expenses are those that are directly attributable to a segment and the relevant portion that can be allocated to the segment on a reasonable basis. The Cost Allocation Methodology as approved by the Australian Energy Regulator (AER) is used as the basis for allocating expenses to the relevant segment.

(ii) Inter-segment eliminations

Segment revenues, expenses and results include transactions between the segments that are eliminated on consolidation.

Note B.2 Revenue**Disaggregated revenue**

In the following table, revenue is disaggregated by revenue type and timing of recognition. The table also includes a reconciliation of the disaggregated revenue with AusNet Services' reportable segments (note B.1).

30 September 2019	Electricity distribution \$M	Gas distribution \$M	Electricity transmission \$M	Mondo \$M	Inter-segment eliminations \$M	Total \$M
Timing of recognition						
At a point in time	61.3	6.1	1.1	31.7	-	100.2
Over time	422.7	137.0	321.6	42.6	(5.0)	918.9
Revenue from contracts with customers	484.0	143.1	322.7	74.3	(5.0)	1,019.1
Other income not in scope of AASB 15						
Operating lease income	0.1	-	0.1	-	-	0.2
Income from government grants	0.7	-	-	0.7	-	1.4
Total segment revenue	484.8	143.1	322.8	75.0	(5.0)	1,020.7
30 September 2018						
Timing of recognition						
At a point in time	46.2	13.5	2.5	47.0	-	109.2
Over time	399.7	139.1	309.2	45.3	(7.4)	885.9

Total segment revenue	446.4	152.6	311.9	92.3	(7.4)	995.8

Condensed notes to the consolidated interim financial statements

30 September 2019

Note B.3 Seasonality of operations**(a) Electricity distribution**

Electricity distribution volumes display some seasonal variation with increased volumes in winter due to higher demand for heating and increased volumes in summer as a result of higher demand for air conditioning. However, the impact of seasonal volume variation on electricity distribution revenue is limited due to the tariff structure, which includes a fixed component and a contract demand capacity component. The high proportion of process related consumption of commercial and industrial customers also limits seasonal variation. Electricity distribution revenue operates under a revenue cap, with the amount of total revenue fixed over the regulatory reset period. Any under/over recovery in a particular calendar year will be built into subsequent years' tariffs.

(b) Gas distribution

Gas distribution volume is seasonal with a distinct winter peak due to gas demand for heating. A component of the seasonal revenue variation is mitigated due to the tariff structure, which includes a fixed component and a demand capacity-based component.

(c) Electricity transmission

Electricity transmission revenue is not seasonal. Transmission revenue is earned in accordance with the monthly revenue schedule determined by the AER.

(d) Mondo

Mondo revenue is not seasonal and is earned as the services are rendered.

Note B.4 Earnings per share**(a) Basic earnings per share**

		30 September	30 September
		2019	2018
	Profit attributable to the ordinary shareholders of AusNet Services (\$M)	171.8	181.5
divided by	Weighted average number of shares (million)	3,667	3,609
equals	Basic earnings per share (cents)	4.69	5.03

(b) Diluted earnings per share

There were no factors causing a dilution of either the profit or loss attributable to ordinary shareholders or the weighted average number of ordinary shares outstanding. We have the option to issue equity to meet vested share rights to employees, however we are currently purchasing these on market. Accordingly, basic and diluted earnings per share are the same.

Section D Financing our business

This section provides information relating to our capital structure and our exposure to financial risks, how they affect the Group's financial position and performance, and how those risks are managed. The Group's financial risk management objectives and policies are consistent with those disclosed in the Group's consolidated financial report as at and for the year ended 31 March 2019.

Note D.1 Borrowings

		30 September	31 March
		2019	2019
	Maturity date	\$M	\$M
Current borrowings			
Swiss franc (CHF) senior notes (i)		-	389.5
Bank debt facilities		-	22.0
Domestic medium-term notes	Feb 2020	303.5	341.1
Hong Kong dollar (HKD) senior notes (i)	Mar 2020	132.8	127.1
Floating rate note	Mar 2020	100.0	100.0
Euro (EUR) senior notes (i)	Jul 2020	824.5	-
Total current borrowings		1,360.8	979.7
Non-current borrowings			
Hong Kong dollar (HKD) senior notes (i)	2021-2034	971.6	876.5
Domestic medium-term notes	2021-2043	2,336.0	1,949.5
Bank debt facilities	2023	47.8	-
Euro (EUR) senior notes (i)	2024-2030	1,940.7	2,637.1
Japanese Yen (JPY) senior notes (i)	2024	71.6	66.3
US dollar (USD) senior notes (i)	2026	130.5	118.7
Norwegian Kroner (NOK) senior notes (i)	2027-2029	632.4	596.4
US dollar (USD) hybrid (i), (ii)	2076	551.0	513.7
Singapore dollar (SGD) hybrid (i), (ii)	2076	216.1	208.5
Total non-current borrowings		6,897.7	6,966.7
Total borrowings		8,258.5	7,946.4

(i) The carrying value of foreign currency borrowings are translated at spot rate as at balance date. The foreign currency risk associated with these borrowings is hedged through the use of cross-currency swaps.

(ii) The first call date for hybrid securities in September 2021.

AusNet Services had \$650 million of undrawn but committed non-current bank debt facilities, \$100 million of undrawn but committed current bank debt facilities and \$180.9 million cash on deposit as at 30 September 2019. AusNet Services has an A- credit rating from Standard and Poor's and an A3 credit rating from Moody's Investor Services.

(a) Fair value measurement

Derivative financial instruments are recognised at fair value and are measured in accordance with generally accepted pricing models based on discounted cash flow analysis. Appropriate transaction costs are included in the determination of net fair value. These pricing models use significant market observable data as well as market corroboration based on active quotes. As such, fair value measurements are deemed level two within the fair value hierarchy as per AASB 13 *Fair Value Measurement*. The Group does not have any financial instruments which would be categorised as either level one or three of the fair value hierarchy.

The Group also has a number of financial assets and liabilities which are not measured at fair value in the consolidated statement of financial position. With the exception of borrowings, the carrying amounts of these items are considered to be a reasonable approximation of their fair value at 30 September 2019.

Condensed notes to the consolidated interim financial statements

30 September 2019

Note D.1 Borrowings (continued)**(a) Fair value measurement (continued)**

The fair value of total borrowings as at 30 September 2019 is \$8,924.6 million (31 March 2019: \$8,562.0 million). This fair value measurement uses significant market observable data, and therefore is a level two measurement within the fair value hierarchy as per AASB 13. The valuation techniques applied are consistent with those applied in the consolidated financial report as at and for the year ended 31 March 2019.

Note D.2 Net finance costs

	30 September 2019 \$M	30 September 2018 \$M
Finance income		
Interest income	1.1	5.5
Return on financial assets	11.4	5.7
Total finance income	<u>12.5</u>	<u>11.2</u>
Finance costs		
Interest expense	162.5	163.2
Other finance charges - cash	1.7	1.6
Other finance charges - non-cash	2.5	2.7
Loss/(gain) on accounting for hedge relationships	6.5	3.5
Unwind of discount on provisions	2.3	2.3
Unwind of discount on lease liabilities	3.4	-
Defined benefit net interest income	(0.6)	(0.8)
Capitalised finance charges	(13.8)	(11.9)
Total finance costs	<u>164.5</u>	<u>160.6</u>
Net finance costs	<u>152.0</u>	<u>149.4</u>

Note D.3 Equity

	30 September 2019 \$M	31 March 2019 \$M
Contributed equity		
Ordinary share capital (a)	5,297.1	5,232.1
Shares held by employee share plans trust (b)	(6.5)	(9.2)
Total contributed equity	<u>5,290.6</u>	<u>5,222.9</u>

(a) Movements in ordinary share capital

Date	Details	Issue price	Number of shares	\$M
1 April 2019	Opening balance		3,652,664,376	5,232.1
27 June 2019	Dividend Reinvestment Plan (i)	\$1.75	37,146,857	65.0
30 September 2019	Closing balance		3,689,811,233	5,297.1
1 April 2018	Opening balance		3,614,346,765	5,172.8
30 September 2018	Closing balance		3,614,346,765	5,172.8

(i) On 27 June 2019, 37.1 million new shares were issued under the DRP. The new shares were issued at a price of \$1.75 providing approximately \$65.0 million.

Condensed notes to the consolidated interim financial statements

30 September 2019

Note D.3 Equity (continued)**(b) Shares held by employee share plans trust**

The Group uses an employee share trust as a delivery mechanism to satisfy future vesting entitlements for the Short Term Incentive Plan deferred equity rights for the Managing Director and the Long Term Incentive Plan (LTIP) performance rights. During the financial period, no shares were acquired on market and 1,622,106 shares vested at an average price of \$1.69 per share.

During the previous financial period, 1,901,462 shares were acquired on market at an average price of \$1.60 per share and 2,411,082 shares vested at an average price of \$1.73 per share.

The share trust is held by Computershare Pty Ltd and for accounting purposes the trust is deemed to be controlled by AusNet Services. Accordingly, the shares held by the trust are consolidated into the Group's financial statements. The shares have been excluded for the earnings per share calculation in note B.4.

Note D.4 Dividends

The following dividends were approved and paid by AusNet Services to shareholders during the current and previous interim financial periods:

	Date paid	Cents per share	Total dividend \$M
Current period			
Ordinary dividend - franked	27 June 2019	2.19	80.0
Ordinary dividend - unfranked	27 June 2019	2.67	97.5
Total dividends		4.86	177.5
Previous period			
Ordinary dividend - unfranked	28 June 2018	4.62	166.8
Total dividends		4.62	166.8

In relation to the dividend paid of \$177.5 million, \$65.0 million less transaction costs was utilised in the allotment of new shares issued under the DRP. There was no DRP in the previous financial period.

Condensed notes to the consolidated interim financial statements

30 September 2019

Section E Other disclosures

This section includes other information to assist in understanding the financial performance and position of the Group, or items required to be disclosed in order to comply with accounting standards and other pronouncements.

Note E.1 Contingent liabilities and contingent assets

(a) Rapid Earth Fault Current Limiter (REFCL) penalty regime

AusNet Services has eight zone substations commissioned with REFCL technology. However, some technical issues have been identified during the testing of installed REFCLs. This means that the achievement of the "required capacity" under the regulations is challenging due to the new use of this technology and its interaction with the existing network at some sites. While we continue to actively work on resolving these issues, delays to achieving full compliance with the legislative requirements detailed below have been experienced.

The amended Electricity Safety Act 1998 (Vic) (ESA) enables Energy Safe Victoria (ESV) or the Minister to apply to the Supreme Court of Victoria, seeking the imposition of significant financial penalties if AusNet Services fails to achieve the number of points prescribed by the Regulations throughout the applicable compliance period. The legislation provides that the Court can impose a maximum penalty of \$2 million per point for each station where AusNet Services has not achieved compliance. Accordingly, penalties of up to \$10 million per zone substation can apply if AusNet Services fails to achieve the required capacity during the relevant compliance period. Additionally, the Court can impose a maximum daily penalty of \$5,500 for each day AusNet Services remains non-compliant.

In April 2019, ESV confirmed that six of these zone substations totalling 23 points have achieved conditional compliance. In addition, the conditions of conditional compliance on the other six zone substations are being actively addressed, with a submission to Energy Safe Victoria (ESV) made in October 2019 demonstrating the conditions have either been met or plans are in place to address the conditions by 31 December 2019. In November 2019, the ESV accepted this plan and granted an extension of the conditional compliance period to 31 December 2019. Conditional compliance means that ESV has accepted that AusNet Services has successfully commissioned the REFCL devices and they are functioning at a level acceptable to ESV, however there are further steps required to meet full compliance.

Two of the zone substations have not achieved conditional compliance, and ESV granted time-extensions to postpone the commencement of the Tranche 1 Compliance Period until 1 November 2019. In early October 2019, AusNet Services applied for further time extensions on the remaining two zone substations until November 2020 and May 2021 to address the harmonics and damping issues prohibiting full compliance. AusNet Services previously contemplated pursuing technical exemptions in relation to these issues. However, we now believe that we have workable solutions in relation to these issues that will take additional time to implement. AusNet Services is awaiting an ESV decision on the further time extensions.

AusNet Services is required to report monthly to ESV to demonstrate progress. In the event that ESV is not satisfied with our progress, ESV or the Minister could decide to file legal proceedings and the Court could impose pecuniary penalties on AusNet Services. ESV has sole discretion over whether any postponement is granted, and for how long.

(b) Taxation risks update

AusNet Services continues to be under audit from the Australian Tax Office (ATO). No new material information has come to light since year end and the tax risk provision recognised at 31 March 2019 remains unchanged at \$11.0 million. AusNet Services has completed the FY2019 tax return process and continues to actively engage with the ATO to obtain resolution on the audit matters. Having responded to a series of information requests, the ATO has extended its audit timetable, with estimated completion in May 2020 (previously December 2019) to allow time for review of information provided.

Condensed notes to the consolidated interim financial statements

30 September 2019

Note E.1 Contingent liabilities and contingent assets (continued)

(c) Other

AusNet Services is involved in various legal and administrative proceedings and various claims on foot, the ultimate resolution of which, in the opinion of AusNet Services, will not have a material effect on the consolidated financial position, results of operations or cash flows.

Other than as listed above, we are not aware of any contingent liabilities or assets as at 30 September 2019 (2018: \$0).

Note E.2 Events occurring after the balance sheet date

(a) Dividend

The Directors have approved an interim dividend for FY2020 to be paid on 19 December 2019, comprised as follows:

	Cents per share	Total dividend \$M
Franked dividend	2.55	94.1
Unfranked dividend	2.55	94.1
	5.10	188.2

The AusNet Services Ltd DRP will be in operation for the FY2020 interim dividend, with shares allocated at a two per cent discount to the volume weighted average price.

(b) Other matters

Other than outlined above, there has been no matter or circumstance that has arisen since 30 September 2019 up to the date of issue of this financial report that has significantly affected or may significantly affect:

- (a) the operations in the financial period subsequent to 30 September 2019 of the Group;
- (b) the results of those operations; or
- (c) the state of affairs, in the financial period subsequent to 30 September 2019, of the Group.

Directors' declaration

In the opinion of the Directors of AusNet Services Ltd (the Company):

- (a) the interim financial statements and notes set out on pages 11 to 34, are in accordance with the *Corporations Act 2001*, including:
 - (i) complying with Australian Accounting Standard AASB 134 *Interim Financial Reporting* and the *Corporations Regulations 2001*; and
 - (ii) giving a true and fair view of the consolidated entity's financial position as at 30 September 2019 and its performance for the six-month period ended on that date; and
- (b) there are reasonable grounds to believe that the Company will be able to pay its debts as and when they become due and payable.

Signed in accordance with a resolution of the Directors.

Peter Mason
Chairman

Tony Narvaez
Managing Director

Melbourne

Independent Auditor's Review Report

To the shareholders of AusNet Services Ltd

Report on the Interim Financial Report

Conclusion

We have reviewed the accompanying **Interim Financial Report** of AusNet Services Ltd.

Based on our review, which is not an audit, we have not become aware of any matter that makes us believe that the Interim Financial Report of AusNet Services Ltd is not in accordance with the *Corporations Act 2001*, including:

- giving a true and fair view of the **Group's** financial position as at 30 September 2019 and of its performance for the **Interim Period** ended on that date; and
- complying with *Australian Accounting Standard AASB 134 Interim Financial Reporting* and the *Corporations Regulations 2001*.

The **Interim Financial Report** comprises:

- Consolidated statement of financial position as at 30 September 2019
- Consolidated interim income statement, Consolidated interim statement of comprehensive income, Consolidated interim statement of changes in equity and Consolidated interim statement of cash flows for the half-year ended on that date
- Notes comprising a summary of significant accounting policies and other explanatory information
- The Directors' Declaration.

The **Group** comprises AusNet Services Ltd (the Company) and the entities it controlled at the half year's end or from time to time during the half-year.

Responsibilities of the Directors for the Interim Financial Report

The Directors of the Company are responsible for:

- the preparation of the Interim Financial Report that gives a true and fair view in accordance with *Australian Accounting Standards* and the *Corporations Act 2001*
- such internal control as the Directors determine is necessary to enable the preparation of the Interim Financial Report that is free from material misstatement, whether due to fraud or error.

For personal use only

For personal use only

Auditor's responsibility for the review of the Interim Financial Report

Our responsibility is to express a conclusion on the Interim Financial Report based on our review. We conducted our review in accordance with *Auditing Standard on Review Engagements ASRE 2410 Review of a Financial Report Performed by the Independent Auditor of the Entity*, in order to state whether, on the basis of the procedures described, we have become aware of any matter that makes us believe that the Interim Financial Report is not in accordance with the *Corporations Act 2001* including: giving a true and fair view of the Group's financial position as at 30 September 2019 and its performance for the half-year ended on that date; and complying with *Australian Accounting Standard AASB 134 Interim Financial Reporting* and the *Corporations Regulations 2001*. As auditor of AusNet Services Ltd, *ASRE 2410* requires that we comply with the ethical requirements relevant to the audit of the annual financial report.

A review of a Half-year Interim Financial Report consists of making enquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with *Australian Auditing Standards* and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

In conducting our review, we have complied with the independence requirements of the *Corporations Act 2001*.
