

Net Tangible Assets & Monthly Investment Report

Company commentary

- Equity losses largely offset by currency gains
- KKR issues strong results

In January, declines in our equity holdings were largely offset by gains in our currency positioning. The novel coronavirus outbreak saw holdings such as our Macau casino operator MGM China decline sharply in the last two weeks of January, as did broad commodity prices, commodity stocks and the Australian Dollar.

Much of our currency exposure is to the United States Dollar and Euro. Both of these currencies typically appreciate against the Australian Dollar in times of uncertainty and help to protect the portfolio.

During the month, alternative fund manager KKR

appreciated 9% after issuing strong results. KKR's book value was up sharply in 2019, fundraising efforts continue in earnest, and management is considering corporate governance changes to allow inclusion in the Russell index family.

Part of our alternative manager investment thesis – discussed in our September 2019 quarterly report – was how conversion from a partnership structure to a corporate structure would facilitate wider ownership and ultimately share price appreciation. The thesis continues to play out as expected.

Net Tangible Asset (NTA) backing per ordinary share (After fees and expenses, all figures are unaudited) ¹	January 2020
NTA before tax accruals ²	\$ 1.4422
NTA after tax ³	\$ 1.3530

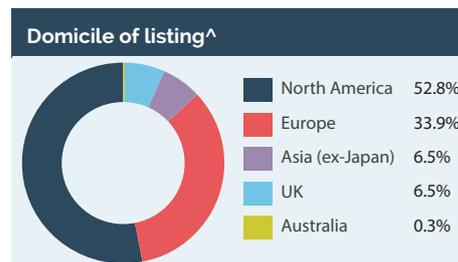

Company performance (net of fees) ⁴	1 Month	1 Year	3 Years p.a.	5 Years p.a.	Since inception p.a.	Total Return
PM Capital Global Opportunities Fund	-0.5%	20.4%	14.3%	10.9%	12.1%	101.1%

1. Past performance is not a reliable indicator of future performance. 2. NTA before tax accruals does not include franking credits. Franking credits per share are \$0.047. 3. Net Tangible Assets (NTA) refers to the net assets of the Company after the accruals for net current and deferred tax liabilities/assets. 4. Performance adjusted for capital flows including those associated with the payment of dividends and tax, share issuance as a result of option exercise and the dividend reinvestment plan, and including the value of franking credits.

PM Capital Limited ('the Manager'), founded in 1998, is a leading Australian based fund manager that has successfully achieved its goal of building long term wealth for its clients by investing in global markets with patience and conviction.

Company profile

The PM Capital Global Opportunities Fund Limited (ASX:PGF, ACN 166 064 875), which began trading of the ASX on 12 December 2013, provides investors with an opportunity to invest in global equities via an Australian Securities Exchange (ASX) listed investment company.

Managed by PM Capital (AFSL 230222), the aim is to create long term wealth through a concentrated portfolio of around 40 global companies that it believes are trading at prices different to their intrinsic values.

PM Capital has been operating its global investment strategy via an unlisted fund since October 1998. This unlisted fund's performance adjusted to reflect PGF's fee structure has produced a total pre-tax return of 740% vs the MSCI World Net Total Return Index (AUD) of 209% to 31 January 2020.

Who manages the Company's portfolio?

The Portfolio Manager for the Fund and CIO is Paul Moore. Paul is supported by a team of experienced investment analysts.

Investment philosophy

PM Capital aims to build long term wealth together with our co-investors by finding

and exploiting investment anomalies around the world. Using a focused, patient and considered approach to finding simple investment ideas produces the best environment for creating that long term wealth.

Our experience has shown us that while the market is largely efficient, it can, and regularly does, misprice a small proportion of companies. Our unique process is based on scanning the world for those companies (hence the radar in our logo), discovering the associated valuation anomalies and extracting value from them. We buy good businesses at a good price; businesses that we believe are being valued differently to their long term intrinsic value, but will return to their correct value over time.

Why the PM Capital Global Opportunities Fund Limited?

Established: The Company's process has been shown to be effective, based on a philosophy developed by Paul Moore, over 34 years.

Unrestricted: We have an authentic investment process where our exposure to countries, industry sectors or market capitalisation is determined solely by our conviction in the risk/reward opportunities that we identify in individual stocks. No conviction at the stock level = no investment.

Opportunistic and focused: The Company's portfolio is not built around a general market benchmark or index - it is highly focused based on our fundamental, bottom-up investment process. The portfolio only holds those stocks that we believe give the best opportunity to produce strong long term returns.

Co-investment: The Manager has a significant investment in the Company - it invests with and for you.
