

ASX MARKET ANNOUNCEMENT

Native Title Agreement Paves Way for Iron Ore Development

KEY HIGHLIGHTS

- Significant milestone reached in the near term development of the Paulsens East Iron Ore Project with the approval of a Native Title Mining Agreement and State Deed with the Traditional Owners
- Strike will now lodge the State Deed with DMIRS and expects the grant of the Mining Lease imminently
- Strike will then submit its formal Mining Proposal to DMIRS for the issue of a Mining Permit for mine development and operations
- Strike notes that DMIRS has an internal target of processing Mining Proposals for the issue of Mining Permits within 30 business days

Strike Resources Limited (ASX:SRK) (**Strike**) is pleased to advise that a Native Title Mining Agreement (**Native Title Agreement**) and State Deed (**State Deed**) for Strike's Paulsens East Iron Ore Project (**Project**) have been approved by the Puutu Kunti Kurrama and Pinikura People (**PKKP**) and were executed by authorised PKKP representatives at a PKKP Community Authorisation Meeting held on Friday, 14 August 2020.

The PKKP are the Traditional Owners of the land where the Project is located in the Pilbara region of Western Australia.

The execution of the Native Title Agreement and State Deed by the PKKP Traditional Owners is a major milestone for Strike in the development of its Paulsens East Iron Ore Project, clearing the way for the Project to now advance.

The Native Title Agreement executed with the PKKP provides an agreed framework for Strike to undertake its mining activities at the Project in a way that minimises any impacts on Aboriginal Cultural Heritage. The agreement has a strong focus on protection of Aboriginal heritage and includes effective safeguards for the care and protection of the lands and rights of the PKKP peoples.

The Native Title Agreement also includes a package of financial and business development related benefits for the PKKP, including an annual payment based on the value of iron ore sales (of between 0.5% to 1%, subject to the price of iron ore sales achieved), an annual training and development allowance for PKKP members together with opportunities for PKKP members to contract for the provision of certain support operations related to the Project.

The State Deed will now be lodged with the Department of Mines, Industry Regulation and Safety (**DMIRS**) for execution by the Minister of Mines and Petroleum, after which Strike expects DMIRS to formally approve the grant of the Project's Mining Lease.

For personal use only

Once Strike has been notified by the DMIRS of the grant of the Mining Lease and ancillary Miscellaneous Licences (which are required for the Project haul road and other infrastructure, for which applications are also well advanced), Strike will formally submit a Mining Proposal to DMIRS for the issue of a Mining Permit for mine construction and mining operations.

Strike notes that DMIRS has a published internal target of processing Mining Proposals for the issue of Mining Permits within 30 business days.

Strike Managing Director. William Johnson:

"I would like to thank the PKKP and its representatives for their continued support. The execution of the Native Title Agreement and State Deed is a key milestone in the development of the Project and allows Strike to continue to fast track development of the Project to take maximum advantage of current high iron ore prices".
