Company Focus and Mission

Rafaella was established to explore and develop high-quality assets worldwide. In FY20 the Company's key focus was on fast-tracking its wholly-owned Santa Comba Project in Spain, targeting cash flows in 2021. Post FY20, the Company looked to expand its portfolio, entering into a conditional agreement to acquire a package of high-grade nickel-copper-PGM sulphide projects in Quebec, Canada.

PROJECTS

Santa Comba Project [Spain]

In July 2019, Rafaella announced the proposed acquisition of the Santa Comba Project, subject to due diligence and shareholder approval. The following month, the acquisition was approved and the Company conducted a placement to support the development of the project.

Located in a historically productive tungsten and tin province and close to deep-water ports, the Santa Comba Project is permitted for underground mining and partially permitted for open pit mining, with a pre-existing JORC (2012) Mineral Resource Estimate in both areas. The recently discovered large, near-surface resource on the property, amenable to open pit mining, remained mostly undrilled. The Project benefits from a 5-year offer of offtake from a leading global German-based consumer, H.C Stark Tungsten GmbH ('HC Stark'). Furthermore, the Company secured the strategic investment of Transamine Trading ('Transamine'), the world's oldest privately held commodity trader based out of Geneva. Transamine also agreed to provide logistical support and offtake for 100% of the tungsten and tin concentrate over a 3-year period, greatly assisting the Company in its early commissioning period. The tungsten offtake is to be structured as a back to back trade through to an end user, such as H.C. Stark. In May the relationship between Rafaella and Transamine was further strengthened when Transamine representative Royston Denysschen joined the Board.

Identified by the UK, Japan, the US and Europe as a critical raw material, tungsten is a specialty metal seeing renewed investment amongst investors. It has significant commercial, industrial and military applications and is seen as having significant demand and pricing upside.

Following the successful capital raising and formal completion of the acquisition, Rafaella moved swiftly to commence a feasibility study, appointing a Feasibility Study Manager and engaging Tomra Sorting GmbH to conduct ore sorting test-work and Grinding Solutions of the UK to undertake metallurgical test work.

In September 2019, Rafaella appointed Geonor Sondeos y Peforaciones, S.L. ('Geonor'), a local drilling contractor to conduct its diamond drilling programme. The Company then also engaged Sondeos y Peforaciones Industriales del Bierzo, S.A ('SPI'), another local contractor to complete a reverse circulation drilling programme. The purpose of the drilling campaign was to better define and upgrade the existing Inferred Resource, such that an updated resource model could be fed in to a mine plan as part of a feasibility study.

The drilling campaign concluded on 5 March, 2020 with 65 holes and 8,825m drilled. An updated Mineral Resource Estimate was released on 30 June, 2020 showing a 103% increase in near surface mineralisation to 10.4m tonnes of ore with 58% of the near surface resource classified as either Measured or Indicated. The underground Inferred Resource remains unchanged at 234kt. Total tungsten trioxide (WO₃) contained within the Resource now stands at 18,530t as well as 1,630t of tin (Sn).

The other key activity underway through FY20 has been the feasibility study for an open pit development at Santa Comba. The open pit will support the partial recommissioning of the underground operation that previously operated in the period 1980 to 1985 producing clean concentrate with 66% contained WO₃. Initial ore-sorting and metallurgical test work has been positive, and the Company is now in the final stages of completing the process flow sheet. Once the feasibility study is completed, the Company intends to release the findings to the market and raise development capital to fast track the Project construction and commissioning through to first sales in 2021.

McCleery Project [Canada]

The McCleery Project is located within the Yukon Territory, Canada. The Project is approximately 170km southeast of Whitehorse, the territorial capital of the Yukon. Teslin, the nearest town, with a population of 2,000 is approximately 40km southwest of the Project.

Rafaella undertook a number of activities in FY19 that culminated in the obtaining of final modelling results from a Versatile Time Domain Electromagnetic (VTEM) survey of the Project.

In May 2020, Rafaella announced that it was selected to receive government funding from the Yukon Mineral Exploration Program (YMEP) for exploration of McCleery of up to 60% of eligible expenses up to a maximum of \$40,000. This funding will be used to support a geochemical mapping programme scheduled for early FY21.

Sandstone Project [Australia]

Following a review of its portfolio, Rafaella announced in May 2020 that it had completed the sale of the Sandstone Project to private gold exploration company Westar Resources. The disposal has allowed the Company to focus its cash resources on fast-tracking the development of the Santa Comba Project and progressing its highly-prospective McCleery Project. The full consideration of Westar's acquisition of Sandstone was met through the issuance of 3,000,000 shares in Westar at the recent fundraising price of \$0.05 per share, giving the Company a 5% interest in Westar.

Environmental Regulation

The Company's projects are not subject to direct physical risk arising from climate factors. The Sandstone Project is still at an early exploration stage and was sold during the financial year. The McCleery Project is located in the north of Canada and hence is only accessible during a limited season. Global warming may make the site more accessible over time. The Santa Comba Project is not subject to any direct physical risk from climate factors such as flooding or excessive drought.

The Group is subject to and is compliant with all aspects of environmental regulation of its exploration and mining activities. The Directors are not aware of any environmental law that is not being complied with. The Santa Comba Project currently has a compliant environmental rehabilitation bond in place with the local authorities.

CORPORATE

A notice of a meeting was issued to shareholders on 10 July 2019 to approve the acquisition of Galicia Tin and Tungsten, S.L., the 100% owner of the Santa Comba tungsten and tin mine located in Galicia, northwest Spain as well as the proposed capital raise and Board changes. The shareholder meeting occurred on 9 August 2019, with all resolutions being passed. In August 2019, Rafaella successfully completed a capital raising of \$2.6m in connection with the acquisition of the Santa Comba project.

Following the completion of the acquisition, there were several changes to the Rafaella Board. Steven Turner joined the Board as Managing Director and Robert Wrixon as Executive Director. Graham Durtanovich resigned from the Board and Peter Hatfull, existing Non-Executive Director took the role of Non-Executive Chairman.

As part of the acquisition, the Company announced the following:

- The issue of 250,000 fully paid ordinary shares to Graham Durtanovich for his anniversary shares;
- The issue of 500,000 fully paid ordinary shares to Ashley Hood for his anniversary shares;
- The issue of 10,950,000 fully paid ordinary shares as part of the placement (announced on 27 May 2019);
- The issue of 13,125,000 fully paid ordinary shares as part consideration shares for the acquisition of Galicia Tin & Tungsten SL;
- The issue of 2,850,000 fully paid ordinary shares as a success fee;
- The grant of 2,925,000 unlisted \$0.20 options expiring 27 August 2022 as a success fee and in connection with the remuneration of Robert Wrixon and a contractor;
- The grant of 10,000,000 listed \$0.30 options expiring 31 October 2021 as advisory options;
- The issue of 2,900,000 milestone 1 performance rights to Steven Turner, Robert Wrixon and a contractor; and
- The issue of 2,900,000 milestone 2 performance rights to Steven Turner, Robert Wrixon and a contractor.

Rafaella held its Annual General Meeting on 29 November 2019. At the AGM all resolutions put to the meeting were passed unanimously by a show of hands. Details regarding the resolutions are provided in the ASX Announcement dated 29 November 2019.

In April 2020, Rafaella released an investor presentation outlining its progress at the Santa Comba Project. The new presentation was presented by Mr Turner at the 121 Mining Investment APAC Forum through a series of virtual meetings with prospective investors and again in May 2020 at the 121 Mining Investment EMEA Forum.

In May 2020, Rafaella further bolstered its leadership team via two new appointments. The first appointment was of Royston Denysschen, Director of Transamine's Australian operations. The second appointment was of Oscar Amigo García as Project Manager for the Santa Comba Project.

COVID-19 Impacts

Indirect financial risk has impacted the price of tungsten as the COVID-19 pandemic has led to the temporary closure of various automobile factories in Europe and has also seen a significant decline in the number of onshore oil rigs deployed in North America – both industries that are material end-users of tungsten. Tungsten has been identified as a critical element and a material that will see increased usage in the changing technically driven environment.

COVID-19 has had limited impact on the operations of the Company. Activities at the Santa Comba site were largely concluded by the time of the national lockdown in Spain. For the feasibility study the vast majority of work has been conducted as desk top studies and therefore has seen no adverse impact. Limited metallurgical test work being undertaken in the UK has seen limited disruption. Some personnel movements have been restricted delaying business development initiatives and the relocation of the Managing Director to Spain to oversee the ongoing development of the flagship Santa Comba project has also been delayed by 6 months. No other activities in the Company have been negatively impacted by the coronavirus pandemic.

Asset values, going concern and future funding of the business is not expected to be materially adversely affected by COVID 19. This has been evidenced by the successful private placement conducted by the Company post year-end.

SIGNIFICANT CHANGES IN THE STATE OF AFFAIRS

On 9 August 2019 shareholders approved the acquisition of Galicia Tin and Tungsten, S.L., the 100% owner of the Santa Comba tungsten and tin mine located in Galicia, northwest Spain, which was completed on 27 August 2019. The acquisition is transformational for Rafaella, moving the Company from an explorer of gold and copper to a developer of the permitted brownfield tungsten and tin Santa Comba mine.

LIKELY DEVELOPMENTS AND EXPECTED RESULTS OF OPERATIONS

Post year end the Company provisionally agreed the acquisition of the Canadian high grade Ni-Cu exploration assets from Meteoric Resources. The acquisition is subject to due diligence and all necessary shareholder and regulatory approvals.

The Feasibility Study for Santa Comba is well advanced with many of the technical studies complete. It is expected that the findings of the Feasibility Study will be released in early Q2 FY2021. Subject to the results of the Feasibility Study the Company intends to immediately seek development funding for the construction and commissioning the Santa Comba Project.

REMUNERATION REPORT

Introduction

The Directors present the Remuneration Report for the Group for the year ended 30 June 2020. This Remuneration Report forms part of the Directors' Report in accordance with the requirements of the Corporations Act 2001 and its regulations. For the purposes of this report, Key Management Personnel ("KMP") of the Group are defined as those persons having authority and responsibility for planning, directing and controlling the major activities of the Group, directly or indirectly, including any Director (whether executive or otherwise) of the Group.

Remuneration Policy

The remuneration policy of the Group has been designed to align KMP objectives with Shareholders' interests and business objectives by providing a fixed remuneration component and offering specific long-term incentives based on key performance areas affecting the Group's financial results. The Board believes that the remuneration policy is appropriate and effective in its ability to attract and retain the best KMP to run and manage the Group, as well as create goal congruence between Directors, Executives and Shareholders.

Executive Directors and Key Management Personnel

The Board's policy for determining the nature and amount of remuneration for Executive Directors and Key Management Personnel of the Group was in place for the year ended 30 June 2020.

There was no performance evaluation performed during the year due to the Group's infancy. The Board has agreed to conduct its first performance review in the next financial year, now that the GTT Acquisition has been in operation.

Non-Executive Directors

The Board's policy is to remunerate Non-Executive Directors based on market practices, duties and accountability. Independent external advice is sought when required. The fees paid to Non-Executive Directors will be reviewed annually. The maximum aggregate amount of fees that can be paid to Non-Executive Directors is subject to approval by Shareholders at the Annual General Meeting ("AGM"). The maximum aggregate amount of fees payable has been set at \$250,000pa.

Use of Remuneration Consultants

To ensure the Remuneration Committee (of which the function is performed by the Board as a whole at this stage) is fully informed when making remuneration decisions, it may seek external remuneration advice. The Board did not engage external remuneration advice in 2020.

Remuneration Report Approval at FY2020 AGM

The remuneration report for the year ended 30 June 2020 will be put to shareholders for approval at the Group's AGM which will be held during November 2020.

EVENTS SUBSEQUENT TO REPORTING DATE

There are no matters or circumstances have arisen since the end of the year which will significantly affect, or may significantly affect, the state of affairs or operations of the reporting entity in future financial years other than the following:

- On July 1 2020, the Company announced a substantial increase in total mineral resources and the estimation of maiden measured and indicated resources at the Santa Comba Project. The resource update significantly increases the Company's confidence in the Project and underpins the development of the mine plan and feasibility study. The increase in tonnes also allows Rafaella to evaluate enhanced production scenarios.
- The following month, the Company announced that it has entered into a conditional agreement to acquire 100% of the Midrim and Laforce nickel-copper sulphide projects from Meteoric Resources NL (ASX: MEI). The projects are in the highly prospective Belleterre-Angliers Greenstone Belt located in the Province of Quebec, Canada. They are located close to Chase Mining Corporation's (ASX: CML) Alotta Project, which announced massive sulphides and high-grade nickel and copper intersections from its recently completed drilling programme on 29 June 2020. The acquisition is subject to due diligence as well as regulatory and shareholder approvals. It supports the Company's strategic focus on developing near term, low cost base metal operations.
- The Company also completed a placement to raise approximately \$1.2m to provide funds to progress further feasibility work at the flagship Santa Comba Project which it is continuing to advance in FY21.

INDEMNITY AND INSURANCE OF OFFICERS

The Company has indemnified the Directors and officers of the Company for costs incurred, in their capacity as a Director or officer, for which they may be held personally liable, except where there is a lack of good faith. During the financial year, the Company paid a premium in respect of a contract to insure the Directors and officers of the Company against a liability to the extent permitted by the Corporations Act 2001. The contract of insurance prohibits disclosure of the nature of the liability and the amount of the premium.

INDEMNITY AND INSURANCE OF AUDITOR

The Group has not, during or since the end of the financial year, indemnified or agreed to indemnify the auditor of the Group or any related entity against a liability incurred by the auditor. During the financial year, the Group has not paid a premium in respect of a contract to insure the auditor of the Group or any related entity.

PROCEEDINGS ON BEHALF OF THE COMPANY

No person has applied to the Court under section 237 of the Corporations Act 2001 for leave to bring proceedings on behalf of the Company, or to intervene in any proceedings to which the Group is a party for the purpose of taking responsibility on behalf of the Company for all or part of those proceedings.

NON-AUDIT SERVICES

Details of the amounts paid or payable to the auditor for non-audit services provided during the financial year by the auditor are outlined in Note 5 to the financial statements. The Directors are satisfied that the provision of non-audit services during the financial year, by the auditor (or by another person or firm on the auditor's behalf), is compatible with the general standard of independence for auditors imposed by the Corporations Act 2001. The Directors are of the opinion that the services as disclosed in Note 5 to the financial statements do not compromise the external auditor's independence requirements of the Corporations Act 2001 for the following reasons:

- All non-audit services have been reviewed and approved to ensure that they do not impact the integrity and objectivity of the auditor; and
- None of the services undermine the general principles relating to auditor independence as set out in APES 110 Code of Ethics for Professional Accountants issued by the Accounting Professional and Ethical Standards Board, including reviewing or auditing the auditor's own work, acting in a management or decision-making capacity for the Group, acting as advocates for the Group or jointly sharing economic risks and rewards.

OFFICERS OF THE COMPANY WHO ARE FORMER PARTNERS OF RSM AUSTRALIA PARTNERS

There are no officers of the company who are former partners of RSM Australia Partners.

AUDITOR'S DECLARATION OF INDEPENDENCE

The auditor's independence declaration for the year ended 30 June 2020 has been received and is included within the financial statements.

AUDITOR

RSM continues in office in accordance with section 327 of the Corporations Act 2001.

This report is made in accordance with a resolution of Directors, pursuant to section 298(2)(a) of the Corporation Act 2001. Signed in accordance on behalf of the Directors.

Peter Hatfull
Non-Executive Chairman

24 September 2020

The Board of Directors is responsible for the corporate governance of Rafaella Resources Limited (the Group). The Board of Directors have established a corporate governance framework which follows the recommendations as set out in the ASX Corporate Governance Council's Principles and Recommendations 3rd edition ("Principles and Recommendations"). The Group has followed each recommendation where the Board has considered the recommendation to be appropriate benchmark for the Group's corporate governance practices. Where the Group's corporate governance practices follow a recommendation, the Board has made appropriate statements reporting on the adoption of the recommendation. In compliance with the "if not, why not" reporting regime, where the Group's corporate governance practices do not follow a recommendation, the Board explained its reasons for not following the recommendation and disclosed what, if any, alternative practices the Group has adopted instead of those in the recommendation. The Group's corporate governance framework can be viewed on the Group's website: www.rafaellaresources.com.au

Recommendation 1.5

The respective proportions of men and women on the Board, in senior executive positions (including key management personnel) and across the whole organisation:

Details: 2020	Percentage	Number
Board		
Men	100%	5
Women	-%	-
Senior Executive Positions		
Men	67%	2
Women	33%	1
Entire Organisation		
Men	77%	10
Women	23%	3

The Group recognises and respects the value of diversity at all levels of the organisation. The Group recognises that the mining and exploration industry is intrinsically male dominated in many of the operational sectors and the pool of women with appropriate skills will be limited in some instances. The Group recognises that diversity extends to matters of age, disability, ethnicity, marital/family status, religious/cultural background and sexual orientation. Where possible, the Group will seek to identify suitable candidates for positions from a diverse pool.

Recommendation 2.2

The Group has reviewed the skill set of its Board to determine where the skills lie and any relevant gaps in skills shortages. The Group is working towards filling these gaps through engagement of professional advisors where it is deemed necessary.

Recommendation 7.4

The Group has assessed its exposure to economic, environmental and social sustainability risks and has addressed them in the second replacement prospectus dated 1 June 2018 and these remain the same for the current financial year.

AUDITOR'S INDEPENDENCE DECLARATION

As lead auditor for the audit of the financial report of Rafaella Resources Limited for the year ended 30 June 2020, I declare that, to the best of my knowledge and belief, there have been no contraventions of:

- (i) the auditor independence requirements of the *Corporations Act 2001* in relation to the audit; and
- (ii) any applicable code of professional conduct in relation to the audit.

1. Corporate information

This annual report covers Rafaella Resources Limited (parent entity) and subsidiaries (the “Group”), a company incorporated in Australia for the year ended 30 June 2020. The presentation currency of the Group is Australian Dollars (“\$”). A description of the Group’s operations is included in the review and results of operations in the Directors’ Report. The Directors’ Report is not part of the financial statements. The Group is a for-profit entity and limited by shares incorporated in Australia whose shares are traded under the ASX code “RFR”. The financial statements were authorised for issue on 24 September 2020 by the Directors. The Directors have the power to amend and reissue the financial statements. The principal accounting policies adopted in the preparation of the financial statements are set out below.

2. Accounting policies**a. Basis of preparation**

The general purpose financial statements of the Group have been prepared in accordance with the requirements of the *Corporations Act 2001*, Australian Accounting Standards and other authoritative pronouncements of the Australian Accounting Standards Board. Compliance with Australian Accounting Standards results in full compliance with the International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (IASB). The financial report has also been prepared on a historical cost base. It is recommended that the annual financial report be considered together with any public announcements made by the Group up to the issue date of this report, which the Group has made in accordance with its continuous disclosure obligations arising under the *Corporations Act 2001*. The financial statements have been prepared on an accruals basis and is based on historical costs, modified where applicable, by the measurement at fair value of financial assets and financial liabilities.

b. Principles of consolidation

The consolidated financial statements incorporate the assets and liabilities of all subsidiaries of Rafaella Resources Limited (Company or parent entity) as at 30 June 2020 and the results of all subsidiaries for the year then ended. Rafaella Resources Limited and its subsidiaries together are referred to in these financial statements as the Group. Subsidiaries are all those entities over which the Group has control. The Group controls an entity when the Group is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power to direct the activities of the entity. Subsidiaries are fully consolidated from the date on which control is transferred to the Group. They are de-consolidated from the date that control ceases. Intercompany transactions, balances and unrealised gains on transactions between entities in the Group are eliminated. Unrealised losses are also eliminated unless the transaction provides evidence of the impairment of the asset transferred. Accounting policies of subsidiaries have been changed where necessary to ensure consistency with the policies adopted by the Group. The acquisition of subsidiaries is accounted for using the acquisition method of accounting. A change in ownership interest, without the loss of control, is accounted for as an equity transaction, where the difference between the consideration transferred and the book value of the share of the non-controlling interest acquired is recognised directly in equity attributable to the parent.

2. Accounting policies (continued)

Non-controlling interest in the results and equity of subsidiaries are shown separately in the statement of profit or loss and other comprehensive income, statement of financial position and statement of changes in equity of the Group. Losses incurred by the Group are attributed to the non-controlling interest in full, even if that results in a deficit balance. Where the Group loses control over a subsidiary, it derecognises the assets including goodwill, liabilities and non-controlling interest in the subsidiary together with any cumulative translation differences recognised in equity. The Group recognises the fair value of the consideration received and the fair value of any investment retained together with any gain or loss in profit or loss.

c. Current and non-current classification

Assets and liabilities are presented in the statement of financial position based on current and non-current classification. An asset is classified as current when: it is either expected to be realised or intended to be sold or consumed in normal operating cycle; it is held primarily for the purpose of trading; it is expected to be realised within 12 months after the reporting period; or the asset is cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least 12 months after the reporting period. All other assets are classified as non-current. A liability is classified as current when: it is either expected to be settled in normal operating cycle; it is held primarily for the purpose of trading; it is due to be settled within 12 months after the reporting period; or there is no unconditional right to defer the settlement of the liability for at least 12 months after the reporting period. All other liabilities are classified as non-current. Deferred tax assets and liabilities are always classified as non-current.

d. Comparatives

When required by Accounting Standards, comparative figures have been adjusted to conform to changes in presentation for the current financial year.

e. Provisions

Provision is made for the Group's liability for employee benefits arising from services rendered by employees to the end of the reporting period. Employee benefits that are expected to be wholly settled within one year have been measured at the amounts expected to be paid when the liability is settled. Employee benefits expected to be settled more than one year after the end of the reporting period have been measured at the present value of the estimated future cash outflows to be made for those benefits.

f. Significant management judgement in applying accounting policies and estimate uncertainty

When preparing the financial statements, management undertakes a number of judgements, estimates and assumptions about recognition and measurement of assets, liabilities, income and expenses. The actual results may differ from the judgements, estimates and assumptions made by management, and will seldom equal the estimated results. Information about significant judgements, estimates and assumptions that have the most significant effect on recognition and measurement of assets, liabilities, income and expense is provided below.

2. Accounting policies (continued)

i. Exploration and evaluation expenditure

Exploration and evaluation costs have been capitalised and are only carried forward to the extent that they are expected to be recouped through the successful development of the area or where activities in the area have not yet reached a stage that permits reasonable assessment of the existence of economically recoverable reserves. Key judgements are applied in considering the costs to be capitalised which includes determining expenditures directly related to these activities and allocating overheads between those that are expensed and capitalised.

ii. Share based payment transactions

The Company measures the cost of equity-settled transactions with employees by reference to the fair value of the equity instruments at the date at which they are granted. The fair value of the options issued are determined by using the Black-Scholes model taking into account the terms and conditions upon which the instruments were granted. The accounting estimates and assumptions relating to equity-settled share-based payments would have no impact on the carrying amounts of assets and liabilities within the next annual reporting period but may impact profit or loss and equity.

f. New or amended Accounting Standards and Interpretations adopted

In the year ended 30 June 2020, the Group has reviewed all of the new and revised Accounting Standards and Interpretations issued by the Australian Accounting Standards Board that are relevant to its operations and effective for the current annual reporting year. It has been determined by the Group that there is no impact, material or otherwise, of the new and revised Standards and Interpretations on its business and, therefore, no change is necessary to the Group accounting policies.

g. New accounting standards and interpretations

Reference	Title	Application date of standard
AASB 16	<p>Leases</p> <p>This standard is applicable to annual reporting periods beginning on or after 1 January 2019. The standard replaces AASB 117 'Leases' and for lessees will eliminate the classifications of operating leases and finance leases. Subject to exceptions, a 'right-of-use' asset will be capitalised in the statement of financial position, measured as the present value of the unavoidable future lease payments to be made over the lease term. The exceptions relate to short-term leases of 12 months or less and leases of low-value assets (such as personal computers and small office furniture) where an accounting policy choice exists whereby either a 'right-of-use' asset is recognised or lease payments are expensed to profit or loss as incurred. A liability corresponding to the capitalised lease will also be recognised, adjusted for lease prepayments, lease incentives received, initial direct costs incurred and an estimate of any future restoration, removal or dismantling costs. Straight-line operating lease expense recognition will be replaced with a depreciation charge for the leased asset (included in operating costs) and an interest expense on the recognised lease liability (included in finance costs). In the earlier periods of the lease, the expenses associated with the lease under AASB 16 will be higher when compared to lease expenses under AASB 117. However EBITDA (Earnings Before Interest, Tax, Depreciation and Amortisation) results will be improved as the operating expense is replaced by interest expense and depreciation in profit or loss under AASB 16. For classification within the statement of cash flows, the lease payments will be separated into both a principal (financing activities) and interest (either operating or financing activities) component. For lessor accounting, the standard does not substantially change how a lessor accounts for leases. The Group has adopted this standard from 1 July 2019 or whenever it enters into a lease. There has been no impact on the adoption of the standard as the Group does not have any leases.</p>	1 January 2019

h. New accounting standards and interpretations not yet mandatory or early adopted

Australian Accounting Standards and Interpretations that have recently been issued or amended but are not yet mandatory, have not been early adopted by the Group for the annual reporting period ended 30 June 2020. The Group's assessment of the impact of these new or amended Accounting Standards and Interpretations, most relevant to the Group, are set out below.

Conceptual Framework for Financial Reporting (Conceptual Framework)

The revised Conceptual Framework is applicable to annual reporting periods beginning on or after 1 January 2020 and early adoption is permitted. The Conceptual Framework contains new definition and recognition criteria as well as new guidance on measurement that affects several Accounting Standards. Where the Group has relied on the existing framework in determining its accounting policies for transactions, events or conditions that are not otherwise dealt with under the Australian Accounting Standards, the Group may need to review such policies under the revised framework. At this time, the application of the Conceptual Framework is not expected to have a material impact on the Group's financial statements.

Interest revenue

Interest revenue is recognised as interest accrues using the effective interest method. This is a method of calculating the amortised cost of a financial asset and allocating the interest income over the relevant period using the effective interest rate, which is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to the net carrying amount of the financial asset.

Government grants

Government grants are recognised as and when they accrue.

4. Income tax benefit/(expense)

A reconciliation between the income tax expense and the product of accounting profit before income tax multiplied by the Group's applicable income tax rate is as follows:

Income tax

Current income tax assets and liabilities for the current and prior years are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted by the reporting date. Deferred income tax is provided on all temporary differences at the reporting date between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes. Deferred income tax assets and liabilities are recognised for all taxable temporary differences:

- Except for the deferred income tax liability arises from the initial recognition of an asset or liability in a transaction that is not a business combination and at the time of the transaction affects neither the accounting profit nor taxable profit or loss; and
- In respect of taxable temporary differences associated with investments in subsidiaries, associates and interests in joint ventures except where the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future.

The carrying amount of deferred income tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred income tax asset to be utilised. Unrecognised deferred income tax assets are reassessed at each reporting date and are recognised to the extent that it has become probable that future taxable profit will allow the deferred income tax to be recovered. Deferred income tax assets and liabilities are measured at the tax rates that are expected to apply to the year when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date. Income taxes relating to items recognised directly in equity are recognised in equity and not in profit or loss. Deferred tax assets and deferred tax liabilities are offset only if a legally enforceable right exists to set off current tax assets against current tax liabilities and the deferred tax assets and liabilities relate to the same taxable entity and the same taxation authority.

4. Income tax benefit/(expense) (continued)

Goods and services and sales tax

Revenues, expenses and assets are recognised net of the amount of Goods and Services Tax (GST) except:

- Where the amount of GST incurred is not recoverable from the taxation authority, it is recognised as part of the cost of the asset or as part of an item of expense; or
- For receivables and payables which are recognised inclusive of GST.

The net amount of GST recoverable from, or payable to, the taxation authority is included as part of receivables or payables.

6. Loss per share (continued)

Accounting policy

Basic earnings per share is calculated as net profit attributable to members of the parent, adjusted to exclude any costs of servicing equity (other than dividends), dividend by the weighted average number of ordinary shares, adjusted for any bonus element. The diluted earnings per share is calculated as net profit or loss attributable to members of the parent dividend by the weighted average number of ordinary shares and dilutive potential ordinary shares, adjusted for any bonus element. The weighted average number of shares was based on the consolidated weighted average number of shares in the reporting year. The net profit or loss attributable to members of the parent is adjusted for:

- ⦿ Costs of servicing equity (other than dividends) and preference share dividends;
- ⦿ The after-tax effect if dividends and interest associated with dilutive potential ordinary shares that have been recognised as expenses; and
- ⦿ Other non-discretionary changes in revenue or expenses during the year that would result from the dilution of potential ordinary shares.

Receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. After initial measurement, such financial assets are subsequently measured at amortised cost using the effective interest rate method, less any impairment losses. This category generally applies to trade and other receivables. Trade and other receivables are generally due for settlement within no more than 30 days from the date of recognition. Due to their current nature, the carrying amount of trade and other receivables approximates fair value. There is no allowance for expected credit losses recognised for the year ended 30 June 2020 (2019: Nil).

Plant and equipment is stated at historical cost less accumulated depreciation and impairment. Historical cost includes expenditure that is directly attributable to the acquisition of the items. Depreciation is calculated on a straight-line basis to write off the net cost of each item of property, plant and equipment (excluding land) over their expected useful lives, being 2.5 years. The residual values, useful lives and depreciation methods are reviewed, and adjusted if appropriate, at each reporting date. An item of plant and equipment is derecognised upon disposal or when there is no future economic benefit to the consolidated entity. Gains and losses between the carrying amount and the disposal proceeds are taken to profit or loss.

Ordinary shares

Ordinary shares have no par value and have the right to receive dividends as declared and, in the event of the winding up of the Group, to participate in proceeds from the sale of all surplus assets in proportion to the number of and amounts paid up on the shares held. Ordinary shares entitle their holder to one vote, either in person or by proxy, at a meeting of the Group. Share capital represents the nominal value of shares that have been issued. Any transaction costs associated with the issuing of shares are deducted from share capital, net of any related income tax benefits.

Capital management

Management controlled the capital of the Group in order to maintain a capital structure that ensured the lowest cost of capital available to the Group. Management's objective is to safeguard its ability to continue as a going concern, so that it can provide returns for shareholders and benefits for other stakeholders and to maintain an optimum capital structure to reduce the cost of capital. Capital is regarded as total equity, as recognised in the statement of financial position, plus net debt. The Group would look to raise capital when an opportunity to invest in a business or company was seen as value adding relative to the current Company's share price at the time of the investment.

Accounting policy

Each entity within the Group determines the appropriate functional currency as it reflects the primary economic environment in which the relevant reporting entity operates, being Australian dollars. In translating the financial statements of such an entity for incorporation in the combined financial statements in the presentation currency the assets and liabilities denominated in other currencies are translated at end of the reporting year rates of exchange and income and expense items for each statement presenting profit or loss and other comprehensive income are translated at average rates of exchange for the reporting year. The resulting translation adjustments (if any) are recognised in other comprehensive income and accumulated in a separate component of equity until the disposal of that relevant reporting entity.

15. Operating segments

The Group has determined operating segments based on the information provided to the Board of Directors. The Group operates predominantly in one business segment being the exploration for minerals in three geographic segments, being Australia, Canada and Spain.

There are no matters or circumstances have arisen since the end of the year which will significantly affect, or may significantly affect, the state of affairs or operations of the reporting entity in future financial years other than the following:

- On July 1 2020, the Company announced a substantial increase in total mineral resources and the estimation of maiden measured and indicated resources at the Santa Comba Project. The resource update significantly increases the Company's confidence in the Project and underpins the development of the mine plan and feasibility study. The increase in tonnes also allows Rafaella to evaluate enhanced production scenarios.
- The following month, the Company announced that it has entered into a conditional agreement to acquire 100% of the Midrim and Laforce nickel-copper sulphide projects from Meteoric Resources NL (ASX: MEI). The projects are in the highly prospective Belleterre-Angliers Greenstone Belt located in the Province of Quebec, Canada. They are located close to Chase Mining Corporation's (ASX: CML) Alotta Project, which announced massive sulphides and high-grade nickel and copper intersections from its recently completed drilling programme on 29 June 2020. The acquisition is subject to due diligence as well as regulatory and shareholder approvals. It supports the Company's strategic focus on developing near term, low cost base metal operations.
- The Company also completed a placement to raise approximately \$1.2m to provide funds to progress further feasibility work at the flagship Santa Comba Project which it is continuing to advance in FY21.

No loans have been made to any Director or any of their related parties, during the reporting year.

19. Financial risk management

The Group's overall financial risk management strategy is to ensure that the Group is able to fund its business operations and expansion plans. Exposure to credit risk, liquidity risk, foreign currency risk, interest rate risk and commodity price risk arises in the normal course of the Group's business. The Group's risk management strategy is set by and performed in the close co-operation with the Board and focuses on actively securing the Group's short to medium-term cash flows by regular review of its working capital and minimising the exposure to financial markets. The Group does not actively engage in the trading of financial assets for speculative purposes nor does it write options. The most significant financial risks to which the Group is exposed are described below.

Financial assets and liabilities

The financial assets and liabilities as at 30 June 2020 are reflected at cost, fair valued through the statement of comprehensive income. The Directors consider that the carrying amounts of the financial assets and liabilities approximate their fair values.

Specific financial risk exposures and management

The main risks the Group is exposed to through its financial instruments are credit risk, liquidity risk and market risk, including in interest rates, foreign currency, commodity and equity prices.

a) Credit risk

Credit risk arises from the financial assets of the Group, which comprise cash and cash equivalents. Exposure to credit risk relating to financial assets arises from the potential non-performance by counterparties of contractual obligations that could lead to a financial loss to the Group. Credit risk is managed through the maintenance of credit assessment and monitoring procedures.

b) Liquidity risk

Liquidity risk is the risk that there will be inadequate funds available to meet financial commitments as they fall due. The Group recognises the on-going requirements to have committed funds in place to cover both existing business cash flows and provide reasonable headroom for capital expenditure programs.

The key funding objective is to ensure the availability of flexible and competitively priced funding from alternative sources to meet the Group's current and future requirements. The Group utilises a detailed cash flow model to manage its liquidity risk. This analysis shows that available sources of funds are expected to be sufficient over the lookout period. The Group attempts to accurately project the sources and uses of funds which provide an effective framework for decision making and budgeting. The table below summarises the maturity profile of the Group's contractual cash flow financial liabilities based on contractual undiscounted repayment obligations. Repayments, which are subject to notice, are treated as if notice were to be given immediately.

19. Financial risk management (continued)

c) Foreign currency risk

The following table illustrates the estimated sensitivity to a 1% increase and decrease to exchange rate movements:

Impact on pre-tax profit/(loss)	\$
30 June 2020	
AUD to EUR rate + 10%	8,547
AUD to EUR rate – 10%	(8,547)

AUD to CAD rate – 10%	(12)
30 June 2019	
AUD to CAD rate + 10%	921
AUD to CAD rate – 10%	(921)

d) Interest Rate Risk

Interest rate risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market interest rate. The Group is not exposed to interest rate movement through borrowings as there are no borrowings. The following table sets out the variable interest bearing and fixed interest bearing financial instruments of the Group:

Accounting policy

Recognition and derecognition of financial instruments:

A financial asset or a financial liability is recognised in the statement of financial position when, and only when, the entity becomes party to the contractual provisions of the instrument. All other financial instruments (including regular-way purchases and sales of financial assets) are recognised and derecognised, as applicable, using trade date accounting or settlement date accounting. A financial asset is derecognised when the contractual rights to the cash flows from the financial asset expire or it transfers the rights to receive the contractual cash flows in a transaction in which substantially all of the risks and rewards of ownership of the financial asset are transferred or in which the entity neither transfers nor retains substantially all of the risks and rewards of ownership and it does not retain control of the financial asset. A financial liability is removed from the statement of financial position when, and only when, it is extinguished, that is, when the obligation specified in the contract is discharged or cancelled or expires.

At initial recognition the financial asset or financial liability is measured at its fair value plus or minus, in the case of a financial asset or financial liability not at fair value through profit or loss, transaction costs that are directly attributable to the acquisition or issue of the financial asset or financial liability.

Classification and measurement of financial assets:

Financial asset classified as measured at amortised cost: A financial asset is measured at amortised cost if it meets both of the following conditions and is not designated as at fair value through profit or loss (FVTPL), that is (a) the asset is held within a business model whose objective is to hold assets to collect contractual cash flows; and (b) the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding. Typically trade and other receivables, bank and cash balances are classified in this category. Financial asset that is a debt asset instrument classified as measured at fair value through other comprehensive income (FVTOCI): There were no financial assets classified in this category at reporting year end date. Financial asset that is an equity investment classified as measured at fair value through other comprehensive income (FVTOCI): There was one financial assets classified in this category at reporting year end date. Financial asset classified as measured at fair value through profit or loss (FVTPL): There were no financial assets classified in this category at reporting year end date.

Classification and measurement of financial liabilities:

Financial liabilities are classified as at fair value through profit or loss (FVTPL) in either of the following circumstances: (1) the liabilities are managed, evaluated and reported internally on a fair value basis; or (2) the designation eliminates or significantly reduces an accounting mismatch that would otherwise arise. All other financial liabilities are carried at amortised cost using the effective interest method. Reclassification of any financial liability is not permitted.

b. Contingent assets

There are no contingent assets as at 30 June 2020.

c. Contingent liabilities

Contingent liabilities as at 30 June 2020 consist of the issue of 250,000 fully paid ordinary shares each in the Company to the Directors, Peter Hatfull and Ashley Hood, on each anniversary of the director's commencement date during which the Director remains employed under their Executive Services Agreement.

21. Acquisition of controlled entities – business combination

On 27 August 2019, Rafaella Resources Limited acquired the rights to operate the underlying business of Galicia Tin & Tungsten SL (“GTT”) for a consideration of 17,500,000 in shares with a contingent consideration of 30,000,000 in share payable upon achieving certain milestones. Details of the acquisition are as follows:

	Fair value
	\$
Cash and cash equivalents	221,493
Other assets	8,020
Plant and equipment	93,156
Exploration and evaluation asset	7,140,699
Trade and other payables	(65,619)
Loans	<u>(82,749)</u>
Acquisition-date fair value of the total consideration transferred	<u>7,315,000</u>
Representing:	
Shares paid or payable to vendor	<u>7,315,000</u>
Total consideration transferred	<u>7,315,000</u>

The fair value of GTT’s assets and liabilities have been measured provisionally. If new information obtained within one year of the date of acquisition about facts and circumstances that existed at the date of acquisition identifies adjustments to the amounts above, the accounting for the acquisition will be revised. The contingent consideration relating to the acquisition is as follows:

- 15,000,000 ordinary shares on the Company announcing a JORC compliant resource at any of the tenements in relation to the GTT Project (Milestone 1); and
- 15,000,000 ordinary shares on the completion of a pre-feasibility study for the development of the GTT Project, and the grant of a loan or any other project financing package that allows the Project to progress to construction (Milestone 2).

21. Acquisition of controlled entities – business combination (continued)

Accounting policy

The acquisition method of accounting is used to account for business combinations regardless of whether equity instruments or other assets are acquired. The consideration transferred is the sum of the acquisition-date fair values of the assets transferred, equity instruments issued or liabilities incurred by the acquirer to former owners of the acquiree and the amount of any non-controlling interest in the acquiree. For each business combination, the non-controlling interest in the acquiree is measured at either fair value or at the proportionate share of the acquiree's identifiable net assets. All acquisition costs are expensed as incurred to profit or loss. On the acquisition of a business, the Group assesses the financial assets acquired and liabilities assumed for appropriate classification and designation in accordance with the contractual terms, economic conditions, the Group's operating or accounting policies and other pertinent conditions in existence at the acquisition-date. Where the business combination is achieved in stages, the Group remeasures its previously held equity interest in the acquiree at the acquisition-date fair value and the difference between the fair value and the previous carrying amount is recognised in profit or loss. Contingent consideration to be transferred by the acquirer is recognised at the acquisition-date fair value. Subsequent changes in the fair value of the contingent consideration classified as an asset or liability is recognised in profit or loss. Contingent consideration classified as equity is not remeasured and its subsequent settlement is accounted for within equity. The difference between the acquisition-date fair value of assets acquired, liabilities assumed and any non-controlling interest in the acquiree and the fair value of the consideration transferred and the fair value of any pre-existing investment in the acquiree is recognised as goodwill.

If the consideration transferred and the pre-existing fair value is less than the fair value of the identifiable net assets acquired, being a bargain purchase to the acquirer, the difference is recognised as a gain directly in profit or loss by the acquirer on the acquisition-date, but only after a reassessment of the identification and measurement of the net assets acquired, the non-controlling interest in the acquiree, if any, the consideration transferred and the acquirer's previously held equity interest in the acquirer. Business combinations are initially accounted for on a provisional basis. The acquirer retrospectively adjusts the provisional amounts recognised and also recognises additional assets or liabilities during the measurement period, based on new information obtained about the facts and circumstances that existed at the acquisition-date. The measurement period ends on either the earlier of (i) 12 months from the date of the acquisition or (ii) when the acquirer receives all the information possible to determine fair value.

**INDEPENDENT AUDITOR'S REPORT
TO THE MEMBERS OF
RAFAELLA RESOURCES LIMITED**

Opinion

We have audited the financial report of Rafaella Resources Limited (the Company) and its subsidiaries (the Group), which comprises the consolidated statement of financial position as at 30 June 2020, the consolidated statement of profit or loss and other comprehensive income, the consolidated statement of changes in equity and the consolidated statement of cash flows for the year then ended, and notes to the financial statements, including a summary of significant accounting policies, and the directors' declaration.

In our opinion, the accompanying financial report of the Group is in accordance with the Corporations Act 2001, including:

- (i) Giving a true and fair view of the Group's financial position as at 30 June 2020 and of its financial performance for the year then ended; and
- (ii) Complying with Australian Accounting Standards and the Corporations Regulations 2001.

Basis for Opinion

We conducted our audit in accordance with Australian Auditing Standards. Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Report* section of our report. We are independent of the Group in accordance with the auditor independence requirements of the Corporations Act 2001 and the ethical requirements of the Accounting Professional and Ethical Standards Board's APES 110 Code of Ethics for Professional Accountants (the Code) that are relevant to our audit of the financial report in Australia. We have also fulfilled our other ethical responsibilities in accordance with the Code.

We confirm that the independence declaration required by the Corporations Act 2001, which has been given to the directors of the Company, would be in the same terms if given to the directors as at the time of this auditor's report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other Information

The directors are responsible for the other information. The other information comprises the information included in the Group's annual report for the year ended 30 June 2020 but does not include the financial report and the auditor's report thereon.

Our opinion on the financial report does not cover the other information and accordingly we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial report, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial report or our knowledge obtained in the audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the Directors for the Financial Report

The directors of the Company are responsible for the preparation of the financial report that gives a true and fair view in accordance with Australian Accounting Standards and the Corporations Act 2001 and for such internal control as the directors determine is necessary to enable the preparation of the financial report that gives a true and fair view and is free from material misstatement, whether due to fraud or error.

In preparing the financial report, the directors are responsible for assessing the ability of the Group to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the Group or to cease operations, or have no realistic alternative but to do so.

Auditor's Responsibilities for the Audit of the Financial Report

Our objectives are to obtain reasonable assurance about whether the financial report as a whole is free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Australian Auditing Standards will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of this financial report.

A further description of our responsibilities for the audit of the financial report is located at the Auditing and Assurance Standards Board website at: https://www.auasb.gov.au/auditors_responsibilities/ar2.pdf. This description forms part of our auditor's report.
