

# The Fastest International Access to Australia's Financial Markets Community

## CONNECTING THE WORLD WITH THE AUSTRALIAN FINANCIAL MARKETS COMMUNITY

Increasingly, financial opportunity is found, not just in one or two key markets, but across the globe. Reaching them requires the right connections. That's where ASX Net Global can deliver. Giving your business unparalleled access to the dynamic and fast-paced Australian financial markets community, ASX Net Global allows you to leverage the opportunities and connections that are unique to this market.

**ASX NET GLOBAL IS THE SEAMLESS WAY TO CONNECT YOUR BUSINESS TO THE DYNAMIC AUSTRALIAN FINANCIAL MARKETS COMMUNITY**

---

# THE SEAMLESS WAY TO CONNECT

ASX Net Global is a low latency, fully managed network solution which takes you straight to the heart of ASX's financial markets data centre, the Australian Liquidity Centre (ALC). With Points of Presence (PoP) in North America, Europe, and Asia, ASX Net Global is specifically designed to give the world's biggest financial markets deep access to the Australian financial trading and data community.

It connects you to more than just ASX's trading, clearing, settlement and market data services. It can also connect you to Australian-based investment banks, brokerage firms, data vendors and application service providers. Fast, secure and robust, ASX Net Global makes connecting 'Down Under' a simple and cost effective solution.

## DESIGNED FOR FINANCIAL MARKETS

ASX understands what financial markets participants need for success, which is why we designed ASX Net Global – a bespoke, fully managed, low latency private network solely for financial businesses. Use it to your advantage. Whether trading our futures market or accessing ASX market data, ASX Net Global is the optimal pathway to ASX products and services. And by using our dedicated bandwidth solutions to connect your cabinets or ALC partners, you can open the door to deeper connections with the Australian financial community.

## TAILORED SOLUTIONS

ASX Net Global offers multiple international PoPs. If you require extra bandwidth, additional connections (at our PoPs) or bespoke solutions, it can be arranged. And because ASX Net Global is a resilient and robust private network with inbuilt redundancy paths, it's capable of operating as either a primary or secondary network.

## A SECURE SERVICE

With the high volume and value of trades occurring on ASX, security is vital to our performance. The network is managed and monitored 24/7, with critical safeguards built-in to ensure connectivity remains at superior levels.

## COST EFFECTIVE

The beauty of ASX Net Global lies in its holistic approach. As a full end-to-end solution, it delivers more than fast, secure connections to ASX markets. It also offers multiple and deeper connections both within and outside the ALC – without the need to deal with numerous third party operators.

## THE ASX NET GLOBAL ADVANTAGE:

- Resilient, low latency and fully managed network solution providing connectivity to the Australian financial markets community.
- Dedicated bandwidth solutions to connect to your own, or your partner's infrastructure at the ALC, from 2meg to more than 100meg.
- Full end-to-end solution including the availability of cross connects at PoPs and the ALC.

**There's no better way to connect to the heart of Australia's financial markets community. Connect with ASX Net Global.**
