As in the past the Exchange is proposing to adjust Fletcher Challenge Forests share option contracts using the standard adjustment formulas (normally used for rights issues). The formula will result in the contract size of shares being increased and the strike price decreased as discussed below:

## 1. Adjustment to contract size:

The contract size will be increased using the “Contract Size Multiplier” (CSM) calculated as follows:

$$\text{CSM} = \frac{(m * \text{WASP}) + (n * \text{WARP})}{(m * \text{WASP})}$$

where:	m	= number of FF shares held ex date
	n	= number of FF shares to be received ex date
	WASP	= average weighted share price of FF on ex day
	WARP	= average weighted rights price on ex day

Please follow this spreadsheet as an example.

**LISTING OF FS CONTRACT**

As with other company restructuring the Exchange has de-listed existing contracts once open interest in far months become zero. NZFOE plans to de-list the current Fletcher Forests contract with the pneumatic FF on or before the end of May 2001. This will occur sooner if open interest in the February and May FF contracts becomes zero.

A new contract for Fletcher Forests with the pneumatic FS will be launched on the evening of Monday, 13<sup>th</sup> November 2000 for trade date Tuesday, 14<sup>th</sup> November 2000. The Contract Specifications for the new contract based on 1000 shares per option are set out below. Initial listings will be for February 2001 and May 2001 with strike prices ranging from 10c to 90c at 10c intervals.
