SYCOM Trading Halt on Tuesday 1 June 1999

At 8.10 pm on Tuesday, 1 June 1999, the SYCOM® market was halted for a period of 55 minutes.

The problem was caused by an operational error whereby the primary and backup trade maintenance machines were inadvertently powered down.

The Exchange regrets any inconvenience caused by the inability to trade during that period and as a matter of high priority is reviewing its operational procedures to ensure this problem does not recur.
