

# SCREEN DEALING No: 20/99 BULLETIN

To:               All NZFOE Dealers  
                      Floor Members  
                      SYCOM Managers

## **TRADING ID'S and PASSWORDS**

Prior to the implementation of SYCOM® IV, traders who have successfully completed SYCOM® IV training will be issued with a unique trading ID and password for SYCOM® IV access.

SYCOM® Managers should ensure user maintenance has been performed for each of their traders on Member Firm Work Stations (MFWS) prior to the completion of mock trading. This maintenance includes:

- Account set up
- Trading ID's set up
- Trader limits set up

Guidelines for the performance of this maintenance are contained in the SYCOM® IV Manager Guide.

SYCOM®/Risk Managers will also be issued with an access ID which should be used to set up accounts and monitor account limits.

## **MEMBER CHECKLIST**

With the commencement of SYCOM® IV, the Exchange has advised Members of proposed changes to the trading rules. All SYCOM® traders should ensure that they are familiar with these changes as they will take effect from the commencement of SYCOM® IV daytime trading and will also apply to SYCOM® III overnight trading.

Traders should familiarise themselves with error procedures and schedules attached in the trading rules which include:

Settlements  
Custom market  
Strip trading

## **MISCELLANEOUS ISSUES**

In addition, Members should check that the following items have been completed:

AOEI requirements  
SYCOM® IV agreements  
SYCOM® IV qualifications for daytime traders  
SYCOM® Manager training
