

SCREEN DEALING No: 33/99 BULLETIN

To: **All Members**
SYCOM Managers

SYCOM IV Upgrade

Members are advised that an upgrade to the SYCOM® IV system has been performed, rectifying the XB/YB inter-commodity spread issue advised in Screen Dealing Bulletin No. 32/99.

Accordingly, the XB/YB inter-commodity facility will be enabled for trading effective Monday, 16 August 1999.

Enhancement/Modification Facility

As previously advised, whilst performing an order modification, the underlying order remains live in the system. The Exchange has implemented an additional safeguard in that a re-entered modified order will reflect the true volume of the underlying order, taking any execution into account.

The volume field on a modification will only overwrite the underlying order if it has been specifically amended.

George Maganas
