SYCOM Managers**

SYCOM IV Trading Halt - 13/9/99

Following a system failure of a core component, the SFE market was initially halted on 13 September 1999 for a period of 30 minutes. The NZFOE market lunchtime resume was also delayed for a period of 10 minutes.

Due to a secondary effect resulting from the initial recovery of the system, it was necessary to perform an orderly shutdown of the system to re-initialise standard system configuration. Accordingly, the system was unavailable between 3.00 pm and 3.40 pm.

This incident is being fully investigated by the Exchange and its providers with the highest priority. Members will be advised of cause and resolution in due course.
