

**Screen Dealing Bulletin No:** 30/01

**From:** SFE Corporation Limited ABN 74 000 299 392

**Date of Issue:** 03 July 2001

## **SYCOM® MARKET HALT – 3 JULY 2001**

Participants are advised that on Tuesday, 03 July 2001 the SYCOM® system was made unavailable for 10 minutes, between 12:30 and 12:40.

The system was manually paused by SFE to perform non-routine maintenance as a result of a problem within the Gateway process responsible for servicing reports. The fault was rectified within the 10 minute downtime.

## **OPTION SETTLEMENT PROCEDURES**

Further to Screen Dealing Bulletins 27/01 and 28/01, Participants are reminded that the integration of daily Option price settlement onto SYCOM® is now complete. All Option strike prices will receive an interim settlement price displaying both premium and volatility. In accordance with the Trading Rules, Participants will have 5 minutes to object to an interim settlement price before it is finalised.

The integration of Option settlement procedures onto SYCOM® will have the dual benefits of increasing the speed with which prices are published to the market while increasing the transparency of Option settlement prices.
