SFE MARKET HALT – 6 June 2005

Market users are advised that on 6 June 2005 the SFE market experienced a period of unavailability totaling 80 minutes.

Event	Time	Down Time
Market notified of pending halt	14:40:00	
Market halted	14:50:00	
Commodity and ISF products closed	16:00:00	1:10:00
Debt, currency and Equity Index products pre-open	16:05:00	
Debt, currency and Equity Index products open	16:10:00	1:20:00
Electricity products open	16:10:00	1:20:00

The SFE market was advised at 14:40 of a halt to trading at 14:50 resulting from a technical issue experienced in the creation of the new trade date (required for trading to successfully commence at 17:10). Recovery from this incident required a reboot of the SYCOM host hardware which resulted in all Workstations and Interfaces losing connection, in accordance with standard recovery procedures.

The SYCOM system is now fully functional. SFE technical staff and software providers will perform a full investigation of the incident.

In the event of a SYCOM disruption, clear instructions and information on opening time, order status and Workstation recovery can be received in real time using the SYCOM status facility on the SFE website and is available at <http://www.sfe.com.au/index.html?site/status/status.htm?sycom>
