If bids and offers in the underlying market equal or tighten the bid/offer spread in the Intra-commodity Spread market SYCOM® will combine separate underlying orders to generate an implied Intra-commodity Spread order in the Intra-commodity market. An implied price will be identifiable by colour if a SYCOM® Trader so chooses.

If bids and offers in the underlying market equal or tighten the bid/offer spread in the Inter-commodity Spread or Inter-regional Spread market and sufficient volume to meet any pre-defined volume ratio is met, SYCOM® will combine separate underlying orders to generate an implied Inter-commodity Spread or Inter-regional Spread bid or offer price, as the case may be, in the Inter-commodity Spread or Inter-regional Spread market. An implied price will be identifiable by colour if a SYCOM® Trader so chooses.
- (f) An Inter-commodity Spread or Inter-regional Spread order, if and when matched by SYCOM®, may trade with other Inter-commodity Spread or Inter-regional Spread orders or orders from the underlying market.

The Custom Market eliminates legging risk as the order is filled at a user defined ratio and at specific leg prices.

- 1 No Custom Market Order should have any resemblance to order functionality which may already exist in SYCOM®, for example futures spreads that are available on Spread Trading windows and any Inter-commodity markets listed on SYCOM®.
- 2 Prices for all legs of a Custom Market Order must be within the following price limits at the time of order entry:
 - (a) The high/low of the Trading Date for the appropriate contract.
 - (b) If only a bid or only an offer then the specified tick range as set out in Schedule J from the existing bid or offer (if the bid is below prior settlement then prior settlement may be used, if the offer is above prior settlement then prior settlement may be used).
 - (c) If no bid or offer exist, then the specified tick range as set out in Schedule J from the settlement price. In the case of an Option Contract then within the specified tick range as set out in Schedule J from the system generated indicative price.
 - (d) For Futures/Options orders, deltas must be within the range as set out in Schedule J.
- 3 All Custom Market Orders must be traded at the lowest common denominator. Orders not created in the lowest common denominator will be automatically rejected and will not be transmitted to SYCOM®. The maximum volume that can be used in the volume ratio field is fifty lots.

for example, trading an IR straddle:

- + 100 IRZ9 95000P @ price
- + 100 IRZ9 95000C @ price

In the Custom Market for the above example, the Custom Market Order should be entered with 100 lots in the volume field and the ratio field should be 1 - 1 for the two legs.

However in relation to an option ratio strategy the volume entered into the volume ratio field may exceed 50 lots for the leg representing the larger ratio denomination only; the volume entered into the volume ratio field for the leg with the least volume must remain at 50 lots or less.

- 4 Simultaneous futures/options transactions may be placed for execution within the Custom Market.
- 5 When a Custom Market Order is matched, SYCOM® Traders will receive confirmations for each leg of the Custom Market Order at the under defined ratio.
- 6 If there is no market for a particular strategy in the Custom Market a trader must ask for a market via the message facility broadcast to "all users" before inputting the order. Similarly, should a SYCOM® Trader wish to enter an order with a different basis or delta to a strategy already in SYCOM®, it must be treated as a new strategy, and therefore the SYCOM® Trader must broadcast a message, via the message facility, advising of the exact changes prior to inputting the order.
- 7 Where there is an existing Custom Market Order bid and/or offer, a SYCOM® Trader may not in relation to that order, enter (a) subsequent order(s) utilising different leg prices which achieves the same net price as the existing bid or offer in the Custom Market. Orders that are subsequently entered and trades resulting from such order shall be cancelled by the Exchange.
- 8 Where a bid and offer has been established in the Custom Market, a trade may only be executed between that bid and offer. In the event of only a bid or only an offer, a trade may not be executed where it is lower than the bid, or where it is higher than the offer. Orders that are subsequently entered and trades resulting from such orders shall be cancelled by the Exchange.
