

SFE NOTICE NO. 165/07

Date of Issue: 27 November 2007

SFE Business Continuity Testing

Participants are advised that on Friday 30 November 2007, SFE will be undertaking a comprehensive test of the Business Continuity capabilities of its derivatives clearing system, Secur.

On this day, all SFE Clearing processing for SFE derivatives transactions will be performed from infrastructure located at a Business Continuity facility. All support for SFE Clearing will continue to be provided from the production facility.

The provision of SFE Clearing processing from the Business Continuity facility will not require Participant involvement or specific actions. Therefore there will be no requirement for changes to be made to Participant system configuration or operational activities.

Over the weekend of 1-2 December, SFE Clearing processing will be returned to its standard production configuration in readiness for resumption of services from the primary site from Monday, 3 December 2007.

Should you have any queries please contact the SFE Service Desk +61 2 9256 0667 or service.desk@asx.com.au
