

31 January 2008

**King Island Scheelite Ltd (“Company”)
King Island Scheelite Mine Redevelopment Project
Report for the Quarter ended 31 December 2007**

King Island Scheelite and Hunan Nonferrous Metals Corp (“HNC”) proposed joint venture to re-develop the King Island scheelite mine

In December the Company announced that it had signed a series of documents that created an unincorporated joint venture with HNC. This joint venture, in which both parties have an equal share, will re-develop the King Island mine into one of the largest tungsten producers in the western world.

As part of this arrangement HNC will contribute 50% of the construction costs of the project, and provide the Company with debt funding to finance its share of construction costs. This debt will attract an interest rate of 8% and repayments will be matched to a proportion of the cash flow generated by the project.

In addition, HNC will subscribe to 4,450,000 shares in the Company, to be issued at a price of \$1.00 per share. HNC will nominate one director to take a seat on the Board of the Company.

A number of the conditions precedent in the agreements have already been satisfied, and the Company expects that the remainder, such as receiving the approval of the Chinese Government and the Company’s shareholders, will be satisfied in March. Following this, the Company anticipates that there will be a 21 month period during which detailed engineering and construction are completed. Given that the Company has all necessary development approvals in place, these activities can commence immediately.

Prior to the commencement of construction the Company is undertaking preparatory work on infrastructure, support services and procurement strategies. This includes discussions and preliminary negotiations with parties interested in providing accommodation, freight, fuel, power and other services. In addition, work has commenced on identifying the optimal sources, both within Australia and overseas, for the purchase of processing equipment.

Tungsten Market

In US dollar terms the tungsten concentrate market has softened slightly to levels around US\$180 – US\$190 per mtu (1 mtu = 10kg), with the Australian dollar lately trading in the range of 86 cents to 88 cents. Demand continues also to be healthy,

For personal use only

with customers both within China and elsewhere keen to lock in major sources of long term supply, which the King Island project will be able to deliver.

Outlook

The Company anticipates finalizing the conditions precedent in the joint venture agreements in March, at which time the proceeds from the issue of shares to HNC will be received and funding commence for the re-development of the project.

After completion of the joint venture agreements, additional funding would total \$4,450,000 received from the issue of shares to HNC; plus an estimated joint venture debt facility totalling \$110 million for re-development of the mine.

Construction activities will begin immediately thereafter, with ordering of long lead time items and detailed engineering being the first activities undertaken.

Notes

1 The quarterly report provides a basis for informing the market how the entity's activities have been financed for the past quarter and the effect on its cash position. An entity wanting to disclose additional information is encouraged to do so, in a note or notes attached to this report.

2 The "Nature of interest" (items 6.1 and 6.2) includes options in respect of interests in mining tenements acquired, exercised or lapsed during the reporting period. If the entity is involved in a joint venture agreement and there are conditions precedent which will change its percentage interest in a mining tenement, it should disclose the change of percentage interest and conditions precedent in the list required for items 6.1 and 6.2.

3 **Issued and quoted securities** The issue price and amount paid up is not required in items 7.1 and 7.3 for fully paid securities.

4 The definitions in, and provisions of, *AASB 1022: Accounting for Extractive Industries* and *AASB 1026: Statement of Cash Flows* apply to this report.

5 **Accounting Standards** ASX will accept, for example, the use of International Accounting Standards for foreign entities. If the standards used do not address a topic, the Australian standard on that topic (if any) must be complied with.
