## ASX release

### **AGL suspends development of Dalton Power Station**

**19 October 2012**

AGL Energy Limited (AGL) has today announced that it is suspending development of the first stage of its 1,000 MW Dalton power station in New South Wales. The economic viability of this project had been under review for several months because of market conditions.

State and Federal government approvals remain valid for the next five years.

#### **About AGL**

AGL is one of Australia's leading integrated energy companies and is taking action toward creating a sustainable energy future for our investors, communities and customers. Drawing on over 175 years of experience, AGL operates retail and merchant energy businesses, power generation assets and an upstream gas portfolio. AGL has Australia's largest dual fuel customer base. AGL has a diverse power generation portfolio including base, peaking and intermediate generation plants, spread across traditional thermal generation as well as renewable sources including hydro, wind, landfill gas and biomass. AGL is Australia's largest private owner and operator of renewable energy assets and is looking to further expand this position by exploring a suite of low emission and renewable energy generation development opportunities.
