

AUSTRALIAN BAUXITE LIMITED  
ASX: ABZ

ASX ANNOUNCEMENT  
21 December 2012

## Majors express interest – Data Room established

Australian Bauxite Limited (ASX: ABZ) (ABx) has established a virtual data room in response to approaches made since its declaration of three State-Significant Projects (ASX 27 September 2012) (Projects).

All participants have been afforded equal access, based on their commitment level, commencing with execution of a confidentiality agreement, and then progressing through term sheet and MoUs.

The data room is currently open to six international groups and their advisors, who are investigating the ABx opportunity, be it at tenement, project, subsidiary or company level.

Site visits have been conducted in each of the Projects and are ongoing.

ABx gives no assurance that any proposal, agreement or transaction will result.

ABx will update the market of further developments.

#### About Australian Bauxite Limited: ASX Code ABZ

Australian Bauxite Limited (ABx) holds the core of the newly discovered Eastern Australian Bauxite Province. Its 41 bauxite tenements in Queensland, NSW and Tasmania covering 7,537 km<sup>2</sup> were rigorously selected on 3 principles:

1. good quality bauxite;
2. proximity to infrastructure connected to export ports; and,
3. free of socio-environmental or native title land constraints.

All tenements are 100% owned and free of obligations for processing and third-party royalties. ABx has already discovered many bauxite deposits and new discoveries are still being made as knowledge and expertise grows. ABx conducts vigorous reviews of the commercial viability of its projects and tenements, resulting in new acquisitions, but also reductions in area as exploration is conducted.

The company's bauxite is high quality and can be processed into alumina at low temperature – the type that is in short-supply globally. **Global resources declared to date total 115.6 million tonnes.** At the company's first drilling prospect in Inverell, northern NSW, a resource of 38.0 million tonnes<sup>1</sup> has been reported from drilling 35% to 40% of the area prospective for bauxite and a resource of 37.9 million tonnes<sup>2</sup> of bauxite has been reported at the Taralga project in southern NSW. A 6.0 million tonnes<sup>3</sup> maiden resource was declared at Guyra. A 24.5 million tonnes<sup>4</sup> resource has been declared at the Binjour Plateau in central QLD, confirming that ABx has discovered a significant bauxite deposit including some bauxite of outstandingly high quality. A 5.7 million tonnes<sup>5</sup> maiden resource has been declared for Tasmania. Australian Bauxite Limited aspires to identify large bauxite resources in the Eastern Australian Bauxite Province, which is emerging as one of the world's best bauxite provinces.

ABx has the potential to create significant bauxite developments in three states - Queensland, New South Wales and Tasmania. Its bauxite deposits are favourably located for direct shipping of bauxite to both local and export customers.

**ABx endorses best practices on agricultural land, strives to leave land and environment better than we find it. We only operate where welcomed.**
