

ASX Release

30 May 2014

## Newera Commences Ground Magnetic Survey at Ulaan Tolgoi

**Newera Resources Limited (ASX: NRU)** ("Newera") is pleased to advise that it has commenced a ground magnetic survey at the Ulaan Tolgoi project located in the South Gobi basin in Southern Mongolia.

The ground magnetic survey will comprise 700 line kilometres covering the northern sector of the Ulaan Tolgoi licence area at 200m line spacing and an additional four lines in the southern sector repeating and extending a previously conducted ground magnetic survey.

The survey commenced this week and is expected to be completed within two weeks.

Newera has noted that the very recent discovery of a black coal bearing sub-basin immediately adjacent to the northern boundary of the Ulaan Tolgoi licence, and the testing of that sub-basin by a third party drilling within 1.5 kilometres of the northern boundary of the Ulaan Tolgoi licence, has produced shallow, mineable intersections of high quality black coal.

For continuity of local knowledge, work practices and work quality, Newera is utilising the services of the same geophysical survey contractors (Geo-Oron LLC) whom conducted the ground magnetics survey immediately to the north of Newera's J/V Ulaan Tolgoi Licence and whom outlined the recently discovered black coal bearing sub basin in that location.

The geophysical survey contractor cost for the program will be AUD\$14,000. The quote includes mobilisation, the field data gathering exercise and the subsequent modelling of the collected data and de-mobilisation. There will be modest additional costs for permitting, consultant geologist supervision and camp and catering requirements.
