

22nd December 2014

ASX ANNOUNCEMENT
ANTEO TECHNOLOGIES AND USA BASED IMRA ENTER INTO AGREEMENT

Anteo Technologies Pty Ltd (a subsidiary of Anteo Diagnostics Limited, ASX: ADO) and IMRA America, Inc. are pleased to announce a new agreement today. Anteo Technologies and IMRA will work to co-develop a ready-to-use product that, when developed, could have broad applications in medical device, in-vitro diagnostic and the life science markets. The companies will begin a joint feasibility study this month.

Anteo's patented coupling technology platform, Mix&Go™, is expected to deliver improved handling, manufacturability and performance characteristics for IMRA's proprietary i-colloid™ high purity colloidal nanoparticles.

Anteo will work closely with IMRA using Mix&Go™ to investigate this opportunity. The initial project focus will be on the activation of gold colloids for use in a vast array of applications. The first step is to co-develop a Mix&Go™ activated Gold Particle Coupling Kit, specifically tailored to IMRA's i-colloid gold product range.

Dr. Geoff Cumming, CEO of Anteo Technologies said: "This is a positive step as we engage with more global partners and take steps to co-develop products using our unique technology platform,"

"Anteo is meeting its objective of releasing a new product to market each quarter. The fact that we can meet this fast-paced performance goal can be attributed to the ease and speed with which Mix&Go allows the product development cycle to be completed. We look forward to applying our unique technology and 'know-how' as we develop a new kit with IMRA," said Dr. Cumming.

Dr. Makoto Yoshida, Executive Vice President in charge of the Research and Development of IMRA America, Inc. said: "I have great hope that we can create new applications for i-colloids™ through this collaboration with Anteo Technologies and develop valuable new products by combining the advantages of our technologies."

For personal use only

Anteo uses its patented technology to develop, manufacture and commercialise proprietary surface coatings for use in healthcare, life sciences and beyond. Anteo Technologies delivers the surface you want on the surface you have.

IMRA is a world leader in the research, development, manufacturing and application of ultrafast fiber lasers. IMRA uses laser-based proprietary manufacturing methods and produces high purity colloidal gold and other noble metal nanoparticles free of surfactants and residual chemical reagents.

Anteo Technologies Pty Ltd

Anteo uses its patented technology to develop, manufacture and commercialise proprietary surface coatings for use in healthcare, life sciences and beyond. Its core technology is realised in the Mix&Go product range which delivers product solutions to the challenges of establishing highly functional biological interfaces between fragile biomolecules and synthetic, and often incompatible, materials. Bio-Layer Pty Ltd, a subsidiary company of Anteo Diagnostics Limited (ASX: ADO) has recently changed its name to Anteo Technologies Pty Ltd. This change does not affect Anteo Diagnostics' shareholders.

IMRA America, Inc. <http://www.imra.com> / <http://nano.imra.com>

Founded in Ann Arbor, Michigan in 1990, IMRA is dedicated to the development of ultrafast fiber laser technologies for commercial applications. IMRA's technology portfolio includes over 450 US and international patents and patent applications. The company's pioneering technologies, rigorous quality control and high volume manufacturing operation make IMRA's products the sound choice for scientific, OEM and industrial use. IMRA also continues with cutting edge research in areas of new functional nano-materials for bio-medical and energy applications, keeping IMRA front and center in a broad spectrum of research and development.
