ASX ANNOUNCEMENT

17 December 2015

Launching of New Product – MARVEL 3DPro Super Workstation

The Directors of China Integrated Media Corporation Limited (“CIMC” or the “Company”) are pleased to announce that our newly acquired subsidiary - Marvel Digital Limited (“MDL”) has launched a new product named MARVEL 3DPro Super Workstation (“MARVEL 3DPro”). MARVEL 3DPro is a state-of-the-art and all-in-one computer workstation developed and designed by MDL, which can deliver unparalleled computing power and speed for automatic or semi-automatic 2D to 3D content conversion. MARVEL 3DPro is equipped with the most advanced Intel® XEON® E5 Multi-Cores processor, NVIDIA® Maxwell GPU, and has built-in propriety 3D processing and image enhancement software, which can serve simultaneously up to 5 individual computer-monitor working units and greatly reduces the 2D to 3D conversion time by 600% when comparing to other traditional conversion methods. In addition, unlike traditional conversion methods, the 3D content outputs generated by MARVEL 3DPro can be edited, adjusted and enhanced by those built-in 3D processing and image enhancement software which in turn can produce quality 3D outputs tailored for TV programs and movies.

The Directors of the Company believe MARVEL 3DPro can provide a highly efficient and quality application and platform to the content creation and media industry where the 2D to 3D conversion process is involved.

MDL has received several orders from customers on Marvel 3DPro to the value of approximately AUD \$3,800,000 and of which approximately AUD \$2,100,000 were orders received from the related entities controlled by or in relation to our director – Dr. Herbert Ying Chiu Lee. The directors of the Company expect shipment and installation of some of these workstations will be completed by the end of December 2015.

On behalf of the Board,

Yours sincerely,

/s/ Dr. Herbert Ying Chiu Lee
