Enice new contract momentum continues, awarded tender by Hubei Mobile

Highlights

- First successful tender notification from Hubei Mobile for the indoor distribution and WLAN construction services
- Builds on existing relationship with Hubei Mobile in an important province to the Company
- Significant momentum following recent contract wins from new and existing customers
- Awarded 5 bid sections in Hubei Province
- Estimated revenue from tender of RMB 39 million (A\$8.43 million) between 2016 and 2017

Enice Holding Company (“Enice” or “the Company”), a vertically integrated wireless telecommunications technology business supplying China’s rapidly growing telecommunications sector, today announced a successful tender notification from Hubei Mobile.

The tender notification is for the indoor distribution and WLAN construction services of Hubei Mobile in 2016-2017. This is Enice’s first successful bid of this service type in Hubei province, where the Company already has secured contracts for its DAS antenna products with this customer.

With Hubei Mobile, the Company will participate in the 2015 DAS integration project initially with potential for further projects after this winning tender.

The successful bid includes provision of DAS integration services for 5 cities in the region of Hubei province.

The contract is expected to generate revenue of RMB 39 million in total across 2016 and 2017, and demonstrates the further traction that the Company is gaining in this region.

-Ends-

About Enice

Enice (Electronics Network Information of Century East) China was established in May 2000 as a telecommunications infrastructure engineering service provider, providing services to China’s three largest mobile carriers to assist them in installing and maintaining the infrastructure underpinning their wireless telecommunications networks.

For personal use only

Enice's goal is to be the leading developer, manufacturer and supplier of technologically-advanced wireless communication Software, Products and Services; and to deliver technology solutions and services across wireless communication networks in China, the world's largest mobile market, and also internationally.

Enice operates in the wireless telecommunication equipment and services industry, primarily in China and North America. Enice's strengths lie in its advanced Wireless Telecommunications technology products and solutions, a highly-skilled Research & Development team, a quality assembly plant, an established market presence in China, and a strong board and management team of telecommunication industry experts. Enice is well-positioned to capitalise on the growth of China's network maintenance and management services market, forecast to increase in value from A\$8.5 billion in 2015 to A\$54 billion 2019.

Enice has proven ability to develop world-leading technology for telecomm carriers' entire Network Lifecycle, and currently holds 5 invention patents, 16 utility model patents, 2 design patents and 9 software copyrights.

Enice has a well-established presence in China and currently employs 440 staff, located in its corporate headquarters in Nanjing, China-based assembly facility Nanjing, China and in regional branch offices in Beijing, Guangdong, Zhejiang, Shaanxi, Shandong and Anhui.
