ASX Market Announcements

Zyber announces Proof of Concept Testing Agreement with key Value Added Reseller Partner, Abstractive

Zyber Holdings Limited (ASX: ZYB) ('Zyber' or 'the Company'), a leading provider of secure file sharing software, is pleased to announce it has entered a Proof-of-Concept (POC) contract with Abstractive Technology Consulting Inc. (Abstractive).

Abstractive is a Canadian-based systems integrator specializing in Relationship Management (CRM), Business Intelligence (BI), and Enterprise Content Management (ECM) solutions. Abstractive also plays a role as a Software Reseller and Technology Partner with a select group of North American software vendors.

The Zyber-Abstractive POC intends to address the immediate need of Abstractive customers and prospects for integrated secure file synchronization and secure file transfer. Abstractive provides software solutions to a number of clients in both the commercial and government sectors which require data to be securely transported and stored. Zyber will provide Abstractive a secure and seamless way to transfer data from distributed locations to a central hub. Abstractive applications will interact with the Zyber secure file storage via their native workflow solutions.

Clay Epstein, CEO of Zyber states, "Since completing our capital raise in January, we are encouraged by the level of interest from customers both locally and abroad in our secure file sharing solution. Abstractive's expertise will be a key factor in assisting Zyber with penetrating the government sector and we are very excited to be partnering with them."

Fred Lee, Vice President at Abstractive, states, "We are excited to collaborate with Zyber to provide an integrated file synchronization solution that is manageable, secure and deployable in multiple environments. We believe this will be a significant value-add for those prospects and customers that require stringent security for their digital assets."

About Zyber:

Zyber Secure Mobile Solutions builds secure file sharing business applications with an emphasis on security, scalability and functionality. Zyber automates confidential information flow processes for industries including government, banking, healthcare, retail, and the public sector.
