ASX Release

XPED RECEIVES OFFICAL NOTICE OF ADRC PATENT GRANT RIGHT IN CHINA

Highlights

- Xped received an official “notice of patent grant right” for the flagship ADRC patent from the China Patent Office on March 29th 2016.
- The ADRC patent protects Xped’s ground breaking ADRC technology.
- ADRC provides a unique method for “on boarding” and interacting with devices by simply tapping an NFC enabled phone to the device.
- Via the simple “tap gesture”, a secure connection is established between the phone and the device and information contained within the device, specified using the RML language invented by Xped, is sent to the phone and used by a device browser app allowing the user to immediately interact with and control the device.
- China is arguably the largest early adopter of Internet Of Things (IoT) technologies and ADRC has been designed to be the “go to” platform for the IoT.

Xped Limited(**ASX: XPE**) (“**Xped**” or “the **Company**”) wishes to announce that Xped Holdings Limited has received an official “notice of patent grant right” for the flagship ADRC patent from the China Patent Office on March 29th 2016.

Subject to the patent filing fee being paid on or before the 13th of June 2016, the patent will be granted and an official patent deed will be received approximately three months later.

Xped Chairman and CEO Chris Wood stated, “The granting of this core patent in China means that we can confidently engage with Chinese silicon vendors and device manufactures knowing that our ADRC technology is protected and can be defended.”

By order of the Board
