

AUSTRALIAN BAUXITE LIMITED

ASX: ABX

**About Australian Bauxite Limited
ASX Code ABX**

Australian Bauxite Limited (ABx) has started its first bauxite mine in Tasmania and holds the core of the Eastern Australian Bauxite Province. ABx's 37 bauxite tenements in Queensland, New South Wales & Tasmania exceed 5,000 km² and were rigorously selected for (1) good quality bauxite; (2) near infrastructure connected to export ports; & (3) free of socio-environmental constraints. All tenements are 100% owned, unencumbered & free of third-party royalties.

ABx's discovery rate is increasing as knowledge, technology & expertise grows.

The Company's bauxite is high quality gibbsite trihydrate (THA) bauxite & can be processed into alumina at low temperature - the type in short-supply globally.

ABx has declared large Mineral Resources at Inverell & Guyra in northern NSW, Taralga in southern NSW, Binjour in central QLD & in Tasmania confirming that ABx has discovered significant bauxite deposits including some of outstandingly high quality.

In Tasmania, at Bald Hill, the Company's first bauxite mine commenced operations on schedule on 9 December 2014 - the first new Australian bauxite mine for more than 35 years.

ABx aspires to identify large bauxite resources in the Eastern Australian Bauxite Province, which is emerging as a globally significant bauxite province. ABx has created significant bauxite developments in 3 states - Queensland, New South Wales and Tasmania. Its bauxite deposits are favourably located for direct shipping of bauxite to both local and export customers.

ABx endorses best practices on agricultural land, strives to leave land and environment better than we find it.

We only operate where welcomed.

Bloomberg Network Interview

Australian Bauxite Limited (ASX: ABX) (Company) advises that the Company features in a RedChip TV Interview airing on TV this weekend on Sunday night.

The interview will air on Bloomberg Network AUS: (Australia) - 12 June 2016, this Sunday evening at 5:30p.m (AEST), 06/12/16 Episode 92.

Rain Effects

Inspections following recent heavy rains at the Company's Bald Hill Mine at Campbell Town confirm that the project has suffered no material damage.

The recently announced outage of the rail transport between the mine and Bell Bay Port due to flooding of the rail should have no impact on sales because the company holds sufficient stockpiles of finished bauxite product at Bell Bay Port to meet current and near-future sales.
