Drilling underway at Mt Cattlin

Highlights

- **Kingston has commenced drilling at Mt Cattlin**
- **Stage 1 drilling program to be up to 2000m**
- **Stage 2 approvals are in place for potential follow up program**

Kingston Resources (ASX:KSN) is pleased to announce that it has commenced drilling on schedule at the Deep Purple South prospect located on its Mt Cattlin Project. The initial stage 1 program of up to 2000m of RC drilling is expected to take up to two weeks with results expected later in the quarter.

Kingston's geochemical work at Mt Cattlin has helped define the extent of lithium mineralisation at Deep Purple South, outlining two parallel anomalous zones with a strike distance of up to 650m which form the primary targets for the initial drill program. In addition, the drilling is targeting areas with previously recorded high grade rock chips that averaged 2.34% Li₂O with peak results grading up to 4.48% Li₂O.

The drilling program is being carried out by Egan Drilling Services

About Kingston Resources

Kingston Resources is a metals exploration company. The company holds an attractive portfolio of lithium exploration tenements covering four key project areas. In Western Australia, the Mt Cattlin and Greenbushes projects are adjacent or near existing lithium mines. In the Northern Territory, the Bynoe project area is home to some exciting new discoveries and the Arunta project lies within a significant pegmatite field. In addition, the Livingstone Gold Project holds a 50koz resource and is the site of a number of high grade historic intersections. The company is well funded to rapidly advance its exploration projects, with the initial focus being the Mt Cattlin, Bynoe, and Arunta lithium projects, alongside commencement of work on the Livingstone Gold Project.

Competent Persons Statement

The information in this report that relates to Exploration Results, Mineral Resources or Reserves is based on information compiled by Mr Andrew Paterson, who is a member of the Australian Institute of Geoscientists. Mr Paterson is a full-time employee of the Company and has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity he is undertaking to qualify as a competent person as defined in the 2012 Edition of the "Australasian Code for reporting of Exploration Results, Mineral Resources and Ore Reserves" (JORC Code). Mr Paterson consents to the inclusion in this report of the matters based upon the information in the form and context in which it appear.
