ASX Announcement / Media Release

LATEST VERSION OF LIVE-STREAMING POLICE BODY CAMERA RELEASED WITH HILLS INDUSTRIES

HIGHLIGHTS

- CIO has released the latest version of its live streaming body camera incorporating feedback from end-user field trials.
- Latest lightweight technology specifically designed for Police and Security applications.
- Camera to be launched in both Australian and United States markets with a distribution agreement being finalised with Hills Industries (HIL:ASX).
- Significant opportunity for CIO to capitalise on a unique IOT application.

Connected IO Limited (ASX: CIO) (“CIO”) is pleased to provide to its shareholders the following update regarding development of the company’s Body Worn Camera (“Body Camera”).

Together with Hills Industries, CIO will introduce the latest version of the Body Camera to the Australian market via existing relationships with Police, Ambulance and Security companies at Federal, State and local level.

Hills Industries, Head of Communications, Leanne Francis, said *“Further to CIO’s initial prototype, development of a more streamlined, user friendly version of the Body Camera has now been created. The latest version of the Body Camera provides a smaller, lightweight design while still maintaining the original high end digital video streaming capabilities and is based on feedback for extensive field trials by enterprise-level end-users”.*

CIO's Body Camera provides live streaming footage back to base via the cloud with automated back-up of the live streaming, live recording content. This provides Police Officers and Security personnel added comfort knowing the live streaming content can be viewed at base and where appropriate further back up or support can be sent without involvement from the officer in question who may otherwise be detained or occupied.

The live streaming Body Camera provides a direct untampered chain of evidence which aids law enforcement agencies to prove actions, responses and reconstruct events.

There is a worldwide market for Body Worn Cameras with each of United Kingdom, United States, Canada, Germany, Netherlands, Dubai and Australia all undertaking recent studies on the benefits of Body Worn Cameras. The UK studies in particular showed benefits including increase in public reassurance, reduction in fear of crime in local communities, increase in early guilty pleas, resolving complaints about police officers more quickly and reducing assaults on officers.

CIO CEO Yakov Temov said "The development of the next stage of the CIO Body Camera is a promising development for the company. At present there is no live stream to base Body
