

**ASX ANNOUNCEMENT
Lifespot Health Limited**

8 March 2017

Lifespot Health Ltd. wins major contract and strategic b2b partner

- **Lifespot 100% owned subsidiary BodyTel GmbH closes co-operation agreement with Germany's leading blood pressure device manufacturer, Beurer GmbH**
- **New Bluetooth enabled clinical blood pressure monitoring device about to be integrated in complete medical software environment powered by BodyTel**
- **Further projects expected over a two year period and a SaaS based element post integration**

Lifespot Health (ASX: LSH), an international digital health company focused on the management and monitoring of chronic diseases, is pleased to announce that its 100% owned subsidiary, BodyTel GmbH and Beurer GmbH, have signed an agreement for BodyTel to build Apps for iOS and Android as well as a patient and later also a healthcare professional portal around Beurer's newly developed Bluetooth enabled clinical blood pressure monitoring device. The solution will be based on BodyTel's modular medically certified software ecosystem.

Beurer GmbH has been the market leader in the **health and well-being** sector for more than 95 years. Originally a manufacturer of electric blankets, the company began diversifying its product line in the 1980s and now produces some 2,200 products including weighing scales and blood pressure monitors. Founded in Ulm in 1919, the company in 2016 employed 800 people and had revenues of about 230 million Euro.

Once the development is successfully completed, the goal is to provide the new device including the software parts to the end user as well as to healthcare professionals at the point of care. In the long run it is also up to discussion to reorganize Beurer's existing app landscape into the BodyTel powered ecosystem. This would enable Beurer to enter the

regulated markets and profit from BodyTel's newest developments in scalable and up-to-date software architecture.

Under the agreement, BodyTel will integrate Beurer's vital sensors like blood glucose meters, weight scales, activity sensors or lung function monitors into its own portfolio and offer them in its own telehealth projects around the world.

Beurer has chosen BodyTel because of its core competencies in developing software for the medically regulated environment. This includes mobile apps, desktop apps as well as backend and web portals as medical products.

Marco Bühler, CEO of Beurer emphasizes: "We are delighted to have closed an agreement with BodyTel whose certified modular platform approach is an ideal starting point for Beurer to enter the regulated field of medical software."

"Beurer is not only another B2B customer for us. Beurer's quality products in so many areas of fitness and health make them the perfect partner to go beyond worn out paths. Together we can complete the modern value chain from a single hardware product to the whole market of opportunities that added software parts offer. This includes the wellness and fitness market as well as the highly regulated market of medical software", adds Stefan Schraps, Managing Director of BodyTel GmbH.

Schraps further advised: "We are very excited to be working with a world-leader and look forward in building a great foundation for many years to come"

The project will start immediately with a defining phase to evaluate all features needed in the new solution.

Lifespot Health is pleased to provide this update and will continue to provide updates as appropriate.

About Beurer

Today the long-standing company leads the way in several product fields in this segment; the company is the market leader in Europe in the area of flexible heating and the market leader in Germany for blood pressure monitors and massage products. Beurer is also one of the leading European suppliers of personal scales.

For personal use only

This portfolio is constantly being developed further in all areas and offers products for use at home. It includes personal scales, kitchen scales, luggage scales, air cleaners, air dehumidifiers, air washers, thermo hygrometers, aroma diffusers, blood pressure monitors, blood glucose monitors, mobile ECG devices, hearing amplifiers, pulse oximeters, nebulisers, clinical thermometers, a sleep sensor, wake-up lights, a snore stopper, brightlights, infrared

lamps, TENS/EMS devices, massage products (foot massage, Shiatsu massage, massage chairs, massage cushions, fasciae massage, compression leg therapy), hair removal devices (classic, IPL, laser), FaceCare and HairCare products, cosmetics mirrors, manicure/pedicure sets, a BabyCare line, activity sensors, an activity watch and heart rate monitors.

USB ports and Bluetooth® enable an increasing number of Connect products to connect to the growing Beurer app world and/or software. The family-run company operates a global distribution network in more than 100 countries and currently has a workforce of around 800.
