

ROTOGRO

Roto-Gro Finalises Order for 240 Units

- Roto-Gro signs order for 240 Units with EuroAg Corporation
- Order represents revenue in excess of AUD \$2.25M
- Agreement is renewable annually based on a minimum of 240 Units
- Roto-Gro in discussions with several other Medical Marijuana LP's
- Further sales expected in the near term driving revenue and value

Roto-Gro World Wide (Canada) Inc, a wholly owned subsidiary of Roto-Gro International Limited (**ASX:RGI** or the "**Company**") has finalised terms with EuroAg Corporation ("**EuroAg**") for the supply of 240 Roto-Gro Units over a 12 month period; pursuant to a Distribution Agreement (the "**Agreement**") which is renewable annually.

EuroAg has agreed to purchase a minimum of 240 units within 12 months of the date of the agreement, or 10 months from delivery of the first order. EuroAg has agreed to drawdown a minimum of 60 units per quarter in order to maintain its distributor status.

The Agreement provides for EuroAg to order the Roto-Gro 420B and/or 420C models in each successive manufacturing tranche. The Roto-Gro's 420B Model is a complete rotary hydroponic vertical farming system. The Roto-Gro 420C has the same components as the Roto-Gro 420B, with the addition of Roto-Gro's proprietary software system that monitors various elements of the growth cycle, including but not limited to; room temperature, humidity, CO2 levels, water temperature, PH levels, and total dissolved salts in ppm.

The Company is excited to enter into this Agreement with a value in excess of AUD \$2.25M of revenue. The Agreement is confirmation of the support for the extraordinary efforts of the Roto-Gro team who are currently in discussions with a number of licensed medical cannabis producers looking at establishing facilities with Roto-Gro Systems.

The successful execution of this Agreement further demonstrates the leading edge and cost effective advantage the Roto-Gro System has over traditional hydroponic systems. The Roto-Gro System is recognised by medical cannabis growers, producers and distributors as a growing system which provides a compact cost effective environment to produce a consistently uniform, high-quality medical grade cannabis product at a very competitive cost.
