

INTEGRATED MEDIA TECHNOLOGY LIMITED

ASX ANNOUNCEMENT

16 May 2017

Completion of development of glasses-free 3D rendering ASIC chip

We are pleased to announce that the development of our glasses-free 3D rendering ASIC chip has been completed. The ASIC chip will enable us to cost down on our 3D display products. The effect of cost down will be more significant on products with smaller displays such as 3D monitors and digital photo frames. These consumer products have a much bigger market than digital signage. It will open another market opportunity for IMT in the coming future.

On behalf of the Board.

Yours sincerely

/s/ Dr. Herbert Ying Chiu Lee
