

**ASX Announcement****Mobilicom receives certification enabling Japanese market entry for SkyHopper product suite**

- **TELEC certification validates SkyHopper's conformity to the Japanese technical and legal standards**
  - **Enables the SkyHopper family of products to be sold, marketed and operated in Japan**
  - **Certification will enable closing of deals with a number of Japanese customers awaiting SkyHopper solution**

**28 September 2017** – Mobilicom Ltd, developer of 4G Mobile MESH private networking technology, has received the necessary TELEC certification for SkyHopper, required for the sale, marketing and operation of wireless products in Japan.

TELEC certification serves as a key milestone for the SkyHopper family of products, as it means Mobilicom can deliver sales to several Japanese commercial drone manufacturers looking to implement the SkyHopper solution into their platforms. With the receipt of this certification Mobilicom continues to exceed milestone expectations according to its internal launch plan, therefore enabling faster entry into new markets for SkyHopper.

TELEC is a certification entity registered with Japan's Ministry of Internal Affairs and Communication. The certification proves that SkyHopper conforms to the strict technical and legal requirements of Japanese radio law, and thereby complies with industry standards. The TELEC certification validates that the SkyHopper family of products is of the highest quality, and that Mobilicom is committed to delivering these products to the Japanese market.

Oren Elkayam, Mobilicom's CEO stated: "Obtaining TELEC certification is not only necessary for business with Japanese customers, but it also instills a sense of trust with them. It proves to them that SkyHopper offers a validated and reliable solution for Japanese commercial drone and robotics manufacturers for UAV communication and beyond."

Since the launch of the first SkyHopper product in April 2017, Mobilicom has gained significant market traction in the commercial drones and robotics market across the globe. SkyHopper has already obtained a broad customer base with the release of its initial product offerings and continues to build momentum as it expands its product portfolio and service offerings. The ongoing receipt of certifications in key geographic markets is an essential element for driving the SkyHopper sales and marketing strategy, and as a result, will grow Mobilicom's revenues.

### **About Mobilicom**

Mobilicom is a high-tech company that designs, develops and markets solutions for mission critical and remote mobile private communication networks without the need for, or use of, any existing infrastructure. Mobilicom's products and technology are based on an innovative approach that merges 4G communication with Mobile MESH technologies into a unified solution, with a number of product families that have been commercially deployed. Mobilicom develops in-house and fully owns all assets for its unique technology and solutions, including: 4G modem, MESH networking, radios, HW & SW applications, among others. The technology is backed by its patent holding and know-how.
