All investments involve risks, including possible loss of principal. Special risks are associated with foreign investing, including currency fluctuations, economic instability and political developments; investments in emerging markets involve heightened risks related to the same factors. To the extent a strategy focuses on particular countries, regions, industries, sectors or types of investment from time to time, it may be subject to greater risks of adverse developments in such areas of focus than a strategy that invests in a wider variety of countries, regions, industries, sectors or investments.

Templeton Global Growth Fund Performance

Templeton Global Growth Fund vs. MSCI All Country World Index
As at 30th September, 2017

Periods of more than one year are annualised. Benchmark is presented net of dividends reinvested. Past performance does not guarantee future results and results may differ over future time periods.

For personal use only
The benchmark is the MSCI All Country World ex Australia Index Net Dividends Reinvested (AUD) Index.

The portfolio characteristics listed are based on the Fund’s underlying holdings, and do not necessarily reflect the Fund’s characteristics. Due to data limitations all equity holdings are assumed to be the primary equity issue (usually the ordinary or common shares) of each security’s issuing company. This methodology may cause small differences between the portfolio’s reported characteristics and the portfolio’s actual characteristics. In practice, Franklin Templeton’s portfolio managers invest in the class or type of security which they believe is most appropriate at the time of purchase. Information is historical and may not reflect current or future portfolio characteristics. All portfolio holdings are subject to change.

Source: FactSet. For the portfolio, the Price to Book Value calculations use harmonic means for the weighted average. Values less than 0.01 (i.e., negative values) are excluded and values in excess of 200x are capped at 200x. For the benchmark, no limits are applied to these ratios in keeping with the benchmark’s calculation methodology.

The Ten Largest Holdings represent the ten largest holdings of the fund as of the date indicated. These securities do not represent all of the securities purchased, sold or recommended for advisory clients, and the reader should not assume that investment in the securities listed was or will be profitable. All portfolio holdings are subject to change. Holdings of the same issuer have been combined.

The portfolio manager for the fund reserves the right to withhold release of information with respect to holdings that would otherwise be included in the top 10 holdings list.
Eventual normalisation of economic and policy trends to be supportive of value-oriented equities after a pronounced period of underperformance

Looking at opportunities:

- we remain positive on Europe
- good value among energy producers
- favour lowly valued pharma/biotech firms with innovative pipelines
- select European financials (and those in the rest of the World) continue to look attractive
All investments involve risks including loss of principal. Special risks are associated with foreign investing, including currency fluctuations, economic instability and political developments. Investments in developing markets involve heightened risks related to the same factors, in addition to those associated with their smaller size and lesser liquidity. While stocks have historically outperformed other asset classes over the long term, they tend to fluctuate more dramatically over the short term. The use of derivatives and foreign currency techniques involve special risks, as such techniques may not achieve the anticipated benefits and/or may result in losses. Templeton Global Growth Fund Ltd. (ABN 44 006 558 149) issues this document with the intention to provide general information only and not investment or financial product advice. It does not take into account the individual objectives, financial situation or needs of any recipient. Any views expressed are the views of the fund manager and nothing in this update should be construed as investment advice. You should assess whether the information is appropriate for you and consider obtaining independent taxation, legal, financial or other professional advice before making an investment decision.

Franklin Templeton Investments have exercised professional care and diligence in the collection of information in this recording. However, data from third party sources may have been used in its preparation and Franklin Templeton Investments has not independently verified, validated or audited such data.
