## WANGLE FAMILY INSITES TO LAUNCH GPS GATING FEATURE

Wangle Technologies Limited (Wangle or the Company) (**ASX:WGL**) is pleased to announce the upcoming release of the GPS Gating Feature of the Company's ground-breaking family protection software suite, **Wangle Family Insites (WFI)**.

### WFI GPS Gating Feature Set

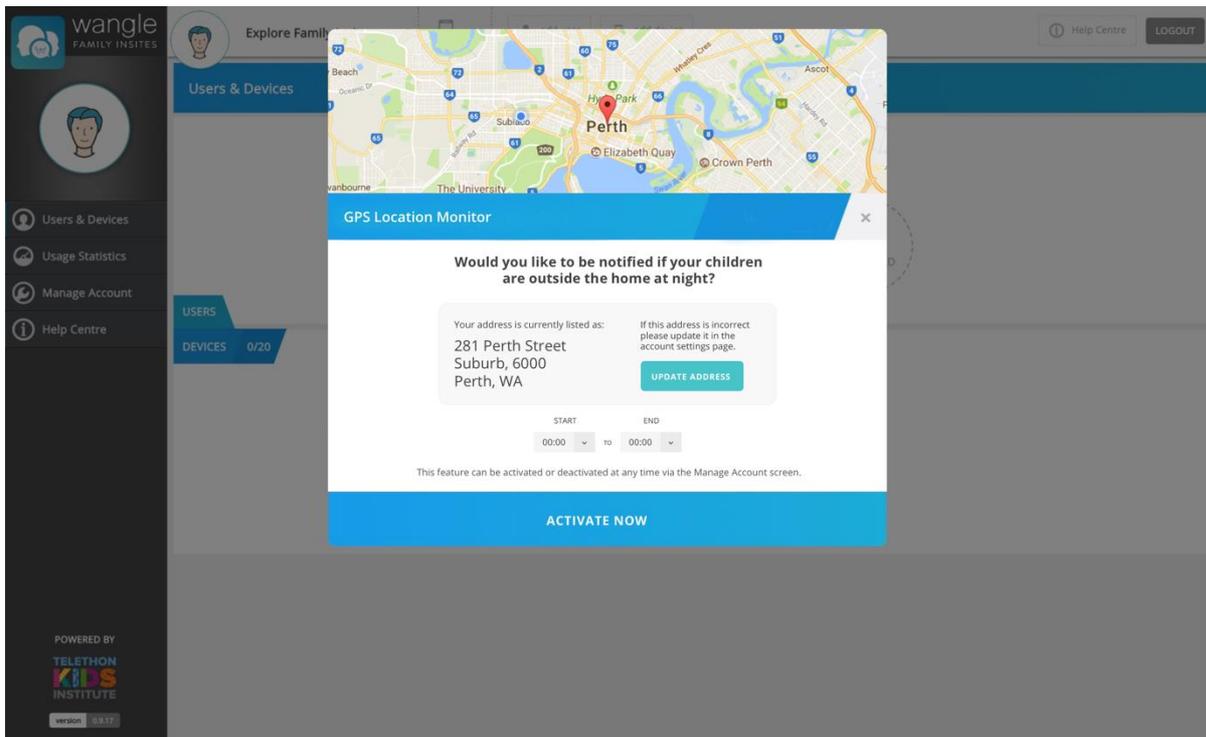

Figure 1. GPS Gating Feature in the Parents Portal

Development of the GPS Gating feature, which allows parents to set an alert that activates when a child's device moves outside of a 20-metre radius from the chosen location, has been finalised for both iOS and Android versions of WFI and is being deployed to the live environment in readiness for roll out to customers by Friday 8<sup>th</sup> December.

The feature update completes the Company's short term development goals for WFI for 2017 in readiness for aggressive acquisition marketing activity following the Company's successful capital raising.

### **WFI Desktop Version**

Development of desktop versions of the Wangle VPN for inclusion within WFI is continuing with a launch anticipated early next quarter. Further details of the WFI Desktop launch will be released in due course.

## ABOUT WANGLE FAMILY INSITES

Wangle Family Insites (**WFI**) offers parents a unique approach to ensuring the safe use of the internet by children and teenagers. By utilising Wangle's world class VPN network, backed by the research insights of childhood development research organization Telethon Kids Institute, WFI monitors mobile network patterns in real time and advises parents of potential threats as well as providing greater details and resources to parents on the threats identified.

## ABOUT WANGLE TECHNOLOGIES

Wangle Technologies has developed patented algorithms that not only optimise, compress and secure the data flow to mobile devices, but facilitate real time analysis of network patterns and usage behaviours. Wangle's technology provides compelling value to consumers, service providers and enterprises looking for innovative low-cost solutions for managing network capacity and use.
