Super Evil Megacorp is the ideal partner for Esport Mogul, as we start to progressively move into a mobile platform. We expect that this partnership will yield significant growth in user numbers for Mogul Arena."

Esport Mogul Regional Manager, Marc Bell, commented:

"We are very excited to announce our partnership with Super Evil Megacorp. We have witnessed their growth as they have not only become leaders in the mobile gaming industry, but they have captured the audience of its PC-based rivals. Our relationship with Vainglory will provide players with another platform to play on, which we believe will enhance their gaming experience."

Community is one of the biggest driving forces of gaming, and with Vainglory's already large player-base, Mogul Arena is the perfect portal for further growth."

Super Evil Megacorp Marketing and Esport Manager, Tomek Borowka, said:

"It is with great pleasure that we announce our partnership with Mogul Arena, a tournament platform that will join us as the game reaches even greater heights."

After 20 million downloads, 12 million registered accounts, and more than 1 billion matches played, Vainglory has already reached various milestones. Milestones that we cannot wait to surpass."

The 5 vs. 5 mode will add another layer of skill and strategy, and together with the current brawl and 3 vs. 3 game modes, will help reach an even wider scope of audience. We have been working to continuously develop the game and the community, and our partnership with Mogul Arena is one testament to that."

About Esport Mogul Asia Pacific Limited

Esport Mogul is an ASX listed (ASX: ESH) esport media and software business, with an initial focus on Australia, Asia and Latin America. At its core is **Mogul Arena** – the world’s best tournament and matchmaking platform with full automation for major esport titles.

Esport is one of the fastest growing industries in the world. It’s estimated that there are currently 2.2 billion gamers across all platforms globally, and in 2017 the total video game market size is estimated to be US\$116 billion.

About the Mogul Arena Tournament Platform Technology

Mogul Arena is proud to be the world’s best online esport tournament platform. Given strong game-publisher relationships, Mogul Arena is already **deeply integrated** with the leading global esport titles, and is the only platform that allows **completely automated** tournament play and results across multiple games.

Mogul Arena sends data to the game’s application programming interface (API) to create matches for players directly in-game. The game then sends data back to Mogul Arena’s API with finalised match scores.

Deep integration offers several distinct advantages, including:

- **Completely automated and customisable esport tournaments**
- **Unsurpassed gamer experience, with faster tournament play and instant results**
- **Rich in-game data aggregation and analytics**
- **Scalability and easily managed community events**

Any game can be added to the platform within minutes for semi-automated tournament play, but Mogul Arena will continue to focus on deep integration with popular and up and coming PC and mobile titles.

Mogul Arena is currently available in English, but there are plans to roll out a localised language function in Thai, Spanish, Portuguese, Vietnamese, Chinese and Indonesian in the next 90 days.
