

Leading Titanium Industry Executive Joins Titomic as GM of Business Development, Aerospace & Resources Division

- Global senior executive, business development manager and metals industry expert
- Former Managing Director of two global regions of leading metals company ATI (NYSE:ATI)
- Extensive industry expertise in the oil & gas, chemical, aerospace, mining and power sectors
- Provides technical validation for industry sectors and market expansion experience

Melbourne, Australia, 25 January 2018: Australian metal additive manufacturing company, Titomic Limited (ASX: TTT) ("Titomic" or "the Company") is pleased to announce the appointment of Mr. Trent Mackenzie to serve as the General Manager of Business Development for the Company's Aerospace & Resources Division commencing 1st February 2018.

Mr. Mackenzie is an accomplished executive and metallurgist with 40 years industry experience, with a particular focus on metals in the oil & gas, chemical, aerospace and power generation sectors and extensive experience in titanium, stainless steel, duplex, super austenitic, nickel and cobalt based alloys.

Mr. Mackenzie was Managing Director of two global regions of Allegheny Technologies International (NYSE:ATI), the global market leader in specialty titanium and titanium alloys. Having worked with manufacturers in the United States, Europe, Australia, Middle East and South-East Asia, Mr. Mackenzie comes with a strong track record of establishing significant strategic relationships, identifying market growth opportunities and developing key customers relationships.

As General Manager of Business Development for the Aerospace & Resources Division, Mr. Mackenzie will oversee all oil & gas, mining and engineering services clients. He will also lead the integration of new clients in the Aerospace sector. Mr. Mackenzie will be responsible for further developing Titomic's profile within target industry sectors, while providing technical, metallurgical validation and will play a key role in expanding opportunities into new markets.

Titomic CEO and CTO, Mr. Jeffrey Lang added:

"We are delighted to welcome Trent to the team. Trent brings a wealth of technical knowledge, business development experience, and an exceptional network of industry leading relationships, which will assist Titomic to develop a market-leading position in the aerospace & resources sectors. His global expertise in metals engineering and applications will greatly benefit Titomic and our customers."

About Titomic:

Titomic (ASX:TTT) is headquartered in Melbourne, Australia. The company overcomes limitations of previous additive manufacturing (3D printing) for metals to manufacture complex parts without shape or size constraints. Titomic offers design and manufacturing methods to enable speed-to-market, superior products at lower production costs and using less resources for a more sustainable future.

Titomic additive manufacturing machines that can customise build size to customer requirements offer additive manufacturing advantages at industrial scale. Multiple robots can be utilised to build larger parts, competing with traditional manufacturing solutions for industries such as aerospace and defence, sporting goods, medical, automotive, industrial equipment, construction and marine.

Other benefits of the Titomic Kinetic Fusion technology include:

- Joining dissimilar metals and composites for engineered properties in a structure
- Stronger structures without welding, folding or bending
- Reduced time to market with industry-leading production speeds

Clients will be offered a licence to manufacture via the Titomic Kinetic Fusion technology. Titomic's revenue model will also provide clients with R&D prototyping services, Titomic equipment sales, powder and consumables supply, equipment service and maintenance.
