The record date to determine entitlements to the final dividend	22-Feb-2018	
The date the final dividend is payable	28-Mar-2018	

¹ The unfranked component of the 2017 final dividend will be declared to be conduit foreign income.

² AMP has a dividend reinvestment plan (DRP) under which shareholders who have a registered address in, and are residents of, Australia and New Zealand are invited to reinvest all or part of any dividends receivable in additional shares. The price of the shares under the plan will be the arithmetic average of the daily volume weighted average price per share of all shares sold in the ordinary course of trading on the ASX for the 9 trading days from 27 February 2018 to 9 March 2018, rounded to the nearest one cent. For the 2017 final dividend, no discount to the price will apply. AMP intends to acquire shares on-market to satisfy any entitlements under the DRP. Shares provided under the DRP will rank equally in all respects with existing fully paid AMP ordinary shares. The last date for receipt of election notices from shareholders wanting to commence, cease or vary their participation in the DRP for the 2017 final dividend is by 5:00pm (Australian Eastern Daylight Savings Time) on 23 February 2018.

This Appendix 4E - Preliminary final report has not been subject to audit and there is no audit report provided. However, a substantial part of the financial information in the preliminary final report has been extracted from the AMP 2017 financial report which has been audited by Ernst & Young, who have issued an unqualified audit report. The audit report forms part of the AMP 2017 annual report. The presentation of the AMP 2017 annual report will be finalised for lodgement with ASX on 28 March 2018.

Commentary on the results

for the year ended 31 December 2017

This directors' report provides information on the structure and progress of our business, our 2017 financial performance, our strategies and prospects for the future and the key risks we face. It covers AMP Limited and the entities it controlled during the year ended 31 December 2017.

Operating and financial review

Principal activities

AMP is Australia and New Zealand's leading wealth management company, with an expanding international investment management business and a growing retail banking business in Australia.

We provide retail customers in Australia and New Zealand with financial advice and superannuation, retirement income and investment products. We also provide superannuation services for businesses, administration, banking and investment services for self-managed superannuation funds (SMSF), income protection, disability and life insurance, and selected banking products. These products and services are delivered directly from AMP and through a network of close to 3,300 aligned and employed financial advisers in Australia and New Zealand and extensive relationships with independent financial advisers.

Through AMP Capital, we manage investments across major asset classes including equities, fixed income, infrastructure, real estate, diversified, multi-manager and multi-asset funds, for domestic and international customers. AMP Capital also provides commercial, industrial and retail real estate management services.

We have over 5,600 employees, around 750,000 shareholders and manage and administer \$257 billion in assets.

AMP Capital has a strategic alliance with leading Japanese bank, Mitsubishi UFJ Trust and Banking Corporation (MUFG: Trust Bank) through which MUFG: Trust Bank holds a 15% minority interest in AMP Capital Holdings Limited. AMP Capital holds a 15% stake in China Life AMP Asset Management Company Limited, a funds management company which offers retail and institutional investors in China access to leading investment solutions. AMP also owns a 19.99% stake in China Life Pension Company.

In this report, our business is divided into six areas: Australian wealth management, AMP Capital, AMP Bank, Australian wealth protection, New Zealand financial services and Australian mature.

The *Australian wealth management* business provides customers with superannuation, retirement income, investment, SMSF software and administration and financial advice services (through aligned and owned advice businesses).

AMP Capital is a diversified investment manager, managing investments across major asset classes including equities, fixed interest, infrastructure, real estate, diversified, multi-manager and multi-asset funds.

AMP Bank is an Australian retail bank offering residential mortgages, deposits, transaction banking, and SMSF products for around 100,000 customers. It also has a small portfolio of practice finance loans supporting AMP's adviser network. AMP Bank distributes through brokers, AMP advisers, and direct to retail customers via phone and internet banking.

Australian wealth protection comprises term life, disability and income protection insurance products sold on an individual and group basis. Insurance products can be bundled with a superannuation product or held independently.

New Zealand financial services provides tailored financial products and solutions to New Zealanders both directly and through a network of financial advisers. New Zealand financial services has a leading market position in both wealth protection and wealth management, in addition to being the market leader in advice and in providing support to advisers.

Australian mature is the largest closed life insurance business in Australia. Australian mature assets under management comprises capital guaranteed products (76%) and market linked products (24%). Australian mature products include whole of life, endowment, investment linked, investment account, Retirement Savings Account, Eligible Rollover Fund, annuities, insurance bonds, personal superannuation and guaranteed savings accounts.

Commentary on the results

for the year ended 31 December 2017

2017 performance

The profit attributable to shareholders of AMP Limited for the year ended 31 December 2017 was \$848 million (2016: loss of \$344 million).

Basic earnings per share for the year ended 31 December 2017 on a statutory basis were 29.3 cents per share (2016: loss of 11.7 cents per share). On an underlying basis, the earnings per share were 35.5 cents per share (2016: 16.4 cents per share).

Key performance measures were as follows:

- 2017 underlying profit of \$1,040m increased 114% from \$486m in 2016, driven by the recovery in Australian wealth protection earnings and strong operating earnings growth from AMP Bank (+17%) and AMP Capital (+8%).
- Australian wealth protection earnings of \$110 million increased \$525 million on 2016, reflective of the steps taken to stabilise the business in the second half of 2016 and in 2017.
- Australian wealth management earnings declined 2.5% from 2016, largely due to margin compression from MySuper transitions, increased variable remuneration and a reset of the investment management agreement with AMP Capital.
- Underlying investment income decreased \$27 million to \$95 million from 2016, due to lower shareholder capital resources and a 50 bp reduction in the assumed underlying after-tax rate of return.
- Australian wealth management net cashflows were \$931 million, up 177% from 2016. AMP's retail and corporate super platform net cashflows were positively impacted by changes to superannuation contribution limits in 2017 and large mandate wins.
- AMP Capital external net cashflows were \$5,477 million, up from \$967 million in 2016. Inflows were driven by strong flows into fixed income and real asset (infrastructure and real estate) asset classes.
- Underlying return on equity rose 8.7 percentage points to 14.3% in 2017 from 2016, reflecting significantly improved profitability and the impact of capital management programs.

AMP's total assets under management (AUM) and administration were \$257 billion at 31 December 2017 (2016: \$240 billion).

Operating results by business area

The operating results of each business area for 2017 were as follows:

- *Australian wealth management* – operating earnings dropped by \$10 million (2.5%) from 2016 to \$391 million in 2017. The decline in operating earnings was largely due to margin compression from MySuper transitions, increased variable remuneration associated with improved group performance plus a reset of the investment management agreement with AMP Capital.
- *AMP Capital* – AMP group's 85% share of AMP Capital's 2017 operating earnings was \$156 million, up 8% from \$144 million in 2016. AMP Capital's operating earnings benefited from strong fee income growth of 7%, partially offset by a 5% increase in controllable costs.
- *AMP Bank* – Operating earnings increased \$20 million (17%) to \$140 million in 2017 from 2016. Total revenue increased 17% in 2017 from 2016, primarily driven by growth in the loan portfolio.
- *Australian wealth protection* – Operating earnings improved by \$525 million to \$110 million in 2017 from 2016, with improved experience more than offsetting lower profit margins. Profit margins fell by \$76 million (43%) from 2016 to \$99 million in 2017, largely due to the strengthening of assumptions at 2016, the implementation of a 50% quota share reinsurance arrangement with Munich Reinsurance Company of Australasia (Munich Re) on 1 November 2016 and the implementation of a second tranche of reinsurance transactions on 1 November 2017 with General Reinsurance Life Australia Limited (Gen Re) and Munich Re. Total reinsurance cover on AMP's retail book is now equivalent to 65% of individual risk API. The impact of assumption changes and reinsurance arrangements were partially offset by a reduction in controllable costs.
- *New Zealand financial services* – In New Zealand Dollar terms, operating earnings increased by \$1 million (1%) to \$135 million as a result of higher profit margins, partially offset by lower experience profits. In Australian Dollar terms, operating earnings decreased by \$1 million (1%) following the depreciation of the New Zealand Dollar relative to the Australian Dollar.
- *Australian mature* – 2017 operating earnings of \$150 million decreased \$1 million from 2016 due to the expected portfolio run-off (\$9 million decrease) offset by improved experience (\$5 million increase), investment markets (\$2 million increase) and lower controllable costs (\$1 million increase)

Commentary on the results

for the year ended 31 December 2017

Capital management and dividend

Equity and reserves of the AMP group attributable to shareholders of AMP Limited decreased to \$7.2 billion at 31 December 2017 from \$7.5 billion at 31 December 2016.

AMP remains well capitalised, with \$2.3 billion in shareholder regulatory capital resources, above minimum regulatory requirements (MRR) at 31 December 2017 (\$2.2 billion at 31 December 2016).

AMP's final 2017 dividend is 14.5 cents per share, franked to 90%. This represents a full year 2017 dividend payout ratio of 81% of underlying profit. AMP will continue to offer the dividend reinvestment plan (DRP) to eligible shareholders. For the 2017 final dividend, no discount will apply to the DRP allocation price. AMP intends to neutralise the impact of the DRP by acquiring shares on-market to satisfy any entitlements under the DRP.

Strategy and prospects

AMP is positioned to take advantage of positive long-term demographic and market trends, operating in large and growing markets where competition is rational and where AMP has a distinct competitive advantage. The company is pursuing a clear strategy for long-term growth with four key priorities:

- tilting investment to higher growth businesses with strong market positions, while releasing and recycling capital from lower growth businesses
- transforming the core Australian business to focus on helping customers achieve their goals
- managing costs to continue growing profitably in a margin compressed world, and
- expanding internationally by leveraging AMP's key strengths into new markets, specifically Europe, North America, China and Japan.

This strategy is expected to drive improved business performance and growth with the expectation that AMP will meet its 15% return on equity hurdle in 2018.

AMP is well progressed with a portfolio review of the manage for value businesses with all alternatives being considered. As a result, AMP is in discussions with a number of interested parties. While the portfolio review is yet to be concluded, AMP expects to be in a position to provide a further update at or before AMP's 2018 AGM.

1. Tilt investment to higher growth businesses

AMP is focused on delivering growth across the portfolio by focusing investment in its high growth businesses, including Australian wealth management, AMP Bank and AMP Capital.

A key priority is to grow in the expanding \$3.3 trillion¹ Australian wealth management market, where AMP holds the number one² market share position in superannuation, advice, and SMSF and the number two market share position in retirement incomes.

AMP is investing in Australian wealth management to grow its distinctive competitive advantages. In 2018, AMP is targeting additional revenue equivalent to 2% of AUM fees from its Advice and SMSF businesses. This investment will also help Australians get more advice, more often through our goals-based operating system which will also improve productivity and drive new revenue streams.

AMP Bank continues to grow strongly and represents a significant opportunity for AMP by integrating debt and cashflow management strategies into our goals-based offers, particularly across its aligned advice network and broker proposition. AMP Bank offers an opportunity for the group to engage with customers earlier in their financial life cycle, with products and services that provide higher levels of interaction. Delivering on this strategy is expected to double the value of AMP Bank over five years.

AMP Capital has demonstrated consistent and sustainable earnings growth and is focused on growing domestically while also extending its geographic reach and investment in distribution capabilities across selected markets. By utilising its strengths in the management of real assets, AMP Capital has further opportunity to capture attractive revenues and is targeting double-digit earnings growth through the cycle.

2. Transform

AMP is transforming its core Australian businesses to be more customer centric, based on helping more people achieve their life goals.

AMP is aiming to make its goals-based approach to financial advice more relevant, accessible and affordable for its customers, and at the same time, more efficient and profitable for AMP and its strong network of aligned advisers. AMP is also giving customers more ways to interact with the company by creating an omni-channel experience with new digital and direct channels that complement its existing multi-branded face-to-face advice experience.

AMP is rolling out its technology-enabled, goals-based advice platform to AMP Advice. In second half 2017, AMP formalised a partnership with US advice business United Capital to collaborate as AMP develops its new operating system. By the end of 2017, 26 practices with over 200 financial advisers were operating under the new AMP Advice model. They will deliver a better and more relevant customer outcome and experience, greater adviser productivity and improved advice practice profitability.

1 ABS Managed Funds Report, Managed Funds Industry, September 2017.

2 Fund Market Overview Retail – Marketer, Strategic Insight (Plan for Life), September 2017.

Commentary on the results

for the year ended 31 December 2017

3. Manage costs

AMP continues to deliver market-leading cost efficiency and in 2017 operating model and organisational design changes delivered efficiency gains which reduced controllable costs by 3%. AMP (excluding AMP Capital) has an ambition to keep controllable costs flat in the medium term. Run rate savings from initiatives in 2017 and benefits from other strategic cost initiatives will help deliver this outcome in 2018.

4. Expand internationally

AMP is expanding internationally, primarily through AMP Capital, in high-growth regions where its expertise and capabilities are in demand. AMP has built strong partnerships with national champion companies in China and Japan and is capitalising on demand for its infrastructure, real estate and fixed income capabilities across Asia, Europe and North America.

In the second half of 2017, AMP announced an agreement to purchase a minority stake in US-based real estate investment manager PCCP to provide commercial debt and equity capital for middle market investments throughout the US.

AMP's relationships with China Life continue to strengthen. China Life Asset Management Company Limited (CLAMP) is the fastest growing new asset management company in China while China Life Pension Company (CLPC) ranks first in trustee services with 31% market share and third in investment management with 11% market share. CLPC is expected to benefit from the implementation of new regulations for Occupational Pensions in China in coming years. AMP is targeting earnings of around \$50 million per annum from the China businesses within five years.

AMP Capital's relationship with its Japanese strategic partner MUFG: Trust Bank also remains strong with the alliance enhanced and renewed during the first quarter of 2017.

Strategies and prospects by business area³

Australian wealth management

Australian wealth management's key priorities are to:

- build the goals-based advice model of the future and improve the quality of the advice experience
- maintain competitive platforms to access the retail and corporate superannuation markets
- increase revenues in Advice and SMSF while remaining vigilant on cost control
- increase channel choice and deliver an integrated customer experience
- use new capabilities to design customer centric offers covering advice, product and service, and
- develop a strong SMSF capability with a focus on building scale, efficiency and profitable growth over the medium term.

AMP Capital

Working as a trusted partner to clients, AMP Capital's key priorities are to deliver an outstanding investment experience for clients and to generate revenue growth through:

- delivering investment outcomes to clients specific to their goals
- building a differentiated client experience driving strong client engagement
- partnering effectively across the AMP group to deliver investment solutions for retail, SMSF and corporate super customers
- expanding the global pension fund client base via enhanced distribution of real asset funds, and
- building preferential distribution partnerships in select Asian markets, particularly Japan and China.

AMP Bank

As the banking arm of a wealth manager, AMP Bank's role is to leverage and grow the group's customer base and support customer goals through providing banking solutions to both advised and non-advised customers as well as providing finance to AMP Advice businesses. In aligning with this strategic imperative, AMP Bank's priorities are to:

- build a superior advice and broker support network and proposition
- deliver compelling customer-centric banking propositions to AMP group target customer segments
- make banking easier for customers by investing in technology and service excellence
- leverage AMP group investments to build out capabilities in direct and digital
- maintain a conservative risk appetite and continue to invest in risk management capabilities
- continue to optimise AMP Bank's funding sources.

Australian wealth protection

Australian wealth protection's key priorities are to:

- focus on pricing, claims and lapse management to improve margins, and
- provide a high-quality customer experience.

³ Forward looking statements in the directors' report are based on management's current views and assumptions and involve known and unknown risks and uncertainties, many of which are beyond AMP's control and could cause actual results, performance or events to differ materially from those expressed. These forward looking statements are not guarantees or representations of future performance, and should not be relied upon.

Commentary on the results

for the year ended 31 December 2017

New Zealand financial services

New Zealand financial services has the following key priorities to grow shareholder value:

- deepen its customer relationships
- re-engineer wealth protection to increase product attractiveness
- grow scale and capture margin in wealth management
- evolve advice and distribution capability
- leverage the KiwiSaver opportunity
- build on our general insurance partnership
- continue its focus on cost control.

Australian mature

Key priorities for management are to continue to manage Australian Mature for yield and capital efficiency.

The Australian mature business remains in slow decline but is expected to remain profitable for many years. It is expected to run off at around 5% per annum. However, in volatile investment markets, this run-off rate can vary substantially. The run-off of AUM is anticipated to have an average duration of approximately 13 years, but will be impacted by investment markets.

Key risks

Risk is inherent to our business and AMP takes measured risks to achieve our strategic objectives. We have a clear strategic plan to drive our business forward and an Enterprise Risk Management framework to identify, understand and manage risks.

The Enterprise Risk Management (ERM) framework is designed to enable AMP to identify, assess, respond, monitor and review current and emerging risks that can affect our business. We recognise that effective risk management is supported by appropriate behaviour by our employees and we are committed to driving a risk aware culture.

AMP's ERM framework includes a risk management strategy which establishes the principles, requirements, roles and responsibilities for the management of risk across AMP. It also includes a risk appetite statement which articulates the nature and level of risk the board is willing to accept in the pursuit of strategic objectives. Alignment between AMP's corporate strategy and the risk appetite of the AMP Limited Board ensures that risks taken are consistent with the nature and level of risk the board is willing to accept.

Key business challenges

Given the nature of our business environment we continue to face challenges that could have an adverse impact on the delivery of our strategy. The most significant business challenges (in no particular order of importance) include, but are not limited to:

Competitor and customer environment

Our strategy is set based on existing and expected business environmental factors including business cycle, technology, customer preferences and competitive landscape. Significant changes in these environmental factors may disrupt AMP's business operations. For example, a significant change in customer preferences may impact sales volumes, revenue and customer satisfaction.

AMP has programs in place aimed at anticipating and responding to threats and opportunities that arise from changing customer preferences and competitor strategies and capabilities.

Cyber security threats

Cyber risk continues to be a focus area across all industries. We recognise that cyber risk will continue to be a threat in a rapidly changing technological environment and that the magnitude and costs of cybercrime vary depending on the nature of the attack.

AMP is committed to investing in enhancing our cyber security network and we have several detective, preventative and responsive controls to protect our assets and networks. While we are committed to enhancing our cyber security network, we recognise it is inevitable that cyber-attacks will occur. In assessing and mitigating cybercrime, we regularly consider vulnerabilities and potential ways to mitigate failures of people, processes and technology.

Commentary on the results

for the year ended 31 December 2017

Organisational change

AMP's promise to help people 'own tomorrow' requires continuous updating of products, services and customer experiences. Managing continuous change can place significant pressure on employees.

AMP has invested heavily into developing new approaches, models and ways of working to drive efficiency. We recognise that failure to appropriately manage the implementation of these changes can cause disruption to AMP's business operations. To manage this, AMP has dedicated resources with appropriate skills and expertise who establish change programs and manage the transition.

Business, employee and business partner conduct

The conduct of financial institutions is an area of significant focus. There is a risk that business practices and management, staff or business partner behaviours may not deliver the outcomes desired by AMP or meet the expectations of regulators and customers. An actual or perceived shortcoming in conduct by AMP or its business partners may undermine our reputation and draw increased attention from regulators.

AMP is committed to establishing a culture of help, integrity and performance. Our code of conduct outlines the minimum standards of behaviour and decision making and our expectations for how we treat our employees, customers, business partners and shareholders.

AMP also works to provide a safe and respectful environment that encourages all staff to be confident and speak out about any potential conduct issues. All employees, contractors and third parties can use the Your Call program to raise concerns including regarding unethical behaviours as a whistleblower. The Group Chief Risk Officer (CRO) is AMP's designated Whistleblower Protection Officer, and has direct access to the CEO and board.

Further to this, we are committed to ensuring the right culture is embedded in our everyday practices, with risk explicitly considered as part of the remuneration framework. The Group CRO is also given an additional discretion to adjust the bonus pool for significant failures in conduct or risk management.

Regulatory environment

AMP operates in multiple jurisdictions across the globe. Each one of these jurisdictions has legislative and regulatory requirements that AMP is committed to meeting. These requirements are also subject to reform.

AMP has established internal policies, frameworks and procedures to seek to ensure our domestic and international regulatory obligations are met in each jurisdiction. Processes are also in place to manage the implications of regulatory change on our business performance.

AMP has developed a curriculum of mandatory compliance training that all employees must undertake to ensure awareness of their general compliance obligations.

Regulatory and compliance risks, breaches, consultations and general interactions are reported as part of our internal risk and compliance reporting process, and to the relevant regulators as and when required. At any point in time, a number of investigations, consultations and general interactions may be in progress with our key regulators. We actively participate in these interactions and fully cooperate with regulators on such matters.

The Australian financial services industry is currently responding to a Royal Commission into Misconduct in the Banking, Superannuation and Financial Services Industry, established on 14 December 2017. The outcomes of this Royal Commission for AMP and the industry are uncertain at this time. AMP has welcomed the opportunity to contribute to the Royal Commission and supports its intent to provide certainty to the financial system and help restore the community's trust and confidence in the industry.

Commentary on the results

for the year ended 31 December 2017

Material risk types

AMP has categorised risk in seven material risk types which are monitored, assessed and reported to the board and relevant committees to ensure that risk is managed appropriately. The risk types and definitions are noted below. The section should be read in conjunction with the corporate governance statement relevant to risk management.

Risk type	Definition
Strategic risk	Risk of loss or foregone value associated with strategic decisions and competitive positioning of the business and our ability to respond in a timely manner to changes in the regulatory, customer or competitive landscape.
Credit risk	The risk of loss or foregone value due to non-payment of a contractually required payment by a counterparty.
Market risk	The risk of loss or foregone value due to adverse movements in market prices and investment values. This may be due to economic changes or events that have an impact on large portions of the market.
Insurance risk	The risk of loss due to adverse developments in morbidity/mortality rates, longevity, expense, and changes to policyholder behaviour.
Liquidity risk	The risk of loss due to an inability to fund or trade liquidity risk at a given period to meet debt obligations at a reasonable price.
Concentration risk	The risk of loss due to a series of exposures with the potential to produce large enough losses. It may arise in the form of credit concentration, market correlation, cross risk types, pandemic, which may have been accumulated over time.
Operational risk	Risk of loss resulting from inadequate or failed internal processes and systems or from external events.

The environment

In the normal course of its business operations, AMP is subject to a range of environmental regulations of which there have been no material breaches during the year. You can find further information about AMP's environment policy and activities at amp.com.au/corporate-sustainability.

Significant changes to the state of affairs

Details of changes in AMP's strategic priorities are set out earlier in this report.

Events occurring after the reporting date

As at the date of this report, the directors are not aware of any matter or circumstance that has arisen since the reporting date that has significantly affected or may significantly affect the entity's operations in future years; the results of those operations in future years; or the entity's state of affairs in future years which is not already reflected in this report, other than the following announcements made on 8 February 2018 of:

- A final dividend on ordinary shares of 14.5 cents per share. Details of the announced dividend and dividends paid and declared during the year are disclosed in Note 1.4 of the preliminary final report.

1 Reserve to recognise the additional loss and subsequent transfer from shareholders' retained earnings on the demerger of AMP's UK operations in December 2003. The loss was the difference between the pro-forma loss on demerger and the market-based fair value of the UK operations.

2 The Share-based payment reserve represents the cumulative expense recognised in relation to equity-settled share-based payments less the cost of shares purchased on market in respect of entitlements.

3 The Capital profits reserve represents gains attributable to shareholders of AMP on the sale of minority interests in controlled entities to entities outside the AMP group.

4 Dividends paid include dividends paid on treasury shares. Dividends paid on treasury shares are required to be excluded from the consolidated financial statements by adjusting retained earnings.

Consolidated statement of cash flows

for the year ended 31 December 2017

	Note	2017 \$m	2016 \$m
Cash flows from operating activities¹

Effect of exchange rate changes on cash and cash equivalents		(8)	5
Cash and cash equivalents at the end of the year¹	7.1	7,222	8,810

1 Cash flows and cash and cash equivalents include amounts attributable to shareholders' interests, policyholders' interests in AMP Life's statutory funds and controlled entities of those statutory funds, external unitholders' interests and non-controlling interests. Cash equivalents for the purpose of the Consolidated statement of cash flows includes short-term bills and notes.

2 Dividends and distributions received are amounts of cash received mainly from investments held by AMP life insurance entities' statutory funds and controlled entities of the statutory funds. Dividends and distributions reinvested have been treated as non-cash items.

3 Net proceeds from sale of (payments to acquire) investments in financial assets also includes loans and advances made (net of payments) and purchases of financial assets (net of maturities) during the period by AMP Bank.

4 The Dividends paid amount is presented net of dividends on treasury shares.

Notes to the financial statements

for the year ended 31 December 2017

About this financial information**(a) Basis of consolidation**

Entities are fully consolidated from the date of acquisition, being the date on which the AMP group obtains control, and continue to be consolidated until the date that control ceases. Control exists where the AMP group is exposed, or has rights, to variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity.

Income, expenses, assets, liabilities and cash flows of controlled entities are consolidated into the AMP group financial statements, along with those attributable to the shareholders of the parent entity. All inter-company transactions are eliminated in full, including unrealised profits arising from intra-group transactions.

When a controlled managed investment scheme is consolidated, the share of the unitholder liability attributable to the AMP group is eliminated but amounts due to external unitholders remain as liabilities in the Consolidated statement of financial position. The share of the net assets of controlled entities attributable to non-controlling interests is disclosed as a separate line item on the Consolidated statement of financial position.

Materiality

Information has only been included in the preliminary final report to the extent that it has been considered material and relevant to the understanding of the financial statements. A disclosure is considered material and relevant if, for example:

- the amount in question is significant because of its size or nature;
- it is important for understanding the results of the AMP group;
- it helps explain the impact of significant changes in the AMP group; and/or
- it relates to an aspect of the AMP group's operations that is important to its future performance.

(b) Significant accounting policies

The significant accounting policies adopted in the preparation of the preliminary final report are contained in the notes to the financial statements to which they relate. All accounting policies have been consistently applied to the current year and comparative period, unless otherwise stated. Where an accounting policy relates to more than one note or where no note is provided, the accounting policies are set out below.

Fee revenue

Fees are charged to customers in connection with investment contracts and other financial services contracts. Fee revenue is recognised as services are provided either at inception of the contract or as they are performed over the life of the contract. For example fees for ongoing investment management services and other services provided are charged on a regular basis, usually daily, and are recognised as the service is provided.

Interest, dividends and distributions income

Interest income is recognised when the AMP group obtains control of the right to receive the interest. Revenue from dividends is recognised when the AMP group's right to receive payment is established.

Foreign currency transactions

Transactions, assets and liabilities denominated in foreign currencies are translated into Australian dollars (the functional currency) using the following applicable exchange rates:

Foreign currency amount	Applicable exchange rate
Transactions	Date of transaction
Monetary assets and liabilities	Reporting date
Non-monetary assets and liabilities carried at fair value	Date fair value is determined

Foreign exchange gains and losses resulting from translation of foreign exchange transactions are recognised in the Consolidated income statement, except for qualifying cash flow hedges, which are deferred to equity.

On consolidation the assets, liabilities, income and expenses of foreign operations are translated into Australian dollars using the following applicable exchange rates:

Foreign currency amount	Applicable exchange rate
Income and expenses	Average exchange rate
Assets and liabilities	Reporting date
Equity	Historical date
Reserves	Reporting date

Foreign exchange differences resulting from translation of foreign operations are initially recognised in the foreign currency translation reserve and subsequently transferred to the Consolidated income statement on disposal of the foreign operation.

Notes to the financial statements

About this financial information

(c) Critical judgements and estimates

Preparation of the financial statements requires management to make judgements, estimates and assumptions about future events.

Information on critical judgements and estimates considered when applying the accounting policies can be found in the following notes:

Accounting judgements and estimates	Note	
Tax	1.3	Taxes
Fair value of financial assets	2.1	Investments in financial instruments
Goodwill and acquired intangible assets	2.2	Intangibles
Life insurance and investment contract liabilities	4.1	Accounting for life insurance and investment contracts
Consolidation	6.1	Controlled entities
Provisions	7.3	Provisions

For personal use only

Notes supporting the financial information

for the year ended 31 December 2017

Section 1: Results for the year

This section provides insights into how the AMP group has performed in the current year and provides additional information about those individual line items in the financial statements that the directors consider most relevant in the context of the operations of the AMP group.

Statutory measures of performance disclosed in this report are:

- Statutory earnings per share (EPS) - basic and diluted
- Annual dividend
- Profit after tax attributable to the shareholders of AMP

Underlying profit is AMP's key measure of business performance. This performance measure is disclosed by the AMP operating segment within Segment performance.

- 1.1 Segment performance
- 1.2 Earnings (loss) per share
- 1.3 Taxes
- 1.4 Dividends

1.1 Segment performance

The AMP group identifies its operating segments based on separate financial information that is regularly reviewed by the Chief executive officer and his immediate team in assessing performance and determining the allocation of resources. The operating segments are identified according to the nature of profit generated and services provided, and their performance is evaluated based on a post-tax operating earnings basis.

Reportable segment	Segment description
Australian wealth management (WM)	Financial advice services (through aligned and owned advice businesses), platform administration (including SMSF), unit-linked superannuation, retirement income and managed investment products business. Superannuation products include personal and employer sponsored plans.
AMP Capital	A diversified investment manager with a growing international presence, providing investment services for domestic and international customers. AMP Capital manages investments across major asset classes including equities, fixed interest, real estate, infrastructure and multi-manager and multi-asset funds. AMP Capital also provides commercial, industrial and retail real estate management services. AMP Capital and Mitsubishi UFJ Trust and Banking Corporation (MUFG: Trust Bank) have a strategic business and capital alliance, with MUFG: Trust Bank holding a 15% ownership interest in AMP Capital. In November 2013, AMP Capital established a funds management company in China with China Life called China Life AMP Asset Management Company Limited (CLAMP). AMP Capital is a founding shareholder, holding a 15% stake, with the balance held by China Life Asset Management Company, a subsidiary of China Life.
Australian wealth protection (WP)	Includes individual and group term, disability and income protection insurance products. Products can be bundled with a superannuation product or held independently of superannuation.
AMP Bank	Australian retail bank offering residential mortgages, deposits, transaction banking and SMSF products. It also has a portfolio of practice finance loans. AMP Bank distributes through AMP's aligned distribution network as well as third party brokers, and direct to retail customers via phone and online.
New Zealand financial services (NZFS)	Risk insurance, wealth management and mature book (traditional participating business), with growth in wealth management driven by KiwiSaver.
Australian mature (Mature)	A business comprising products which are largely closed to new business and are in run-off. Products within Australian mature include whole of life, endowment, investment-linked, investment account, Retirement Savings Account, Eligible Rollover Fund, annuities, insurance bonds, personal superannuation and guaranteed savings accounts.

Segment information is not reported for activities of the AMP group office companies as it is not the function of these departments to earn revenue and any revenues earned are incidental to the activities of the AMP group.

Depreciation and amortisation	78	11	26	-	6	9	130

1 AMP Capital segment revenue is reported net of external investment manager fees. Segment profit after income tax is reported net of 15% minority interest attributable to MUFG: Trust Bank.

2 Segment revenue is reported as Segment profit after income tax for WP, NZFS and Mature. This represents gross revenue less claims, expenses, movement in insurance contract liabilities and tax.

3 Segment revenue and other segment information excludes revenue, expenses and tax relating to assets backing policyholder liabilities.

4 Intersegment revenue represents operating revenue between segments priced on an arm's-length basis and is eliminated on consolidation.

Notes supporting the financial information

for the year ended 31 December 2017

Section 1: Results for the year

1.1 Segment performance (continued)

(b) Reconciliations

Segment profit after income tax differs from Profit attributable to shareholders of AMP Limited due to the exclusion of the following items:

	2017	2016
	\$m	\$m
Segment profit after income tax	1,072	527
Group office costs	(74)	(104)
Total operating earnings	998	423
Underlying investment income ¹	95	122
Interest expense on corporate debt	(53)	(59)
Underlying profit	1,040	486
Other items ²	(21)	(9)
Portfolio review and related costs	(24)	-
Business efficiency program costs	-	(19)
Amortisation of AMP AAPH acquired intangible assets	(80)	(77)
Goodwill impairment	-	(668)
Profit (loss) before market adjustments and accounting mismatches	915	(287)
Market adjustment - investment income ¹	(39)	(46)
Market adjustment - annuity fair value ³	4	(8)
Market adjustment - risk products ⁴	(18)	11
Accounting mismatches	(14)	(14)
Profit (loss) attributable to shareholders of AMP Limited	848	(344)
Profit attributable to non-controlling interests	25	536
Profit for the year	873	192

1 Underlying investment income consists of investment income on shareholder assets invested in income producing investment assets normalised by eliminating the impact of short-term market volatility on underlying performance. Underlying returns are set based on long-term expected returns for each asset class, except for a short-term return, equivalent to a one-year government bond, set annually for the implicit deferred acquisition costs (DAC) component of shareholder assets. Market adjustment - investment income is the excess (shortfall) between the underlying investment income and the actual return on shareholder assets invested in income producing investment assets.

2 Other items largely comprise the net of one-off and non-recurring revenues and costs, including the cost of implementing significant regulatory changes.

3 Market adjustment - annuity fair value relates to the net impact of investment markets on AMP's annuity portfolio.

4 Market adjustment - risk products relates to the net impact of changes in market economic assumptions (bond yields and CPI) on the valuation of risk insurance liabilities.

Notes supporting the financial information

for the year ended 31 December 2017

Section 1: Results for the year**1.1 Segment performance (continued)**

Total segment revenue differs from Total revenue as follows:

	2017	2016
	\$m	\$m
Total segment revenue	3,010	2,394
Add revenue excluded from segment revenue		
- Investment gains and losses - shareholders and policyholders (excluding AMP Bank interest revenue)	11,019	7,775
- Revenue of investment entities controlled by the life entities' statutory funds which carry out business operations unrelated to the core wealth management operations of the AMP group	-	19
- Other revenue	88	121
Add back expenses netted against segment revenue		
- Claims, expenses, movement in insurance contract liabilities and tax relating to Australian wealth protection, Australian mature and New Zealand financial services	2,846	3,171
- Interest expense related to AMP Bank	515	490
- External investment manager and adviser fees paid in respect of certain assets under management	1,248	1,164
Remove intersegment revenue	(365)	(335)
Total revenue	18,361	14,799

(c) Segment assets

Asset segment information has not been disclosed because the balances are not provided to the Chief executive officer or his immediate team for the purpose of evaluating segment performance, or in allocating resources to segments.

Notes supporting the financial information

for the year ended 31 December 2017

Section 1: Results for the year**1.2 Earnings (loss) per share****Basic earnings (loss) per share**

Basic earnings (loss) per share is calculated based on profit (loss) attributable to shareholders of AMP Limited (AMP) and the weighted-average number of ordinary shares outstanding.

	2017	2016
Profit (loss) attributable to shareholders of AMP (\$m)	848	(344)
Weighted average number of ordinary shares (millions) ¹	2,896	2,929
Basic earnings (loss) per share (cents per share)	29.3	(11.7)

Diluted earnings (loss) per share

Diluted earnings (loss) per share is based on profit (loss) attributable to shareholders of AMP Limited (AMP) and the weighted-average number of ordinary shares outstanding after adjustments for the effects of all dilutive potential ordinary shares, such as options and performance rights.

	2017	2016
Profit (loss) attributable to shareholders of AMP (\$m)	848	(344)
Weighted average number of ordinary shares (millions) – diluted:		
- Weighted average number of ordinary shares ¹	2,896	2,929
- Add: potential ordinary shares considered dilutive ²	22	19
Weighted average number of ordinary shares used in the calculation of dilutive earnings (loss) per share	2,918	2,948
Diluted earnings (loss) per share (cents per share)	29.1	(11.7)

- 1 The weighted average number of ordinary shares outstanding is calculated after deducting the weighted average number of treasury shares held during the period.
- 2 Performance rights have been determined to be dilutive, however, if these instruments vest and are exercised, it is AMP's policy to buy AMP shares on market so there will be no dilutive effect on the value of AMP shares.

Notes supporting the financial information

for the year ended 31 December 2017

Section 1: Results for the year**1.3 Taxes****Our taxes**

This sub-section outlines the impact of income taxes on the results and financial position of AMP. In particular:

- the impact of tax on the reported result;
- amounts owed to/receivable from the tax authorities;
- deferred tax balances that arise due to differences in the tax and accounting treatment of balances recorded in the Preliminary final report; and
- discussion of the impacts of life insurance policyholder tax.

These financial statements include the disclosures relating to tax required under accounting standards. Further information on AMP's tax matters can be found in the AMP Tax Report at www.amp.com.au.

(a) Income tax expense

The income tax expense amount reflects the impact of both income tax attributable to shareholders as well as income tax attributable to policyholders. In respect of income tax expense attributable to shareholders, the tax rate which applies is 30% in Australia and 28% in New Zealand.

Income tax attributable to policyholders is based on investment income allocated to policyholders less expenses deductible against that investment income. The impact of the tax is charged against policyholder liabilities. A number of different tax rate regimes apply to policyholders. In Australia, certain classes of policyholder life insurance income and superannuation earnings are taxed at 15%, and certain classes of income on some annuity business are tax-exempt. The rate applicable to New Zealand life insurance business is 28%.

The following table provides a reconciliation of differences between prima facie tax calculated as 30% of the profit before income tax for the year and the income tax expense recognised in the Consolidated income statement for the year.

	2017 \$m	2016 \$m
Profit before income tax	1,636	358
Policyholder tax expense recognised as part of the change in policyholder liabilities in determining profit before tax	(472)	(121)
Profit before income tax excluding tax charged to policyholders	1,164	237
Tax at the Australian tax rate of 30% (2016: 30%)	(349)	(71)
Shareholder impact of life insurance tax treatment	(33)	(16)
Tax concessions including research and development and offshore banking unit	8	5
Non-deductible expenses	(27)	(19)
Non-taxable income	16	5
Other items	24	5
Non-controlling interests ¹	-	154
Goodwill impairment	-	(200)
Over provided in previous years after excluding amounts attributable to policyholders	3	14
Utilisation of previously unrecognised tax losses	53	69
Differences in overseas tax rates	14	9
Income tax expense attributable to shareholders and non-controlling interest	(291)	(45)
Income tax (expense) credit attributable to policyholders	(472)	(121)
Income tax expense per Income statement	(763)	(166)

¹ \$Nil (2016: \$513m) profit attributable to non-controlling interests in investment entities controlled by the AMP life insurance entities' statutory funds is not subject to tax.

Section 1: Results for the year

1.3 Taxes (continued)

Accounting policy – recognition and measurement

Income tax expense

Income tax expense is the tax payable on taxable income for the current period based on the income tax rate for each jurisdiction and adjusted for changes in deferred tax assets and liabilities. These changes are attributable to:

- temporary differences between the tax bases of assets and liabilities and their Consolidated statement of financial position carrying amounts;
- unused tax losses;
- the impact of changes in the amounts of deferred tax assets and liabilities arising from changes in tax rates or in the manner in which these balances are expected to be realised.

Adjustments to income tax expense are also made for any differences between the amounts paid, or expected to be paid, in relation to prior periods and the amounts provided for these periods at the start of the current period.

Any tax impact on income and expense items that are recognised directly in equity is also recognised directly in equity.

Income tax for investment contracts business and life insurance contracts business

The income tax expense recognised in the Consolidated income statement of the AMP group, which arises in respect of AMP Life, reflects tax imposed on shareholders as well as policyholders. Investment contracts liabilities and life insurance contracts liabilities are established in Australia net, and in New Zealand gross, of the policyholders' share of any current tax payable and deferred tax balances of the AMP group. Arrangements made with some superannuation funds result in AMP Life making payments to the Australian Taxation Office in relation to contributions tax arising in those funds. The amounts paid are recognised as a decrease in investment contract liabilities and not included in income tax expense.

Deferred tax

Deferred tax assets and liabilities are recognised for temporary differences and are measured at the tax rates which are expected to apply when the assets are recovered or liabilities are settled, based on tax rates that have been enacted or substantively enacted for each jurisdiction at the reporting date. Deferred tax assets and liabilities, including amounts in respect of investment contracts and life insurance contracts, are not discounted to present value.

Deferred tax assets are recognised for deductible temporary differences and unused tax losses only if it is probable that future taxable amounts will be available to utilise those temporary differences and losses.

Tax consolidation

AMP Limited and its wholly-owned Australian controlled entities are part of a tax-consolidated group, with AMP Limited being the head entity. A tax funding agreement has been entered into by the head entity and the controlled entities in the tax-consolidated group and requires entities to fully compensate the company for current tax liabilities and to be fully compensated by the company for any current or deferred tax assets in respect of tax losses arising from external transactions occurring after 30 June 2003, the implementation date of the tax-consolidated group.

Critical accounting estimates and judgements:

The AMP group is subject to taxes in Australia and other jurisdictions where it has operations. The application of tax law to the specific circumstances and transactions of the AMP group requires the exercise of judgement by management. The tax treatments adopted by management in preparing the financial statements may be impacted by changes in legislation and interpretations or be subject to challenge by tax authorities.

Judgement is also applied by management in determining the extent to which the recovery of carried forward tax losses is probable for the purpose of meeting the criteria for recognition as deferred tax assets.

Notes supporting the financial information

for the year ended 31 December 2017

Section 1: Results for the year**1.4 Dividends**

Dividends paid and proposed during the year are shown in the table below:

	2017	2017	2016	2016
	Final	Interim	Final	Interim
Dividend per share (cents)	14.5	14.5	14.0	14.0
Franking percentage	90%	90%	90%	90%
Cost (in \$m)	423	423	414	414
Payment date	28 March 2018	29 September 2017	31 March 2017	7 October 2016

	2017	2016
	\$m	\$m
Dividends paid		
Previous year final dividend on ordinary shares	414	414
Interim dividend on ordinary shares	423	414
Total dividends paid¹	837	828

1 Total dividends paid includes dividends paid on Treasury shares \$8m (2016: \$8m).

Dividend franking credits

Franking credits available to shareholders are \$275m (2016: \$342m), based on a tax rate of 30%. This amount is calculated from the balance of the franking account as at the end of the reporting period, adjusted for franking credits that will arise from the settlement, after the end of the reporting date, of liabilities for income tax and receivables for dividends.

The company's ability to utilise the franking account credits depends on meeting Corporations Act 2001 requirements to declare dividends. The impact of the proposed dividend will be to reduce the balance of the franking credit account by \$163m.

Franked dividends are franked at a tax rate of 30%.

Total financial assets measured at amortised cost	22,117	18,761
Total financial assets	136,675	129,419
Other financial liabilities		
Derivative financial liabilities	489	1,150
Collateral deposits held ²	102	192
Total other financial liabilities	591	1,342

1 Financial assets measured at fair value through profit or loss are mainly assets of the AMP life insurance entities' statutory funds and their controlled entities.

2 Included within debt securities are assets held to back the liability for collateral deposits for debt security repurchase arrangements entered into by the AMP life insurance entities' statutory funds and their controlled entities. Collateral deposits held are mostly in respect of the obligation to repay collateral for the debt security repurchase arrangements.

3 Financial assets measured at amortised cost are mainly assets of AMP Bank.

Notes supporting the financial information

for the year ended 31 December 2017

Section 2: Investments, intangibles and working capital

2.1 Investments in financial instruments (continued)

Accounting policy – recognition and measurement

Financial assets measured at fair value through profit or loss

Financial assets designated on initial recognition as *financial assets measured at fair value through profit or loss* are initially recognised at fair value determined as the purchase cost of the asset, exclusive of any transaction costs. Transaction costs are expensed as incurred in profit or loss. Any realised and unrealised gains or losses arising from subsequent measurement at fair value are recognised in the Consolidated income statement in the period in which they arise.

Available-for-sale financial assets

Financial assets which are neither designated as fair value through profit or loss nor measured at amortised cost are classified as available-for sale. Measurement is in accordance with financial assets measured at fair value through profit or loss but any unrealised gains or losses arising from subsequent measurement at fair value are taken to other comprehensive income and only transferred to profit and loss when they are realised.

Details on how the fair values for financial assets are determined following initial recognition are disclosed in note 2.5.

Financial assets measured at amortised cost

Loans, advances and other receivables which arise when AMP Bank provides money directly to a customer, including loans and advances to advisers, with no intention of trading the financial assets, are measured at amortised cost. All other debt securities held by AMP Bank are classified as held to maturity investments. Held to maturity investments are non-derivative assets with fixed or determinable payments and fixed maturities that management has the positive intention and ability to hold to maturity.

Financial assets measured at amortised cost are initially recognised at fair value plus transaction costs that are directly attributable to the acquisition or issue of the financial asset. These assets are subsequently recognised at amortised cost using the effective interest rate method.

Recognition and de-recognition of financial assets and liabilities

Financial assets and financial liabilities are recognised at the date the AMP group becomes a party to the contractual provisions of the instrument. Financial assets are de-recognised when the contractual rights to the cash flows from the financial assets expire, or are transferred. A transfer occurs when substantially all the risks and rewards of ownership of the financial asset are passed to an unrelated third party. Financial liabilities are de-recognised when the obligation specified in the contract is discharged, cancelled or expires.

Impairment of financial assets

Assets measured at fair value, where changes in fair value are reflected in the Consolidated income statement, are not subject to impairment testing.

For financial assets measured at amortised cost, including loans, advances, held to maturity investments and other receivables, impairment is recognised in the Consolidated income statement when there is objective evidence a loss has been incurred. It is measured as the difference between the carrying amount and the present value of estimated future cash flows, discounted at the original effective interest rate.

Critical accounting estimates and judgements:

Financial assets measured at fair value

Where available, quoted market prices for the same or similar instruments are used to determine fair value. Where there is no market price available for an instrument, a valuation technique is used. Management applies judgement in selecting valuation techniques and setting valuation assumptions and inputs.

- 1 Total goodwill comprises amounts attributable to shareholders of \$2,108m (2016: \$2,102m) and amounts attributable to policyholders of \$15m (2016: \$15m).

Notes supporting the financial information

for the year ended 31 December 2017

Section 2: Investments, intangibles and working capital

2.2 Intangibles (continued)

Accounting policy – recognition and measurement

Goodwill

Goodwill acquired in a business combination is recognised at cost and subsequently measured at cost less any accumulated impairment losses. The cost represents the excess of the cost of a business combination over the fair value of the identifiable assets acquired and liabilities assumed. Goodwill includes balances attributable to shareholders and balances attributable to policyholders in investment entities controlled by the AMP Life statutory funds.

Capitalised costs

Costs are capitalised when the costs relate to the creation of an asset with expected future economic benefits which are capable of reliable measurement. Capitalised costs are amortised on a straight-line basis over the estimated useful life of the asset, commencing at the time the asset is first put into use or held ready for use, whichever is the earlier.

Value of in-force business

The value of in-force business represents the fair value of future business arising from existing contractual arrangements of a business acquired as part of a business combination. The value of in-force business is initially measured at fair value and is subsequently measured at fair value less amortisation and any accumulated impairment losses.

Distribution networks

Distribution networks such as customer lists, financial planner client servicing rights or other distribution-related rights, either acquired separately or through a business combination, are initially measured at fair value and subsequently measured at cost less amortisation and any accumulated impairment losses.

Amortisation

Intangible assets with finite useful lives are amortised on a straight-line basis over the useful life of the intangible asset. The estimated useful lives are generally:

Item	Useful life
Capitalised costs	Up to 10 years
Value in-force business – wealth management and distribution businesses	10 years
Value in-force business – wealth protection and mature business	20 years
Distribution networks	3 – 15 years

The useful life of each intangible asset is reviewed at the end of the period and, where necessary, adjusted to reflect current assessments.

Notes supporting the financial information

for the year ended 31 December 2017

Section 2: Investments, intangibles and working capital**2.2 Intangibles (continued)****Impairment testing**

Goodwill and intangible assets that have indefinite useful lives are tested at least annually for impairment. Other intangible assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable.

For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash flows (cash-generating units or CGUs). An impairment loss is recognised when the goodwill carrying amount exceeds the CGU's recoverable amount.

Goodwill attributable to shareholders

The goodwill attributable to shareholders of \$2,108m (2016: \$2,102m) primarily arose from the acquisition of AMP AAPH Limited group in 2011, a previous Life Act Part 9 transfer of life insurance business into the statutory funds of AMP Life as well as other business combinations where the AMP group was the acquirer.

Based on their activities, each of the acquired businesses has been allocated to a CGU for the purpose of assessing goodwill as follows:

\$m	2017	2016
Australian wealth management	1,494	1,488
Australian mature	350	350
AMP Financial Services New Zealand	177	177
AMP Capital	87	87
	2,108	2,102

The recoverable amount for each CGU (excluding AMP Capital) has been determined by the fair value less costs of disposal based on the estimated embedded value plus the value of one year's new business times a multiplier of 10 to 15.

The estimated embedded value is a calculation that represents the economic value of the shareholder capital in the business and the future profits expected to emerge from the business currently in-force expressed in today's dollars.

The estimated embedded value and value of one year's new business has been calculated based on the following key assumptions and estimates:

- mortality, morbidity, discontinuance rates, maintenance unit costs, future rates of supportable bonus for participating business, franking credits, risk discount rates, investment returns and inflation rates;
- premium and claim amounts, estimated over the expected life of the in-force policies which varies depending on the nature of the product;
- future maintenance and investment expenses based on unit costs derived from budgeted amounts for the following year and increased in future years for expected rates of inflation;
- risk discount rate based on an annualised 10 year government bond yield plus a discount margin of 5% (2016: 5%-7%) for Australia and 5% for New Zealand (2016: 5%): Australia 7.6% (2016: 7.8%-9.8%), New Zealand 7.8% (2016: 8.4%), for calculating the value of in-force and new business.

Assumptions applied in this valuation are consistent with the best estimate assumptions used in calculating the policy liabilities for AMP Life (excluding the risk discount rate).

Note 4.3 provides further details of the assumptions, management's approach to determining the values assigned to each key assumption and their consistency with past experience and external sources of information.

The recoverable amount for the AMP Capital CGU has been determined by using the fair value less costs of disposal based on a multiple of 17 times current period earnings (2016: 19 times), which approximates the fair value of this business, less an allowance for disposal costs.

There are no reasonably possible alternative assumptions which would result in an impairment of any goodwill amounts.

Goodwill attributable to policyholders

Policyholder cash-generating units were allocated \$15m goodwill at 31 December 2017 (31 December 2016: \$15m).

Impairment loss

The conclusion from the goodwill impairment testing is that there has been no impairment to the amount of the goodwill recognised for all CGUs for the year.

Critical accounting estimates and judgements:

Management applies judgement in selecting valuation techniques and setting valuation assumptions to determine the:

- acquisition date fair value and estimated useful life of acquired intangible assets;
- allocation of goodwill to CGUs and determining the recoverable amount of goodwill;
- assessment of whether there are any impairment indicators for acquired intangibles and, where required, in determining the recoverable amount.

Section 2: Investments, intangibles and working capital

2.3 Receivables

	2017 \$m	2016 \$m
Investment related receivables	1,376	1,163
Life insurance contract premiums receivable	333	345
Reinsurance receivables	81	70
Trade debtors and other receivables	361	397
Total receivables	2,151	1,975
<i>Current</i>	2,103	1,857
<i>Non-current</i>	48	118

Accounting policy – recognition and measurement

Receivables

Receivables that back investment contract liabilities and life insurance contract liabilities are designated as financial assets measured at fair value through profit or loss. Reinsurance and other recoveries are discounted to present value. Receivables that do not back investment contract and life insurance contract liabilities are measured at nominal amounts due, less any allowance for doubtful debts. An allowance for doubtful debts is recognised when collection of the full amount is no longer probable. Bad debts are written off as incurred. Given the short-term nature of most receivables, the recoverable amount approximates fair value.

2.4 Payables

	2017 \$m	2016 \$m
Investment related payables	746	701
Life insurance and investment contracts in process of settlement	311	350
Accrued expenses, trade creditors and other payables	695	729
Reinsurance payables	-	72
Total payables	1,752	1,852
<i>Current</i>	1,635	1,740
<i>Non-current</i>	117	112

Accounting policy – recognition and measurement

Payables

Payables are measured at the nominal amount payable. Given the short-term nature of most payables, the nominal amount payable approximates fair value.

Notes supporting the financial information

for the year ended 31 December 2017

Section 2: Investments, intangibles and working capital**2.5 Fair value information**

The following table shows the carrying amount and estimated fair values of financial instruments and investment properties, including their levels in the fair value hierarchy. It does not include fair value information for financial instruments not measured at fair value if the carrying amount is a reasonable approximation of fair value.

2017	Carrying amount \$m	Level 1 \$m	Level 2 \$m	Level 3 \$m	Total fair value \$m

Section 2: Investments, intangibles and working capital

2.5 Fair value information (continued)

AMP's methodology and assumptions used to estimate the fair value of financial instruments are described below:

<i>Listed equity securities and listed managed investment schemes</i>	The fair value of listed equity securities traded in an active market and listed managed investment schemes reflects the quoted bid price at the reporting date. In the case of equity securities and listed managed investment schemes where there is no active market, fair value is established using valuation techniques including the use of recent arm's length transactions, references to other instruments that are substantially the same, discounted cash flow analysis and option pricing models.
<i>Debt securities</i>	The fair value of listed debt securities reflects the bid price at the reporting date. Listed debt securities that are not frequently traded are valued by discounting estimated recoverable amounts. The fair value of unlisted debt securities is estimated using interest rate yields obtainable on comparable listed investments. The fair value of loans is determined by discounting the estimated recoverable amount using prevailing interest rates.
<i>Loans</i>	The estimated fair value of loans represents the discounted amount of estimated future cash flows expected to be received, based on the maturity profile of the loans. As the loans are unlisted, the discount rates applied are based on the yield curve appropriate to the remaining term of the loans. The loans may be measured at an amount in excess of fair value due to fluctuations on fixed rate loans. As the fluctuations in fair value do not represent a permanent diminution and the carrying amounts of the loans are recorded at recoverable amounts after assessing impairment, it is not appropriate to restate their carrying amount.
<i>Unlisted managed investment schemes</i>	The fair value of investments in unlisted managed investment schemes is determined on the basis of published redemption prices of those managed investment schemes at the reporting date.
<i>Derivative financial assets and liabilities</i>	The fair value of financial instruments traded in active markets (such as publicly traded derivatives) is based on quoted market prices (current bid price or current offer price) at the reporting date. The fair value of financial instruments not traded in an active market (eg over-the-counter derivatives) is determined using valuation techniques. Valuation techniques include net present value techniques, option pricing models, discounted cash flow methods and comparison to quoted market prices or dealer quotes for similar instruments.
<i>Borrowings</i>	The fair value of borrowings is determined with reference to quoted market prices where possible. For borrowings where quoted market prices are not available, a discounted cash flow model is used, based on current yield curve appropriate for the remaining term to maturity.
<i>Investment properties</i>	The fair value of investment properties is determined by independent valuers, having appropriate recognised professional qualifications and recent experience in the location and category of the properties being valued. The valuers apply 'comparable sales analysis' and the 'capitalised income approach' by reference to annual net market income, comparable capitalisation rates and other property-specific adjustments as well as 'discounted cash flow analysis', where the expected net cash flows are discounted to their present value using a market-determined risk adjusted discount rate.
<i>Investment contract liabilities</i>	See note 4.1.

The financial assets and liabilities measured at fair value are categorised using the fair value hierarchy which reflects the significance of inputs into the determination of fair value as follows:

- Level 1: the fair value is valued by reference to quoted prices and active markets for identical assets;
- Level 2: the fair value is estimated using inputs other than quoted prices included within Level 1 that are observable for the asset; or liability, either directly (as prices) or indirectly (derived from prices)
- Level 3: the fair value is estimated using inputs for the asset or liability that are not based on observable market data.

There have been no significant transfers of financial assets or liabilities measured at fair value between Level 1 and Level 2 during the 2017 and 2016 financial years. Transfers to/from Level 3 are shown in the Reconciliation of level 3 values table later in this note.

Section 2: Investments, intangibles and working capital

2.5 Fair value information (continued)

Level 3 fair values

For financial assets categorised within Level 3 of the fair value hierarchy, the valuation processes applied in valuing such assets is governed by the AMP Capital asset valuation policy. This policy outlines the asset valuation methodologies and processes applied to measure non-exchange traded assets which have no regular market price, including investment property, infrastructure, private equity, alternative assets, and illiquid debt securities. All significant Level 3 assets are referred to the appropriate valuation committee who meet at least every six months, or more frequently if required.

The following table shows the valuation techniques used in measuring Level 3 fair values, as well as the significant unobservable inputs used.

Type	Valuation technique	Significant unobservable inputs
Equity securities and listed managed investment schemes	Discounted cash flow approach utilising cost of equity as the discount rate.	Discount rate Terminal value growth rate Cash flow forecasts.
Debt securities	Discounted cash flow approach.	Discount rate Cash flow forecasts
Investments in unlisted managed investment schemes	Published redemption prices.	Judgement made in determining unit prices
Investment contract liabilities	Published unit prices and the fair value of backing assets.	Fair value of financial instruments Cash flow forecasts Credit risk
Investment properties	Comparable sales analysis. Capitalised income approach. Discounted cash flow approach utilising market determined risk adjusted discount rate.	Capitalisation rate Discount rate Cash flow forecasts

Sensitivity analysis

Reasonably possible alternative assumptions could have been used in determining the fair values of financial instruments categorised as Level 3. The following table shows the sensitivity to changes in key assumptions, calculated by changing one or more of the significant unobservable inputs for individual assets. This included assumptions such as credit risk and discount rates for determining the valuation range on an individual estimate.

Investment contract liabilities	67,484	7	3,413	10,785	(12,362)	-	69,327	3,333

1 Gains and losses are classified in investment gains and losses or change in policyholder liabilities in the Consolidated income statement.

2 The AMP group recognises transfers as at the end of the reporting period during which the transfer has occurred. Transfers are recognised when there are changes in the observability of the pricing of the relevant securities or where the AMP group ceases to consolidate a controlled entity.

Section 3: Capital structure and financial risk management

This section provides information relating to:

- AMP group's capital management and equity and debt structure; and
- exposure to financial risks – how the risks affect financial position and performance and how the risks are managed, including the use of derivative financial instruments

The capital structure of the AMP group consists of equity and debt. AMP determines the appropriate capital structure in order to finance the current and future activities of the AMP group and satisfy the requirements of the regulator. The directors review the group's capital structure and dividend policy regularly and do so in the context of the group's ability to satisfy minimum and target capital requirements, and to protect and meet the needs of the policyholders.

Section 3: Capital structure and financial risk management

3.1 Contributed equity

	2017 \$m	2016 \$m
Issued capital ^{1,3}		
2,918,469,137 (2016: 2,957,737,964) ordinary shares fully paid	9,547	9,747
Treasury shares ²		
32,887,493 (2016: 23,539,463) Treasury shares	(171)	(128)
Total contributed equity		
2,885,581,644 (2016: 2,934,198,501) ordinary shares fully paid	9,376	9,619
Issued capital		
Balance at the beginning of the year	9,747	9,747
39,268,827 (2016: nil) on-market share buy-back	(200)	-
Balance at the end of the year	9,547	9,747
Treasury shares		
Balance at the beginning of the year	(128)	(181)
(Increase) decrease due to purchases less sales during the year	(43)	53
Balance at the end of the year	(171)	(128)

Holders of ordinary shares have the right to receive dividends as declared and, in the event of the winding up of the company, to participate in the proceeds from the sale of all surplus assets in proportion to the number of and amounts paid up on shares held. Fully paid ordinary shares carry the right to one vote per share. Ordinary shares have no par value.

- Under the terms of the dividend reinvestment plan (DRP), shareholders may elect to have all or part of their dividend entitlements satisfied in shares rather than being paid cash. The DRP applied for the 2016 final dividend (paid in March 2017) at 14.0 cents per share and 2017 interim dividend (paid in September 2017) at 14.5 cents per share. AMP settled the DRP for the 2016 final dividend and 2017 interim dividend by acquiring shares on market and, accordingly, no new shares were issued.
- Of the AMP Limited ordinary shares on issue 30,761,106 (2016: 21,413,076) are held by AMP Life on behalf of policyholders. ASIC has granted relief from restrictions in the *Corporations Act 2001* to allow AMP Life to hold and trade shares in AMP Limited as part of the policyholder funds' investment activities. The cost of the investment in these treasury shares is reflected as a deduction from total contributed equity. The remaining balance is held by AMP Foundation Limited as trustee for the AMP Foundation.
- Mitsubishi UFJ Trust and Banking Corporation (MUFG: Trust Bank) has an option to require AMP Limited to purchase MUFG's interest in AMP Capital Holdings Limited (AMPCH) in certain circumstances. As consideration for the acquisition of AMPCH shares, AMP would be required to issue ordinary shares in AMP Limited to MUFG (or its nominee).

Accounting policy – recognition and measurement

Issued capital

Issued capital in respect of ordinary shares is recognised as the fair value of consideration received by AMP Limited entity. Incremental costs directly attributable to the issue of certain new shares are recognised in equity as a deduction, net of tax, from the proceeds.

Treasury shares

The AMP group is not permitted to recognise Treasury shares in the Consolidated statement of financial position. These shares, plus any corresponding Consolidated income statement fair value movement on the shares and dividend income, are eliminated on consolidation. However, the corresponding investment contract and life insurance contract liabilities, and related Consolidated income statement change in the liabilities, remain on consolidation. At the AMP group consolidated level, the mismatch results in policyholder asset movements impacting the profit attributable to shareholders of AMP Limited.

The AMP Foundation also holds AMP Limited shares. These shares, plus any corresponding Consolidated income statement fair value movement on the shares and any dividend income, are also eliminated on consolidation. As the net assets and profit of the AMP Foundation Trust are fully attributable to non-controlling interests, this has no impact on the net assets or profit attributable to the shareholders of AMP Limited.

1 Deposits comprise at call retail cash on deposit and retail term deposits at variable interest rates within the AMP Bank.

2 Issued on 18 December 2013 and are listed on the ASX. In certain circumstances, AMP may be required to convert some or all of AMP Subordinated Notes 2 into AMP ordinary shares.

3 AMP Wholesale Capital Notes and AMP Capital Notes were issued on 27 March and 30 November 2015, respectively. They are perpetual notes with no maturity date. In certain circumstances, AMP may be required to convert some or all of the Notes into AMP ordinary shares.

4 Floating Rate Subordinated Unsecured Notes were issued on 1 September 2017 and mature 1 December 2027. AMP has the right, but not the obligation, to redeem all or some of the notes on 1 December 2022 or, subject to certain conditions, at a later date. In certain circumstances, AMP may be required to convert some or all of the Notes into AMP ordinary shares.

5 The facility was renegotiated effective 14 December 2017 and includes tranches of \$300m and \$200m, maturing 22 March 2020 and 22 March 2022 respectively.

(b) Financing arrangements

Loan facilities and note programs

In addition to the facilities arranged through bond and note issues, financing facilities are provided through bank loans under normal commercial terms and conditions.

	2017 \$m	2016 \$m
Available	15,595	13,529
Used	(3,020)	(2,579)
Unused facilities at the end of the year	12,575	10,950

Overdraft facilities

The AMP group has access to a bank overdraft facility to help manage short-term cash flow needs. At year-end the available facility was \$487m (2016: \$838m).

Section 3: Capital structure and financial risk management

3.2 Interest-bearing liabilities (continued)

(c) Changes in liabilities arising from financing activities

	Interest bearing liabilities \$m
1 January 2017	17,218
Cashflows	3,799
Other	(8)
31 December 2017	21,009

Accounting policy – recognition and measurement

Interest-bearing liabilities, other than those held by controlled entities of the AMP Life statutory funds, are initially recognised at fair value, net of transaction costs. They are subsequently measured at amortised cost using the effective interest rate method.

Borrowings of certain controlled managed investment schemes of the AMP Life statutory funds are measured at amortised cost for the purpose of determining the unit price of those schemes. All other borrowings of the controlled entities of the AMP Life statutory funds are subsequently measured at fair value with movements recognised in the Consolidated income statement.

It is AMP's policy to hedge currency and interest rate risk arising on issued bonds and subordinated debt. When hedge accounting is applied, the carrying amounts of borrowings and subordinated debt are adjusted for changes in fair value for the period that the hedge relationship remains effective. Any changes in fair value for the period are recognised in the Consolidated income statement.

Finance costs include:

- (i) borrowing costs:
 - interest on bank overdrafts, borrowings and subordinated debt;
 - amortisation of discounts or premiums related to borrowings;
- (ii) exchange differences arising from foreign currency borrowings to the extent that they are regarded as an adjustment to interest costs;
- (iii) changes in the fair value of derivative hedges together with any change in the fair value of the hedged assets or liabilities that are designated and qualify as fair value hedges, foreign exchange gains and losses and other financing related amounts. The accounting policy for derivatives is set out in note 3.4.

Borrowing costs are recognised as expenses when incurred.

Section 3: Capital structure and financial risk management

3.3 Financial risk management

The AMP Limited Board has overall responsibility for the risk management framework including the approval of AMP’s strategic plan, risk management strategy and risk appetite. Specifically, financial risk arises from the holding of financial instruments and financial risk management (FRM) is an integral part of the AMP group’s enterprise risk management framework.

This note discloses financial risk in accordance with the categories in AASB 7 *Financial Instruments: Disclosures*:

- market risk;
- liquidity and refinancing risk;
- credit risk.

These risks are managed in accordance with the Board approved risk appetite statement and the individual policies for each risk category and business approved by the Chief financial officer (CFO) under delegation from the AMP Group Asset and Liability Committee (Group ALCO).

(a) Market risk

Market risk is the risk that the fair value of assets and liabilities, or future cash flows of a financial instrument will fluctuate due to movements in the financial markets including interest rates, foreign exchange rates, equity prices, property prices, credit spreads, commodity prices, market volatilities and other financial market variables.

The following table provides information on significant market risk exposures for the AMP group, which could lead to an impact on the AMP group’s profit after tax and equity, and the management of those exposures.

Market risk	Exposures	Management of exposures and use of derivatives
<p>Interest rate risk</p> <p>The risk of an impact on the AMP group’s profit after tax and equity arising from fluctuations of the fair value or future cash flows of financial instruments due to changes in market interest rates.</p> <p>Interest rate movements could result from changes in the absolute levels of interest rates, the shape of the yield curve, the margin between yield curves and the volatility of interest rates.</p>	<p>AMP group’s long-term borrowings and subordinated debt.</p> <p>Interest bearing investment assets of the shareholder and statutory funds of AMP Life.</p> <p>AMP Bank interest rate risk from mismatches in the repricing terms of assets and liabilities (term risk) and variable rate short-term repricing bases (basis risk).</p>	<p>Interest rate risk is managed by entering into floating-to-fixed interest rate swaps, which have the effect of converting borrowings from floating rate to fixed rate.</p> <p>AMP Life manages interest rate and other market risks pursuant to an asset and liability management policy and are also subject to the relevant regulatory requirements governed by the Life Act.</p> <p>AMP Bank uses natural offsets, interest rate swaps and basis swaps to hedge the mismatches within exposure limits. Bank Treasury manages the exposure in AMP Bank by maintaining a net interest rate risk position within the limits delegated and approved by the AMP Bank Board.</p>
<p>Currency risk</p> <p>The risk of an impact on the AMP group’s profit after tax and equity arising from fluctuations of the fair value of a financial asset, liability or commitment due to changes in foreign exchange rates.</p>	<p>Foreign currency denominated assets and liabilities.</p> <p>Capital invested in overseas operations.</p> <p>Foreign exchange rate movements on specific cash flow transactions.</p>	<p>The AMP group uses swaps to hedge the interest rate risk and foreign currency risk on foreign currency denominated borrowings but does not hedge the capital invested in overseas operations.</p> <p>The AMP group hedges material foreign currency risk originated by receipts and payments once the value and timing of the expected cash flow is known excluding the international equities portfolio attributable to shareholders within the AMP Life Statutory Fund No.1.</p> <p>Bank Treasury executes foreign currency forwards on behalf of AMP Capital to hedge expected management fees income and operation costs outflows originated outside of Australia.</p>
<p>Equity price risk</p> <p>The risk of an impact on the AMP group’s profit after tax and equity arising from fluctuations of the fair value or future cash flows of a financial instrument due to changes in equity prices.</p>	<p>Exposure for shareholder includes listed and unlisted shares and participation in equity unit trusts.</p>	<p>Bank Treasury may, with Group ALCO approval, use equity exposures or equity futures or options to hedge other enterprise-wide equity exposures.</p>

Section 3: Capital structure and financial risk management

3.3 Financial risk management (continued)

(a) Market risk (continued)

Sensitivity analysis

The table below includes sensitivity analysis showing how the profit after tax and equity would have been impacted by changes in market risk variables. The analysis:

- shows the direct impact of a reasonably possible change in market rate and is not intended to illustrate a remote, worst case stress test scenario;
- assumes that all underlying exposures and related hedges are included and the change in variable occurs at the reporting date;
- does not include the impact of any mitigating management actions over the period to the subsequent reporting date.

The categories of risks faced and methods used for deriving sensitivity information did not change from previous periods.

Sensitivity analysis	Change in variables	2017		2016	
		Impact on profit after tax Increase (decrease)	Impact on equity ¹ Increase (decrease)	Impact on profit after tax Increase (decrease)	Impact on equity ¹ Increase (decrease)
		\$m	\$m	\$m	\$m
Interest rate risk	- 100bp	(3)	(33)	82	83
Impact of a 100 basis point (bp) change in Australian and international interest rates.	+100bp	(15)	9	(65)	(66)
Currency risk	10% depreciation of AUD	4	130	5	141
Impact of a 10% movement of exchange rates against the Australian dollar on currency sensitive monetary assets and liabilities.	10% appreciation of AUD	(5)	(107)	(6)	(117)
Equity price risk	10% increase in:				
Impact of a 10% movement in Australian and international equities.	Australian equities	10	10	12	12
Any potential impact on fees from the AMP group's investment linked business in is not included.	International equities	7	7	4	4
	10% decrease in:				
	Australian equities	(10)	(10)	(11)	(11)
	International equities	(9)	(9)	(6)	(6)

1 Included in the impact on equity both the impact on profit after tax as well as the impact of amounts that would be taken directly to equity in respect of the portion of changes in the fair value of derivatives that qualify as cash flow hedges for hedge accounting.

(b) Liquidity and refinancing risk

Risk	Exposures	Management of exposures
Liquidity risk		
The risk that the AMP group is not able to meet its obligations as they fall due because of an inability to liquidate assets or obtain adequate funding when required.	AMP group corporate debt portfolio, AMP Bank and AMP Capital through various investment funds, entities or mandates that AMP manages or controls within the AMP group.	Bank Treasury maintains a defined surplus of cash to mitigate refinancing risk, satisfy regulatory requirements and protect against liquidity shocks in accordance with the liquidity risk management policy approved by the Group ALCO.
Refinancing risk		
The risk that the AMP group is not able to refinance the full quantum of its ongoing debt requirements on appropriate terms and pricing.		Financiers of loans lending to controlled entities of the life statutory funds do not have legal recourse beyond the operating subsidiary borrower and there is no direct effect on any other AMP group debt.

Section 3: Capital structure and financial risk management

3.3 Financial risk management (continued)

(b) Liquidity and refinancing risk (continued)

Maturity analysis

Below is a summary of the maturity profiles of the AMP group's undiscounted financial liabilities and off-balance sheet items at the reporting date, based on contractual undiscounted repayment obligations. Repayments that are subject to notice are treated as if notice were to be given immediately.

	Up to 1 year or no term \$m	1-5 years \$m	Over 5 years \$m	Not specified \$m	Total \$m
2017					
Non-derivative financial liabilities					
Payables	1,635	4	15	98	1,752
Borrowings	14,380	5,011	1,141	-	20,532
Subordinated debt	62	570	918	-	1,550
Investment contract liabilities ¹	743	703	1,289	72,691	75,426
External unitholders' liabilities	-	-	-	14,468	14,468
Derivative financial instruments					
Interest rate and cross currency swaps	7	26	22	-	55
Off-balance sheet items					
Credit-related commitments - AMP Bank ³	3,606	-	-	-	3,606
Total undiscounted financial liabilities and off-balance sheet items²	20,433	6,314	3,385	87,257	117,389
2016					
Non-derivative financial liabilities					
Payables	1,740	112	-	-	1,852
Borrowings	12,124	4,413	21	-	16,558
Subordinated debt	210	210	1,000	-	1,420
Investment contract liabilities ¹	880	802	1,434	68,858	71,974
External unitholders' liabilities	-	-	-	13,252	13,252
Derivative financial instruments					
Interest rate and cross currency swaps	18	20	1	-	39
Off-balance sheet items					
Credit-related commitments - AMP Bank ³	3,653	-	-	-	3,653
Total undiscounted financial liabilities and off-balance sheet items²	18,625	5,557	2,456	82,110	108,748

¹ Investment contract liabilities are liabilities to policyholders for investment linked business linked to the performance and value of assets that back those liabilities. If all these policyholders claimed their funds, there may be some delay in settling the liability as assets are liquidated, but the shareholder has no direct exposure to any liquidity risk. External unitholders' liabilities all relate to controlled entities of the AMP Life statutory funds and would only be paid when corresponding assets are realised.

² Estimated net cash outflow profile of life insurance contract liabilities, disclosed in note 4.4(d), is excluded from the above table.

³ Loan commitments are off-balance sheet as they relate to unexercised commitments to lend to customers of AMP Bank.

Section 3: Capital structure and financial risk management

3.3 Financial risk management (continued)

(c) Credit risk

Credit risk management is decentralised in business units within the AMP group, with the exception of credit risk directly and indirectly impacting shareholder capital, which is measured and managed on an aggregate basis by Group Treasury at the AMP group level and reported to Group ALCO.

Risk	Exposures	Management of exposures and use of derivatives
Credit risk	Wholesale credit risk on the invested fixed income portfolios in the AMP Life statutory funds.	Managed by the AMP Capital Risk and Compliance Committee and reported to the fund managers, within specified credit criteria in the mandate approved by the AMP Life Board.
Credit default risk is the risk of financial or reputational loss due to a counterparty failing to meet their contractual commitments in full and on time.	Wholesale credit risk, including portfolio construction, in the fixed income portfolios managed by AMP Capital.	Responsibility of the individual investment teams. There is also a dedicated credit research team and a specific credit investment committee. The investment risk and performance team provides reports to the AMP Capital Investment Committee.
Concentration of credit risk arises when a number of financial instruments or contracts are entered into with the same counterparty or where a number of counterparties are engaged in similar business activities that would cause their ability to meet contractual obligations to be similarly affected by changes in economic or other conditions.	Credit risk arising in AMP Bank as part of lending activities and management of liquidity.	Managed as prescribed by AMP Bank's Risk Management Systems Description and reported to AMP Bank ALCO monthly. Specific detail relating to credit risk management of the AMP Bank loan portfolio is outlined below.

The AMP Concentration & Credit Default Risk Policy sets out the assessment and determination of what constitutes credit concentration risk. The policy sets exposure limits based on each counterparty's credit rating (unless special considerations are defined). Additional limits are set for the distribution of the total portfolio by credit rating bands. Compliance with this policy is monitored and exposures and breaches are reported to portfolio managers, senior management and the AMP Board Risk Committee through periodic financial risk management reports.

Bank Treasury also might enter into credit default swaps to hedge the concentration risk exposure against a specific issuer, or aggregated at the parent entity, when material exposures are over the authorised limit.

The exposures on interest bearing securities and cash equivalents which impact the AMP Group's capital position are managed by Bank Treasury within limits set by the AMP Concentration & Credit Default Risk Policy.

Credit risk of the loan portfolio in AMP Bank

AMP Bank is predominantly a lender for residential properties, both owner occupied and for investment. In every case, AMP Bank completes a credit assessment, which includes cost of living allowance and requires valuation of the proposed security property.

AMP Bank's Credit Committee and Board oversee trends in lending exposures and compliance with concentration limits. AMP Bank secures its loan with first registered mortgages over relevant properties and as a result manages credit risk on its loan with conservative lending policies and particular focus on the loan to value ratio (LVR). The LVR is calculated by dividing the total loan amount outstanding by the lower of AMP Bank's approved valuation amount or the purchase price. Loans with LVR greater than 80% are fully mortgage insured. Mortgage insurance is provided by Genworth Mortgage Insurance Australia Ltd and QBE Lenders Mortgage Insurance Ltd who are both regulated by APRA. The potential credit exposure to the loan mortgage insurers has been assessed to be low due to the stable historical relationship with the Bank and minimal level of historic claims rejections and reductions

The average LVR at origination of AMP Bank's loan portfolio for existing and new business is set out in the following table:

LVR	Existing business	New business	Existing business	New business
	2017	2017	2016	2016
	%	%	%	%
0 - 50	18	12	17	9
51 - 60	12	12	11	9
61 - 70	18	17	17	16
71 - 80	36	47	38	50
81 - 90	12	6	13	8
91 - 95	4	6	4	8
> 95	-	-	-	-

Section 3: Capital structure and financial risk management

3.3 Financial risk management (continued)

(c) Credit risk (continued)

Past due but not impaired financial assets

Ageing of past due but not impaired financial assets is used by the AMP group to measure and manage emerging credit risks. The following table provides an ageing analysis of loans and advances that are past due as at reporting date but not impaired.

	Not past due nor impaired	Past due but not impaired				Total
		Less than 31 days	31-60 days	61-90 days	More than 91 days	
	\$m	\$m	\$m	\$m	\$m	\$m
2017						
Loans and advances	19,029	343	71	20	91	19,554
2016						
Loans and advances	16,668	373	66	25	72	17,204

AMP Bank maintains individual provisions and collective loan impairment provisions against impaired loans.

Collateral and master netting or similar agreements

The AMP group obtains collateral and utilises netting agreements to mitigate credit risk exposures from certain counterparties.

(i) Derivative financial assets and liabilities

The credit risk of derivatives is managed in the context of the AMP group's overall credit risk policies and includes the use of Credit Support Annexes to derivative agreements which facilitate the bi-lateral posting of collateral.

Certain derivative assets and liabilities are subject to legally enforceable master netting arrangements, such as an International Swaps and Derivatives Association (ISDA) master netting agreement. In certain circumstances, for example when a credit event such as a default occurs, all outstanding transactions under an ISDA agreement are terminated, the termination value is assessed and only a single net amount is payable in settlement of all transactions.

An ISDA agreement does not automatically meet the criteria for offsetting in the Consolidated statement of financial position. This is because the AMP group, in most cases, does not have any current legally enforceable right to offset recognised amounts.

If these netting arrangements were applied to the derivative portfolio, the derivative assets of \$1,092m would be reduced by \$154m to the net amount of \$938m and derivative liabilities of \$489m would be reduced by \$154m to the net amount of \$335m (2016: derivative assets of \$1,195m would be reduced by \$86m to the net amount of \$1,109m and derivative liabilities of \$1,150m would be reduced by \$86m to the net amount of \$1,064m).

(ii) Repurchase agreements

Included within debt securities are assets held to back the liability for collateral deposits held in respect of debt security repurchase arrangements entered into by the life entities' statutory funds and controlled entities of the life entities' statutory funds. As at 31 December 2017, if repurchase arrangements were netted, debt securities of \$32,457m would be reduced by \$8m to the net amount of \$32,449m and collateral deposits held of \$8m would be reduced by \$8m to the net amount of \$nil (2016: debt securities of \$34,512m would be reduced by \$25m to the net amount of \$34,487m and collateral deposits held of \$27m would be reduced by \$25m to the net amount of \$2m).

(iii) Other collateral

The AMP group has collateral arrangements in place with some counterparties in addition to collateral deposits held with respect to repurchase agreements. The amount and type of collateral required by AMP Bank on housing loans depends on an assessment of the credit risk of the counterparty. Guidelines are in place covering the acceptability and valuation of each type of collateral.

AMP Bank holds collateral against its loans and advances primarily in the form of mortgage interests over property, other registered securities over assets and guarantees.

Management monitors the market value of collateral and will request additional collateral in accordance with the underlying agreement. In the event of customer default, AMP Bank can enforce any security held as collateral against the outstanding claim. Any loan security is usually held as mortgagee in possession while AMP Bank seeks to realise its value through the sale of property. Therefore, AMP Bank does not hold any real estate or other assets acquired through the repossession of collateral.

Collateral generally consists of 11am loans and deposits and is exchanged between the counterparties to reduce the exposure from the net fair value of derivative assets and liabilities between the counterparties. As at 31 December 2017 there was \$94m (2016: \$165m) of collateral deposits (due to other counter-parties) and \$41m (2016: \$23m) of collateral loans (due from other counter-parties) relating to derivative assets and liabilities.

Section 3: Capital structure and financial risk management

3.4 Other derivative information

(a) Derivatives which are hedge accounted

Derivative instruments accounted for as fair value hedges

Fair value hedges are used to protect against changes in the fair value of financial assets and financial liabilities due to movements in exchange rates and interest rates. During the year the AMP group recognised \$nil (2016: \$1m loss) on derivative instruments designated as fair value hedges. The net gain on the hedged interest-bearing liabilities amounted to \$nil (2016: \$1m gain).

Derivative instruments accounted for as cash flow hedges

The AMP group is exposed to variability in future cash flows on interest-bearing liabilities which can be at fixed and variable interest rates. The AMP group uses interest rate swaps designated as a cash flow hedge to manage these risks.

The following schedule shows, as at reporting date, the periods when the hedged cash flows are expected to occur and when they are expected to affect profit and loss. During the year \$nil (2016: \$nil) was recognised in the Consolidated income statement due to hedge ineffectiveness from cash flow hedges.

	0-1 year	1-2 years	2-3 years	3-4 years	4-5 years
	\$m	\$m	\$m	\$m	\$m
2017					
Cash inflow s	98	43	32	29	20
Cash outflow s	(99)	(43)	(31)	(26)	(20)
Net cash inflow/(outflow)	(1)	-	1	3	-
2016					
Cash inflow s	98	40	15	6	3
Cash outflow s	(104)	(38)	(14)	(8)	(4)
Net cash inflow/(outflow)	(6)	2	1	(2)	(1)

Hedges of net investments in foreign operations

The AMP group hedges its exposure to changes in exchange rates on the value of its foreign currency denominated seed pool investments. Gains or losses on effective seed pool hedges are transferred to equity to offset any gains or losses on translation of the net investment in foreign operations.

The AMP group recognised a profit of \$nil (2016: \$nil) due to the ineffective portion of hedges relating to investments in seed pool foreign operations.

Accounting policy – recognition and measurement

Derivative financial instruments

Derivative financial instruments are initially recognised at fair value exclusive of any transaction costs on the date a derivative contract is entered into and are subsequently remeasured to their fair value at each reporting date. All derivatives are recognised as assets when their fair value is positive and as liabilities when their fair value is negative. Any gains or losses arising from the change in fair value of derivatives, except those that qualify as effective cash flow hedges, are immediately recognised in the Consolidated income statement.

Hedge accounting

When the AMP group designates certain derivatives to be part of a hedging relationship, and they meet the criteria for hedge accounting, the hedges are classified as:

Fair value hedges

Changes in the fair value of fair value hedges are recognised in the Consolidated income statement, together with any changes in the fair value of the hedged asset or liability that are attributable to the hedged risk. If a hedge no longer meets the criteria for hedge accounting, the cumulative gains and losses recognised on the hedged item will be amortised over the remaining life of the hedged item.

Cash flow hedges

The effective portion of changes in the fair value of cash flow hedges are recognised (including related tax impacts) through Other comprehensive income in the Cash flow hedge reserve in equity. The ineffective portion is recognised immediately in the Consolidated income statement. The balance of the Cash flow hedge reserve in relation to each particular hedge is transferred to the Consolidated income statement in the period when the hedged item affects profit or loss. Hedge accounting is discontinued when a hedging instrument expires or is sold or terminated, or when a hedge no longer meets the criteria for hedge accounting. The cumulative gain or loss existing in equity at that time remains in equity and is recognised when the forecast transaction is ultimately recognised in the Consolidated income statement. When a forecast transaction is no longer expected to occur, the cumulative gain or loss that was reported in equity is immediately transferred to the Consolidated income statement.

Section 3: Capital structure and financial risk management

3.5 Capital management

AMP holds capital to protect customers, creditors and shareholders against unexpected losses. There are a number of ways AMP assesses the adequacy of its capital position. Primarily, AMP aims to:

- maintain a sufficient surplus above minimum regulatory capital requirements (MRR) to reduce the risk of breaching MRR;
- hold sufficient liquidity to ensure that AMP has sufficient access to liquid funds, even under stress situations;
- maintain the AMP group's credit rating.

These factors are balanced when forming AMP's risk appetite as approved by the AMP Limited Board.

Calculation of capital resources

The AMP group's capital resources include ordinary equity and interest-bearing liabilities. The AMP group excludes the interest-bearing liabilities of its banking subsidiary, AMP Bank Limited, and controlled investment subsidiaries and trusts from the AMP group capital resources.

In determining the capital resources the AMP group needs to make adjustments to the statutory shareholder equity. Under Australian Accounting Standards, some assets held on behalf of the policyholders (and related tax balances) are recognised in the preliminary final report at different values to the values used in the calculation of the liability to policyholders in respect of the same assets. Therefore, movements in these policyholder assets result in accounting mismatches which impact the statutory equity attributable to shareholders of AMP Limited. Mismatches arise on the following items:

- Treasury shares (AMP Limited shares held by the statutory funds on behalf of policyholders);
- AMP Life Limited statutory funds' investments in controlled entities;
- AMP Life Limited statutory funds' superannuation products invested in AMP Bank Limited assets.

Adjustments are also made relating to cash flow hedge reserves and to exclude the net assets of the AMP Foundation.

The table below shows the AMP group's capital resources at reporting date:

	2017 \$m	2016 \$m
AMP statutory equity attributable to shareholders of AMP Limited	7,202	7,462
Accounting mismatch, cash flow hedge resources and other adjustments	74	27
AMP shareholder equity	7,276	7,489
Subordinated debt ¹	951	951
Senior debt ¹	730	611
Total AMP capital resources	8,957	9,051

¹ Amounts shown for subordinated debt and senior debt are the amounts to be repaid on maturity.

Capital requirements

A number of the operating entities within the AMP group of companies are regulated and are required to meet minimum regulatory capital requirements (MRR). The main minimum regulatory capital requirements for AMP's businesses are:

Operating entity	Minimum regulatory capital requirement
AMP Life Limited (AMP Life)	Capital adequacy requirements as specified under the APRA Life Insurance Prudential Standards
AMP Bank Limited (AMP Bank)	Capital requirements as specified under the APRA ADI Prudential Standards
AMP Superannuation Limited and National Mutual Superannuation Pty Limited	Operational Risk Financial Requirements as specified under the APRA Superannuation Prudential Standards
AMP Capital Investors Limited and other ASIC regulated businesses	Capital requirements under AFSL requirements and for risks relating to North guarantees

AMP's businesses and the AMP group maintain capital targets reflecting their material risks (including financial risk, product and insurance risk and operational risk) and AMP's risk appetite. The target surplus is a management guide to the level of excess capital that the AMP group seeks to carry to reduce the risk of breaching MRR.

AMP Limited, AMP Life and AMP Bank have Board approved minimum capital levels above APRA requirements, with additional capital targets held above these amounts. Within the life insurance business, the capital targets above Board minimums have been set to a less than 10% probability of capital resources falling below the Board minimum over a 12 month period. Capital targets are also set for AMP Capital to cover risk associated with seed and sponsor capital investments and operational risk. Other components of AMP group's capital targets include amounts relating to Group Office investments, defined benefit funds and other operational risks.

All of the AMP group regulated entities have at all times during the current and prior financial year complied with the externally imposed capital requirements to which they are subject.

Section 4: Life insurance and investment contracts

This section explains how AMP's liabilities in respect of life insurance and investment contracts are measured, including the methodologies and key assumptions that are applied. It also details the key components of the profits that are recognised in respect of life insurance contracts and the sensitivity of those profits to variations in assumptions.

- 4.1 Accounting for life insurance and investment contracts
- 4.2 Life insurance contracts - premiums, claims, expenses and liabilities
- 4.3 Life insurance contracts - assumptions and valuation methodology
- 4.4 Life insurance contracts - risk
- 4.5 Other disclosure - life insurance and investment contracts

4.1 Accounting for life insurance and investment contracts

Prior to January 1 2017 the AMP group's life insurance related activities were conducted through two registered life insurance companies, AMP Life Limited (AMP Life) and the National Mutual Life Association of Australasia Limited (NMLA), collectively, "the AMP life insurance entities". On 1 January 2017, the Australian and New Zealand life insurance business of NMLA was transferred to AMP Life, both wholly owned controlled entities of the AMP group, pursuant to a scheme under part 9 of the Life Insurance Act 1995. This represents the substantial majority of operations of NMLA up to 31 December 2016. Because NMLA and AMP Life are both wholly owned subsidiaries within the AMP group, there was no impact on profit and loss from the transfer transaction.

The two major contract classifications are investment contracts and life insurance contracts.

For the purposes of this preliminary final report, holders of investment contracts or life insurance contracts are collectively and individually referred to as *policyholders*.

Investment contracts

The investment contracts of AMP Life relate to wealth management products such as savings, investment-linked and retirement income policies. The nature of this business is that AMP Life receives deposits from policyholders and those funds are invested on behalf of the policyholders. Fees and other charges are passed to the shareholder and reported as revenue.

The liability to policyholders, other than for fixed retirement income policies, is linked to the performance and value of the assets that back those liabilities. The fair value of such liabilities is therefore the same as the fair value of those assets. For fixed retirement income policies, the liability is linked to the fair value of the fixed retirement income payments and associated management services element.

The fair value of the fixed retirement income payments is calculated as their net present value using a fair value discount rate. The fair value of the associated management services element is the net present value, using a fair value discount rate, of all expenses associated with the provision of services and any profit margins thereon.

Life insurance contracts

AMP Life issues contracts that transfer significant insurance risk from the policyholder, covering death, disability or longevity of the insured. In addition, there are some policies known as discretionary participating contracts that are similar to investment contracts, but the timing of the vesting of the profit attributable to the policyholders is at the discretion of the AMP life insurance entities. Such contracts are defined as life insurance contracts and accounted for using Margin on Services (MoS).

Under MoS, the excess of premium received over claims and expenses (the margin) is recognised over the life of the contract in a manner that reflects the pattern of risk accepted from the policyholder (the service). The planned release of this margin is included in the movement in life insurance contract liabilities recognised in the Consolidated income statement.

Life insurance contract liabilities are usually determined using a projection method, whereby estimates of policy cash flows (premiums, benefits, expenses and profit margins to be released in future periods) are projected using best-estimate assumptions about the future. The liability is calculated as the net present value of these projected cash flows. When the benefits under a life insurance contract are linked to the assets backing it, the discount rate applied is based on the expected future investment earnings rate of those assets. Where the benefits are not linked to the performance of the backing assets, a risk-free discount rate is used. The risk-free discount rate is based on the zero coupon government bond rate and a liquidity margin, which depend on the nature, structure and terms of the contract liabilities.

An accumulation method may be used if it produces results that are not materially different from those produced by a projection method. A modified accumulation method is used for some discretionary participating business, where the life insurance liability is the accumulation of amounts invested by policyholders, less fees specified in the policy, plus investment earnings and vested benefits, adjusted to allow for the fact that crediting rates are determined by reference to investment income over a period of greater than one year. The accumulation method may be adjusted to the extent that acquisition expenses are to be recovered from future margins between fees and expenses.

for the year ended 31 December 2017

Section 4: Life insurance and investment contracts

4.1 Accounting for life insurance and investment contracts (continued)

Allocation of operating profit and unvested policyholder benefits

The operating profit arising from discretionary participating contracts is allocated between shareholders and participating policyholders by applying the MoS principles in accordance with the *Life Insurance Act 1995* (Cth) (Life Act) and the Participating Business Management Framework.

Once profit is allocated to participating policyholders it can only be distributed to these policyholders.

Profit allocated to participating policyholders is recognised in the Consolidated income statement as an increase in policy liabilities. The policy liabilities include profit that has not yet been allocated to specific policyholders (ie unvested) and that which has been allocated to specific policyholders by way of bonus distributions (ie vested).

Bonus distributions to participating policyholders do not alter the amount of profit attributable to shareholders. There are merely changes the nature of the liability from unvested to vested.

The principles of allocation of the profit arising from discretionary participating business are as follows:

- (i) investment income (net of tax and investment expenses) on retained earnings in respect of discretionary participating business is allocated between policyholders and shareholders in proportion to the balances of policyholders' and shareholders' retained earnings. This proportion is, mostly, 80% to policyholders and 20% to shareholders;
- (ii) other MoS profits arising from discretionary participating business are allocated 80% to policyholders and 20% to shareholders, with the following exceptions:
 - the profit arising from New Zealand corporate superannuation business is apportioned such that shareholders are allocated 15% of the profit allocated to policyholders;
 - the profit arising in respect of Australian preservation superannuation account business is allocated 92.5% to policyholders and 7.5% to shareholders;
 - the profits arising from discretionary participating investment account business where 100% of investment profit is allocated to policyholders and 100% of any other profit or loss is allocated to shareholders, with the over-riding provision being that at least 80% of any profit and not more than 80% of any loss be allocated to policyholders' retained profits of the relevant statutory fund; and
 - the underwriting profit arising in respect of participating Business Super risk business is allocated 90% to policyholders and 10% to shareholders.

Allocation of expenses within the life insurance entity's statutory funds

All operating expenses relating to the life insurance contract and investment contract activities are apportioned between acquisition, maintenance and investment management expenses. Expenses which are directly attributable to an individual life insurance contract or investment contract or product are allocated directly to a particular expense category, fund, class of business and product line as appropriate.

Where expenses are not directly attributable, they are appropriately apportioned, according to detailed expense analysis, with due regard to the activities to which that expense relates to. The apportionment basis has been made in accordance with Actuarial Standards and on an equitable basis to the different classes of business in accordance with the Life Act.

The costs apportioned to life insurance contracts are included in the determination of the margin described in note 4.1.

Investment management expenses of the life statutory funds are classified as operating expenses.

Reinsurance

Life insurance contract premium ceded to reinsurers is recognised as an expense and Life insurance contract claims recovered from reinsurers is recognised as income.

Upfront commission received on quota share reinsurance contracts is recognised as commission revenue and a corresponding reinsurance liability is recognised representing the obligation to pay future premiums to the reinsurer. The establishment of the reinsurance liability is reflected in Change in policyholder liabilities. The liability will be released in line with the release of the profit margin on the underlying insurance contracts.

Changes in the reinsurance asset and the reinsurance liability during the period are recognised as Changes in policyholder liabilities. On-going commission from reinsurers is recognised as revenue at the time the commission is received or receivable.

Notes supporting the financial information

for the year ended 31 December 2017

Section 4: Life insurance and investment contracts

4.1 Accounting for life insurance and investment contracts (continued)

Critical accounting judgments and estimates

Life insurance contract liabilities

The measurement of insurance contract liabilities is determined using the MoS methodology. The determination of the liability amounts involves judgement in selecting the valuation methods, profit carriers and valuation assumptions for each type of business. The determination is subjective and relatively small changes in assumptions may have a significant impact on the reported profit. The Board of AMP Life is responsible for these judgements and assumptions, after taking advice from the Appointed Actuary.

Investment contract liabilities

Investment contract liabilities are measured at fair value. For the majority of contracts, the fair value is determined based on published unit prices and the fair value of backing assets, and does not generally require the exercise of judgement. For fixed income products and the North capital guarantee, fair value is determined using valuation models. Judgement is applied in selecting the valuation model and setting the valuation assumptions.

for the year ended 31 December 2017

Section 4: Life insurance and investment contracts**4.3 Life insurance contracts - assumptions and valuation methodology**

Life insurance contract liabilities, and hence the net profit from life insurance contracts, are calculated by applying the principles of MoS described in note 4.1. The key assumptions and methods used in the calculation of life insurance contract liabilities are outlined below.

The methods and profit carriers used to calculate life insurance contract liabilities for particular policy types are as follows:

Business type	Method	Profit carriers (for business valued using projection method)
Conventional	Projection	Bonuses
Investment account	Modified accumulation	n/a
Retail risk (lump sum)	Projection	Expected premiums
Retail risk (income protection)	Projection	Expected premiums
Group risk (lump sum)	Accumulation	n/a
Group risk (income benefits)	Accumulation	n/a
Participating allocated annuities	Modified accumulation	n/a
Life annuities	Projection	Annuity payments

(a) Risk-free discount rates

Except where benefits are contractually linked to the performance of the assets held, a risk-free discount rate based on current observable, objective rates that relate to the nature, structure and term of the future obligations is used. The rates are determined as shown in the following table:

Business type	Basis¹	31 December 2017		31 December 2016	
		Australia	New Zealand	Australia	New Zealand
		%	%	%	%
Retail risk (other than income benefit open claims) ¹	Zero coupon government bond yield curve	1.8 - 3.6	1.8 - 3.6	1.7 - 4.1	1.9 - 4.8
Retail risk and group risk (income benefit open claims) ¹	Zero coupon government bond yield curve (including liquidity premium)	2.0 - 3.7	2.0 - 3.9	2.1 - 4.4	2.2 - 5.1
Life annuities	Non-CPI Zero coupon government bond yield curve (including liquidity premium)	2.1 - 3.8	1.8 - 3.6	2.2 - 4.5	2.3 - 5.2
	CPI Commonwealth indexed bond yield curve (including liquidity premium)	0.5 - 1.2	0.5 - 2.2	0.7 - 1.6	0.9 - 3.4

¹ The discount rates vary by duration in the range shown above.

(b) Future maintenance and investment expenses

Unit maintenance costs are based on budgeted expenses in the year following the reporting date (including GST, as appropriate, and excluding one-off expenses). For future years, these are increased for inflation as described in (c) below. These expenses include fees charged to the life statutory funds by service companies in the AMP group. Unit costs vary by product line and class of business based on an apportionment that is supported by expense analyses.

Future investment expenses are based on the fees currently charged by the asset managers.

Notes supporting the financial information

for the year ended 31 December 2017

Section 4: Life insurance and investment contracts**4.3 Life insurance contracts - assumptions and valuation methodology (continued)****(c) Inflation and indexation**

Benefits and premiums of many regular premium policies are automatically indexed by the published consumer price index (CPI). Assumed future take-up of these indexation options is based on AMP Life's own experience. The annual future CPI rates are derived from the difference between long-term government bonds and indexed government bonds.

The expense inflation assumptions have been set based on the inflation rates, recent expense performance, AMP Life's current plans and the terms of the relevant service company agreement, as appropriate.

The assumed CPI and expense inflation rates at the valuation date are:

	Australia %	New Zealand %
31 December 2017	1.9 CPI, 3.0 expenses	1.7 CPI, 2.0 expenses
31 December 2016	2.0 CPI, 3.0 expenses	1.5 CPI, 2.0 expenses

(d) Bases of taxation

The bases of taxation (including deductibility of expenses) are assumed to continue in accordance with legislation current at the valuation date.

(e) Voluntary discontinuance

Assumptions for the incidence of withdrawals, paid ups and premium dormancy are primarily based on investigations of AMP Life's own historical experience. These rates are based upon the assessed global rate for each of the individual products (or product groups) and then, where appropriate, further adjusted for factors like duration, premium structure, smoker status, age attained or short-term market and business effects etc. Given the variety of influences affecting discontinuance for different product groups, the range of voluntary discontinuance rates across AMP Life is extremely diverse.

The assumptions for future rates of discontinuance of the major classes of life insurance contracts have been reviewed. Discontinuance assumptions were strengthened for the legacy-NMLA Australian retail lump sum business from those assumed at 31 December 2016, as shown in the following table.

Note that the wealth protection discontinuance rate ranges are calculated based on current business mix and various assumption rating factors. Discontinuance rate ranges for conventional products (Australia and New Zealand) are calculated based on average expected lapse rates for the next five years. The 2016 reported discontinuance rates were calculated with average expected lapse rates for the next ten years and have been revised to reflect the current methodology.

Business type	31 December 2017		31 December 2016	
	Australia	New Zealand	Australia	New Zealand
	%	%	%	%
Conventional	2.4 - 8.4	1.5 - 2.8	2.4 - 8.6	1.5 - 2.8
Retail risk (lump sum)	12.8 - 16.9	11.6 - 12	12.7 - 18.3	11.6 - 12
Retail risk (income benefit)	8.1 - 18.8	9.5 - 11.4	8 - 19.1	9.5 - 11.4
Flexible Lifetime Super (FLS) risk business	14.0 - 16.4	n/a	13.3 - 16.5	n/a
Investment account	n/a	n/a	n/a	n/a

(f) Surrender values

The surrender bases assumed for calculating surrender values are those current at the reporting date. There have been no changes to the bases during the year (or the prior year) that would materially affect the valuation results.

Notes supporting the financial information

for the year ended 31 December 2017

Section 4: Life insurance and investment contracts**4.3 Life insurance contracts - assumptions and valuation methodology (continued)****(g) Mortality and morbidity**

Standard mortality and morbidity tables, based on national or industry wide data, are used.

The following assumptions remain unchanged from those assumed at 31 December 2016:

- Mortality rates for the retail risk, conventional and annuity business.
- Trauma rates for the retail risk business.
- Australian income protection business incidence and termination rates.

TPD assumptions have been strengthened for the legacy-AMPL Australian lump sum business from those assumed at 31 December 2016.

For New Zealand income protection business, the assumptions have been updated and based on the recently released ADI 07-11 standard table modified for AMP Life with overall product specific adjustment factors.

The assumptions are summarised in the following table.

Conventional	Conventional - % of IA95-97	
	Male	Female
31 December 2017		
Australia	67.5	67.5
New Zealand	73.0	73.0
31 December 2016

Section 4: Life insurance and investment contracts**4.3 Life insurance contracts - assumptions and valuation methodology (continued)****(g) Mortality and morbidity (continued)**

The actuarial tables used were as follows:

IA95-97	A mortality table developed by the Institute of Actuaries of Australia based on Australian insured lives experience from 1995–1997. The table has been modified to allow for future mortality improvement.
IML00*/IFL00*	IML00 and IFL00 are mortality tables developed by the Institute and Faculty of Actuaries based on United Kingdom annuitant lives experience from 1999-2002. The tables refer to male and female lives respectively and incorporate factors that allow for mortality improvements since the date of the investigation. IML00* and IFL00* are these published tables amended for some specific AMP Life experience.
IA04-08 DTH	This was published by the Institute of Actuaries of Australia under the name <i>A graduation of the 2004-2008 Lump Sum Investigation Data</i> . The table has been modified based on aggregated experience with overall product specific adjustment factors.
IA04-08 TPD	This is the TPD graduation published in the same paper as above.
IA04-08 Trauma	This is the Trauma graduation published in the same paper as above.
IAD 89-93	A disability table developed by the Institute of Actuaries of Australia based on Australian disability income experience for the period 1989-1993. The table has been adjusted to take account of AMP Life's own experience.
ADI 07-11	A disability table developed by KPMG at the request of the Financial Services Council (FSC) based on Australian disability income experience for the period 2007-2011. This table has been modified for AMP Life with overall product specific adjustment factors.

for the year ended 31 December 2017

Section 4: Life insurance and investment contracts**4.3 Life insurance contracts - assumptions and valuation methodology (continued)****(h) Other participating business assumptions**

Where benefits are contractually linked to the performance of the assets held, as is the case for participating business, a discount rate based on the expected market return on backing assets is used. The assumed earning rates for backing assets for participating business are largely driven by long-term (eg 10 year) government bond yields. The 10 year government bond yields used at the relevant valuation dates are as shown in the following table.

Assumed earning rates for each asset sector are determined by adding to the bond yield various risk premiums which reflect the relative differences in expected future earning rates for different asset sectors. For products backed by mixed portfolio assets, the assumption varies with the proportion of each asset sector backing the product. The risk premiums applicable at the valuation date are shown in the table below.

	10 year government bonds %	Risk premiums				
		Local equities %	International equities %	Property and Infrastructure %	Fixed interest %	Cash %
31 December 2017						
Australia	2.6	4.5	3.5	2.4	0.5	(0.5)
New Zealand	2.8	4.5	3.5	2.5	0.4	(0.5)
31 December 2016						
Australia	2.8	4.5	3.5	2.5	0.6	(0.5)
New Zealand	3.4	4.5	3.5	2.5	0.6	(0.5)

The risk premiums for local equities include allowance for imputation credits. The risk premiums for fixed interest reflect credit ratings of the portfolio held.

The averages of the asset mixes assumed for the purpose of setting future investment assumptions for participating business at the valuation date are as shown in the table below for each life company. These asset mixes are not necessarily the same as the actual asset mix at the valuation date as they reflect long-term assumptions.

Average asset mix ¹	Equities	Property and Infrastructure	Fixed interest	Cash
	%	%	%	%
31 December 2017				
Australia	26	13	39	22
New Zealand	34	17	41	8
31 December 2016				
Australia	26	13	39	22
New Zealand	34	17	41	8

1 The asset mix includes both conventional and investment account business. As described in note 4.1, 100% of investment profits on discretionary participating investment account business are allocated to policyholders.

Notes supporting the financial information

for the year ended 31 December 2017

Section 4: Life insurance and investment contracts**4.3 Life insurance contracts - assumptions and valuation methodology (continued)****(h) Other participating business assumptions (continued)**

Where an assumption used is net of tax, the tax on investment income is allowed for at rates appropriate to the class of business and asset sector, including any allowance for imputation credits on equity income. For this purpose, the total return for each asset sector is split between income and capital gains. The actual split has varied at each valuation date as the total return has varied.

For participating business, the total value of future bonuses (and the associated shareholders' profit margins) included in life insurance contract liabilities is the amount supported by the value of the supporting assets, after allowing for the assumed future experience. The pattern of bonuses and shareholders' profit margins assumed to emerge in each future year depends on the assumed relationship between reversionary bonuses (or interest credits) and terminal bonuses. This relationship is set to reflect the philosophy underlying actual bonus declarations.

Actual bonus declarations are determined to reflect, over time, the investment returns of the particular fund and other factors in the emerging experience and management of the business. These factors include:

- allowance for an appropriate degree of benefit smoothing;
- reasonable expectations of policyholders;
- equity between generations of policyholders applied across different classes and types of business; and
- ongoing capital adequacy.

Given the many factors involved, the range of bonus structures and rates for participating business is extremely diverse.

Typical supportable bonus rates on major product lines are as follows for AMP Life (31 December 2016 in parentheses).

Reversionary bonus	Bonus on sum insured	Bonus on existing bonuses
	%	%
Australia	0.4 - 1.0 (0.4 - 1.0)	0.8 - 1.5 (0.8 - 1.5)
New Zealand	0.7 - 1.0 (0.7 - 1.0)	0.7 - 1.1 (0.7 - 1.1)

Terminal bonus

The terminal bonus scales are complex and vary by duration, product line, class of business and country for AMP Life.

Crediting rates (investment account)	%
Australia	0.8 - 4.5 (1.3 - 5.2)
New Zealand	2.7 - 5.8 (2.0 - 6.4)

Notes supporting the financial information

for the year ended 31 December 2017

Section 4: Life insurance and investment contracts**4.3 Life insurance contracts - assumptions and valuation methodology (continued)****(i) Impact of changes in assumptions**

Under MoS, for life insurance contracts valuations using the projection method, changes in assumptions are recognised by adjusting the value of future profit margins in life insurance contract liabilities. Future profit margins are released over future periods.

Changes in assumptions do not include market related changes in discount rates such as changes in benchmark market yields caused by changes in investment markets and economic conditions. These are reflected in both life insurance contract liabilities and asset values at the reporting date.

The impact on future profit margins of actual changes in assumptions from 31 December 2016 to 31 December 2017 in respect of life insurance contracts (excluding new business contracts which are measured using assumptions at reporting date) is as shown in the table below.

Assumption change	Change in future profit margins	Change in life insurance contract liabilities ²	Change in shareholders' profit & equity ³
	\$m	\$m	\$m
Non-market related changes to discount rates	1	-	-
Mortality and morbidity	(35)	-	-
Discontinuance rates	(14)	-	-
Maintenance expenses	(202)	(252)	177
Other assumptions ¹	(81)	217	(152)

1 Other assumption changes include the impact of modelling, reinsurance, product and premium changes.

2 Change in life insurance contract liabilities is net of reinsurance, gross of tax.

3 Change in shareholders' profit and equity is net of reinsurance, net of tax.

In most cases, the overall amount of life insurance contract liabilities and the current period profit are not affected by changes in assumptions. However, where in the case of a particular related product group, the changes in assumptions at the end of a period eliminate any future profit margins for the related product group, and results in negative future profit margins, this negative balance for all forecasted future periods is recognised as a loss in the current period. If the changes in assumptions in a period are favourable for a product group currently in loss recognition, then the previously recognised losses are reversed in the period.

Section 4: Life insurance and investment contracts

4.4 Life insurance contracts - risk

(a) Life insurance risk

AMP Life issues contracts that transfer significant insurance risk from the policyholder, covering death, disability or longevity of the insured, often in conjunction with the provision of wealth management products.

The products carrying insurance risk are designed to ensure that policy wording and promotional materials are clear, unambiguous and do not leave AMP Life open to claims from causes that were not anticipated. The variability inherent in insurance risk, including concentration risk, is managed by having a large geographically diverse portfolio of individual risks, underwriting and the use of reinsurance.

Underwriting is managed through a dedicated underwriting department, with formal underwriting limits and appropriate training and development of underwriting staff. Individual policies carrying insurance risk are generally underwritten individually on their merits. Individual policies which are transferred from a group scheme are generally issued without underwriting. Group risk insurance policies meeting certain criteria are underwritten on the merits of the employee group as a whole.

Claims are managed through a dedicated claims management team, with formal claims acceptance limits and appropriate training and development of staff with an objective to ensure payment of all genuine claims. Claims experience is assessed regularly and appropriate actuarial reserves are established to reflect up-to-date experience and any anticipated future events. This includes reserves for claims incurred but not yet reported.

AMP Life reinsure (cede) to reinsurance companies a proportion of their portfolio or certain types of insurance risk, including catastrophe. This serves primarily to:

- reduce the net liability on large individual risks;
- obtain greater diversification of insurance risks;
- provide protection against large losses;
- reduce overall exposure to risk; and
- reduce the amount of capital required to support the business.

The reinsurance companies are regulated by the Australian Prudential Regulation Authority (APRA); or industry regulators in other jurisdictions and have strong credit ratings from A+ to AA+.

Section 4: Life insurance and investment contracts**4.4 Life insurance contracts - risk (continued)****(b) Key terms and conditions of life insurance contracts**

The nature of the terms of the life insurance contracts written by AMP Life is such that certain external variables can be identified on which related cash flows for claim payments depend. The following table provides an overview of the key variables upon which the timing and uncertainty of future cash flows of the various life insurance contracts issued by AMP Life depend.

Type of contract	Detail of contract workings	Nature of compensation for claims	Key variables affecting future cash flows
<i>Non-participating life insurance contracts with fixed and guaranteed terms (term life and disability)</i>	These policies provide guaranteed benefits, which are paid on death or ill-health, that are fixed and not at the discretion of the Life Companies. Premium rates for yearly renewable business are not guaranteed and may be changed at the discretion of the Life Companies for the portfolio as a whole.	Benefits are defined by the insurance contract and are not directly affected by the investment performance of any underlying assets.	Mortality, morbidity, lapses, expenses and investment market earning rates on assets backing the liabilities.
<i>Life annuity contracts</i>	These policies provide a guaranteed regular income for the life of the insured in exchange for an initial single premium.	The amount of the guaranteed regular income is set at inception of the policy allowing for any indexation.	Longevity, expenses, inflation and investment market earning rates on assets backing the liabilities.
<i>Conventional life insurance contracts with discretionary participating benefits (endowment and whole of life)</i>	The policyholder pays a regular premium and receives the specified sum insured plus any accruing bonuses on death or maturity. The sum insured is specified at inception and guaranteed. Bonuses are added annually, which once added are guaranteed. A further bonus may be added on surrender, death or maturity.	Benefits arising from the discretionary bonuses are based on the performance of a specified pool of contracts and the assets supporting these contracts.	Investment market earning rates on assets backing the liabilities, lapses, expenses and mortality.
<i>Investment account contracts with discretionary participating features</i>	The gross value of premiums received is invested in the investment account with fees and premiums for any associated insurance cover being deducted from the account balance when due. Interest is credited regularly.	Payment of the account balance is generally guaranteed, although it may be subject to certain penalties on early surrender or limited adjustment in adverse investment markets. Operating profit arising from these contracts is allocated between the policyholders and shareholders with not less than 80% allocated to policyholders. Distribution of policyholder profit is through an interest rate mechanism.	Fees, lapses, expenses and investment market earning rates on the assets backing the liabilities.

Notes supporting the financial information

for the year ended 31 December 2017

Section 4: Life insurance and investment contracts**4.4 Life insurance contracts - risk (continued)****(c) Insurance risk sensitivity analysis – life insurance contracts**

For life insurance contracts that are accounted for under MoS, amounts of liabilities, income or expense recognised in the period are unlikely to be sensitive to changes in variables even if those changes may have an impact on future profit margins, unless the product is in or close to loss recognition.

This table shows information about the sensitivity of life insurance contract liabilities and current period shareholder profit after income tax and equity, to a number of possible changes in assumptions relating to insurance risk.

Variable	Change in variable	Change in life insurance contract liabilities		Change in shareholder profit after income tax and equity	
		Gross of reinsurance \$m	Net of reinsurance \$m	Gross of reinsurance \$m	Net of reinsurance \$m
Mortality	10% increase in mortality rates	18	6	(13)	(4)
Annuitant mortality	50% increase in the rate of mortality improvement	1	1	(1)	(1)
Morbidity - lump sum disablement	20% increase in lump sum disablement rates	49	15	(34)	(10)
Morbidity - disability income	10% increase in incidence rates	203	86	(142)	(60)
Morbidity - disability income	10% decrease in recovery rates	356	172	(249)	(120)
Discontinuance rates	10% increase in discontinuance rates	65	24	(46)	(17)
Maintenance expenses	10% increase in maintenance expenses	13	13	(9)	(9)

(d) Liquidity risk and future net cash outflows

The following table shows the estimated timing of future net cash outflows resulting from insurance contract liabilities. This includes estimated future surrenders, death/disability claims and maturity benefits, offset by expected future premiums or contributions and reinsurance recoveries. All values are discounted to the reporting date using the assumed future investment earning rate for each product.

	Up to 1 year \$m	1-5 years \$m	Over 5 years \$m	Total \$m
2017	1,463	3,456	8,796	13,715
2016	1,479	3,270	8,958	13,707

Section 4: Life insurance and investment contracts**4.5 Other disclosure - life insurance and investment contracts (continued)****(b) Restrictions on assets in statutory funds**

AMP Life conducts investment-linked and non-investment linked business. For investment-linked business, deposits are received from policyholders, the funds are invested on behalf of the policyholders and the resulting liability to policyholders is linked to the performance and value of the assets that back those liabilities.

AMP Life has three statutory funds as set out below:

No. 1 fund	Australia	All business (whole of life, endowment, investment account, retail and group risk and immediate annuities) and North longevity guarantee.
	New Zealand	All business (whole of life, endowment, investment account, retail and group risk, investment-linked and immediate annuities)
No. 2 fund	Australia	Investment-linked superannuation business (retail and group investment-linked and deferred annuities)
No. 3 fund	Australia	Investment-linked ordinary business

Investments held in the life statutory funds can only be used in accordance with the relevant regulatory restrictions imposed under the Life Act and associated rules and regulations. The main restrictions are that the assets in a life statutory fund can only be used to meet the liabilities and expenses of that life statutory fund, to acquire investments to further the business of the life statutory fund or as distributions provided solvency, capital adequacy and other regulatory requirements are met.

Further details about capital management are provided in note 3.5.

	2017			2016		
	Non-investment linked	Investment-linked	Total life entities' statutory funds	Non-investment linked	Investment-linked	Total life entities' statutory funds
	\$m	\$m	\$m	\$m	\$m	\$m
Net assets of life entities' statutory funds attributable to policyholders and shareholders	28,133	72,884	101,017	29,747	68,956	98,703
Attributable to policyholders²						
Life insurance contract liabilities	23,683	-	23,683	24,225	-	24,225
Investment contract liabilities ¹	2,464	72,690	75,154	2,739	68,760	71,499
	26,147	72,690	98,837	26,964	68,760	95,724
Attributable to shareholders	1,986	194	2,180	2,783	196	2,979

1 Investment contract liabilities in this table do not include \$81m (2016: \$80m) being the investment contract liability for the North capital guarantee which is held outside the life insurance entities.

2 Based on assumptions as to likely withdrawal patterns of the various product groups, it is estimated that approximately \$14,266 (2016: \$14,268m) of policy liabilities may be settled within 12 months of the reporting date.

The net assets of life statutory funds attributable to shareholders represent the interests of shareholders including funds required to meet regulatory requirements as well as further amounts of shareholder funds in excess of regulatory requirements.

Section 4: Life insurance and investment contracts**4.5 Other disclosure - life insurance and investment contracts (continued)****(c) Capital guarantees**

	2017	2016
	\$m	\$m
Life insurance contracts with a discretionary participating feature - amount of the liabilities that relate to guarantees	14,759	15,440
Investment-linked contracts - amount of the liabilities subject to investment performance guarantees	878	925
Other life insurance contracts with a guaranteed termination value - current termination value	152	169

(d) Capital requirements

Registered life insurance entities are required to hold prudential reserves, over and above their life insurance contract and investment contract liabilities, as a buffer against adverse experience and poor investment returns. These reserving requirements are specified by the APRA prudential capital standards. The standards are intended to take account of the full range of risks to which a regulated institution is exposed and introduces the prescribed capital amount (PCA) requirement. The PCA is the minimum level of capital that the regulator deems must be held to meet policyholder obligations.

In addition to the regulatory capital requirements, AMP Life maintains a target surplus providing an additional capital buffer against adverse events. AMP Life uses internal capital models to determine target surplus, with the models reflecting the risks of the business, principally the risk of adverse asset movements relative to the liabilities and of worse than expected claims costs.

The Appointed Actuary of AMP Life has confirmed that the capital base of each life statutory fund and shareholders' fund have exceeded PCA at all times during 2017 and 2016. The combined capital position of AMP Life and NMLA is as follows:

	2017	2016
	\$m	\$m
Common Equity Tier 1 Capital	3,529	4,154
Adjustments to Common Equity Tier 1 Capital	(803)	(1,384)
Additional Tier 1 Capital	305	305
Adjustments to Additional Tier 1 Capital	-	-
Tier 2 Capital	300	300
Adjustments to Tier 2 Capital	-	-
Total capital base	3,331	3,375
Total Prescribed Capital Amount (PCA)	1,228	1,323
Capital adequacy amount	2,103	2,052
Capital adequacy multiple¹	271%	255%

¹ The capital adequacy multiples were 272% and 218% for AMP Life and NMLA respectively (2016: 288% and 201%).

(e) Actuarial information

Mr Greg Bird, the Appointed Actuary of AMP Life, is satisfied as to the accuracy of the data used in the valuations in the preliminary final report and in the tables in note 4.2 to note 4.5.

The liabilities to policyholders (being the sum of the life insurance contract and investment contract liabilities, including any asset or liability arising in respect of the management services element of an investment contract), capital base and prescribed capital amounts have been determined at the reporting date in accordance with the Life Act.

Section 5: Employee disclosures

This section provides details on the various programs the AMP group uses to reward and recognise employees, including key management personnel.

- 5.1 Defined benefit plans
- 5.2 Share-based payments

5.1 Defined benefit plans

AMP contributed to defined benefit plans which provide benefits to employees, and their dependants, on resignation, retirement, disability or death of the employee. The benefits are based on years of service and an average salary calculation. All defined benefit plans are now closed to new members.

The characteristics and risks associated with each of the defined benefit plans is described below:

Plan details	Australia	New Zealand
Plan names	AMP Australia and AMP AAPH Australia defined benefit plans	AMP New Zealand and AMP AAPH New Zealand defined benefit plans
Entitlements of active members	A lump sum or pension on retirement. Pensions provided are lifetime indexed pensions with a reversionary spouse pension.	Accumulation benefits and a lump sum payment on retirement.
Governance of the plans	The trustees of the AMP Superannuation Savings Trust, of which the Australian plans are sub-funds – this includes administration of the plan, management and investment of the plan assets, and compliance with superannuation laws and other applicable regulations.	The plan's trustees - this includes administration of the plan, management and investment of the plan assets, and looking after the interests of all beneficiaries.
Valuations required	Every year	Every three years
Key risks	The risk of actual outcomes being different to the actuarial assumptions used to estimate the defined benefit obligation, investment risk and legislative risk.	
Date of valuation	31 March 2017	31 December 2017
Additional contributions required	Additional contributions of \$7m per annum until 31 March 2019.	Additional contributions of \$6m per annum until 31 December 2017.

(a) Defined benefit liability

	2017	2016
	\$m	\$m

Accounting policy – recognition and measurement**Defined benefit plans**

The AMP group recognises the net deficit or surplus position of each fund in the Consolidated statement of financial position. The deficit or surplus is measured as the difference between the fair value of the funds' assets and the discounted defined benefit obligations of the funds, using discount rates determined with reference to market yields on high quality corporate bonds at the end of the reporting period.

After taking into account any contributions paid into the defined benefit funds during the period, movements in the net surplus or deficit of each fund, except actuarial gains and losses, are recognised in the Consolidated income statement. Actuarial gains and losses arising from experience adjustments and changes in actuarial assumptions over the period and the returns on plan assets are recognised (net of tax) directly in retained earnings through Other comprehensive income.

Contributions paid into defined benefit funds are recognised as reductions in the deficit.

Notes supporting the financial information

for the year ended 31 December 2017

Section 5: Employee disclosures**5.2 Share-based payments**

AMP has a number of employee share-based payment plans. Share-based payments place employees participating in those plans (participants) in the position of the shareholder, and in doing so, reward employees for the generation of value for shareholders. Information on plans which AMP currently offers is provided below.

The following table shows the expense recorded for AMP share-based payment plans during the year:

	2017	2016
	\$'000	\$'000
Performance rights	6,297	1,220
Share rights	21,878	24,109
Total share-based payments expense	28,175	25,329

(a) Performance rights

The CEO and his direct reports, as well as selected senior executives, are required to take their long-term incentive (LTI) awards in the form of performance rights. This is to ensure that the interests of those executives, who are most directly able to influence company performance, are appropriately aligned with the interests of shareholders.

Plan	LTI award plan
Overview	Performance rights give the participant the right to acquire one fully paid ordinary share in AMP Limited upon meeting specific performance hurdles. They are granted at no cost to the participant and carry no dividend or voting rights until they vest. Performance rights may be settled through a cash payment in lieu of shares, at the discretion of the Board.
Vesting conditions	<p>The performance hurdles for rights granted in 2014 are:</p> <ul style="list-style-type: none"> 50% subject to AMP's total shareholder return (TSR) performance relative to the top 50 industrial companies in the S&P/ASX 100 Index excluding those companies in the GICS Energy Sector and GICS Metals and Mining industry groups over a three-year performance period. 50% subject to a return on equity (RoE) measure. <p>The performance hurdles for rights granted in 2015 and 2016 are:</p> <ul style="list-style-type: none"> 60% subject to AMP's TSR performance relative to the top 50 industrial companies in the S&P/ASX 100 Index excluding those companies in the GICS Energy Sector and GICS Metals and Mining industry groups over a three-year performance period. 40% subject to a RoE measure. <p>The performance hurdles for rights granted in 2017 are:</p> <ul style="list-style-type: none"> 100% subject to AMP's TSR performance relative to the top 50 industrial companies in the S&P/ASX 100 Index excluding those companies in the GICS Energy Sector and GICS Metals and Mining industry groups over a four-year performance period.
Vesting period	<ul style="list-style-type: none"> 3 years for rights granted in 2014, 2015 and 2016. 4 years for rights granted in 2017.
Vested awards	Vested performance rights are automatically converted to shares on behalf of participants.
Unvested awards	Unvested awards are forfeited if the participant voluntarily ceases employment or is dismissed for misconduct or poor performance.

Valuation of performance rights

The allocation values for performance rights are based on valuations prepared by an independent external consultant. The valuations are based on the 10-day volume weighted average share price over the 10-day trading period after the release of AMP results and ending prior to the start of the performance period. Assumptions regarding the dividend yield and volatility have been estimated based on AMP's actual historic dividend yield and volatility over an appropriate period.

In determining the share-based payments expense, the number of instruments expected to vest has been adjusted to reflect the number of employees expected to remain with AMP until the end of the performance period.

Notes supporting the financial information

for the year ended 31 December 2017

Section 5: Employee disclosures

5.2 Share-based payments (continued)

(a) Performance rights (continued)

The following table shows the factors considered in determining the allocation value of the performance rights granted during the period:

Grant date	Share price	Contractual life (years)	Dividend yield	Volatility ¹	Risk-free rate ¹	TSR performance hurdle discount	RoE performance hurdle discount ²	TSR performance rights fair value	RoE performance rights fair value
19/05/2017	\$5.08	4.0	5.2%	23%	1.8%	56%	N/A	\$2.24	N/A
13/01/2017	\$5.15	2.4	5.0%	23%	1.9%	71%	0%	\$1.47	\$4.57
02/06/2016	\$5.54	3.0	4.7%	24%	1.6%	57%	0%	\$2.37	\$4.81
15/04/2016	\$5.79	2.1	4.7%	23%	2.0%	69%	0%	\$1.80	\$5.24
15/04/2016	\$5.79	1.1	4.7%	25%	2.0%	36%	0%	\$3.68	\$5.49
18/09/2015	\$5.79	2.7	4.6%	23%	1.9%	58%	0%	\$2.43	\$5.11
04/06/2015	\$6.20	3.0	4.7%	23%	2.1%	55%	0%	\$2.82	\$5.39
13/04/2015	\$6.69	2.1	4.8%	23%	1.8%	34%	0%	\$4.44	\$6.05
05/06/2014	\$5.28	3.0	4.8%	25%	2.9%	45%	0%	\$2.89	\$4.57

1 Applies to performance rights subject to a relative TSR performance hurdle only. These factors do not apply to performance rights subject to a RoE performance hurdle.

2 In accordance with the accounting standard AASB 2 *Share-based Payment*, allowance cannot be made for the impact of a non-market based performance hurdle in determining fair value.

The following table shows the movement in performance rights outstanding during the period:

Grant date	Exercise price	Balance at 1 Jan 2017	Exercised			Balance at 31 Dec 2017
			during the year	Granted during the year	Lapsed during the year	
05/06/2014	Nil	3,892,600	-	-	3,892,600	-
13/04/2015	Nil	8,004	-	-	8,004	-

19/05/2017	Nil	-	-	3,267,000	-	3,267,000
Total		11,201,669	-	3,279,820	4,014,375	10,467,114

From the end of the financial year and up to the date of this report, no performance rights have been issued, no performance rights have been exercised, and no performance rights have lapsed. Of the performance rights outstanding at the end of the period, none have vested or become exercisable.

Notes supporting the financial information

for the year ended 31 December 2017

Section 5: Employee disclosures

5.2 Share-based payments (continued)

(b) Share rights

The LTI participants below the CEO and his direct reports may be awarded share rights as part of their overall LTI award.

Nominated executives, and selected other senior leaders who have the ability to impact AMP's financial soundness participate in the short-term incentive (STI) deferral plan, this plan requires that 40% of the participants STI be awarded as share rights. Additionally, each year, up until 2017, high potential employees at a senior leader level were eligible for nomination to participate in the STI match plan, which provided an award of share rights to the value of 50% of the individual's STI (plan ceased in 2017).

Plan	LTI award plan	STI deferral plan	STI match plan
Overview	Share rights give the participant the right to acquire one fully paid ordinary share in AMP Limited after a specified service period. They are granted at no cost to the participant and carry no dividend or voting rights until they vest.		
Vesting conditions/ period	Continued service for three years (2014, 2015 and 2016 grants) and four years for the 2017 grant made to AMP Group employees. The 2017 LTI grant made to AMP Capital employees has a three-year service period. These may also vary where the share rights are awarded to retain an employee for a critical period.	Continued service for two years and subject to ongoing employment, compliance with AMP policies and the Board's discretion. For AMP Capital employees participating in the Enterprise Profit Share scheme and the Deferred Bonus Equity Plan, the grant is split into two tranches with continued service for two and three years respectively. These are also subject to ongoing employment, compliance with AMP policies and the Board's discretion.	Continued service for two years and subject to ongoing employment, compliance with AMP policies and the Board's discretion.
Vested awards	Vested share rights are automatically converted to shares on behalf of participants.		
Unvested awards	Unvested awards are forfeited if the participant voluntarily ceases employment or is dismissed for misconduct or poor performance.		

Plan valuation

The fair value of share rights has been calculated as at the grant date, by external consultants using a 'discounted cash flow' methodology. Fair value has been discounted for the present value of dividends expected to be paid during the vesting period to which the participant is not entitled. For the purposes of the valuation it is assumed share rights are exercised as soon they have vested. Assumptions regarding the dividend yield have been estimated based on AMP's actual historic dividend yield over an appropriate period.

In determining the share-based payments expense, the number of instruments expected to vest has been adjusted to reflect the number of employees expected to remain with AMP until the end of the performance period.

The following table shows the factors which were considered in determining the independent fair value of the share rights granted during the period:

From the end of the financial year and up to the date of this report, no share rights have been issued, no share rights have been exercised, and 5,686 share rights have lapsed due to resignation. Of the share rights outstanding at the end of the period, none have vested or become exercisable.

(c) Restricted shares

No restricted shares were granted during 2016 and 2017.

(d) Employee share acquisition plan

The employee share acquisition plan was suspended mid-way through 2009 in Australia but continues to operate in New Zealand.

Accounting policy – recognition and measurement

Equity-settled share-based payments

The cost of equity-settled share-based payments is measured using their fair value at the date at which they are granted. The fair value calculation takes into consideration a number of factors, including the likelihood of achieving market-based vesting conditions such as total shareholder return (market conditions).

The cost of equity-settled share-based payments is recognised in the Consolidated income statement, together with a corresponding increase in the share-based payment reserve (SBP reserve) in equity, over the vesting period of the instrument. At each reporting date, the AMP group reviews its estimates of the number of instruments that are expected to vest and any changes to the cost are recognised in the Consolidated income statement and the SBP reserve, over the remaining vesting period.

Where the terms of an equity-settled share-based payment are modified and the expense increases as a result of the modification, the increase is recognised over the remaining vesting period. When a modification reduces the expense, there is no adjustment and the pre-modification cost continues to be recognised.

Where an equity-settled award does not ultimately vest, expenses are not reversed, except for awards where vesting is conditional upon a non-market condition, in which case all expenses are reversed in the period in which the instrument lapses.

NMMT Limited	Australia	Ord	100	100
The National Mutual Life Association of Australasia Limited	Australia	Ord	100	100

(b) Investments in investment entities controlled by the AMP Life statutory funds

The life insurance statutory funds hold investments in various investment vehicles/funds backing policyholder liabilities as well as shareholder attributable assets in the life insurance statutory funds. The policyholder attributable investments are not part of the core wealth management business of AMP and do not have a material impact on the financial performance or net financial position of the company. The investments are measured at fair value through profit and loss reflecting the fair value movements in these investments in the financial statements.

Critical accounting estimates and judgements:

Judgement is applied in determining the relevant activities of each entity, whether AMP Limited has power over these activities and whether control exists. This involves assessing the purpose and design of the entity and identifying the activities which significantly affect that entity's returns and how decisions are made about those activities. In assessing how decisions are made, management considers voting and veto rights, contractual arrangements with the entity or other parties, and any rights or ability to appoint, remove or direct key management personnel or entities that have the ability to direct the relevant activities of the entity. Management also considers the practical ability of other parties to exercise their rights.

Judgement is also applied in identifying the variable returns of each entity and assessing AMP Limited's exposure to these returns. Variable returns include distributions, exposure to gains or losses and fees that may vary with the performance of an entity.

Notes supporting the financial information

for the year ended 31 December 2017

Section 6: Group entities

6.2 Acquisitions and disposals of controlled entities

(a) Acquisitions and disposals of controlled operating entities

There were no individually or collectively significant acquisitions or disposals of controlled operating entities during the year.

(b) Acquisition and disposals of controlled entities of AMP Life statutory funds

In the course of normal operating investment activities, the AMP Life statutory funds acquire equity interests in entities which, in some cases, result in AMP holding a controlling interest in the investee entity.

Most acquisitions and disposals of controlled entities are in relation to managed investment schemes with underlying net assets typically comprising investment assets including cash. The consideration for acquisitions or disposals reflects the fair value of the investment assets at the date of the transactions after taking into account minority interests.

Certain controlled entities of the life entity's statutory funds are operating companies which carry out business operations unrelated to the core wealth management operations of the AMP group.

For personal use only

Section 6: Group entities**6.3 Investments in associates****(a) Investments in associates accounted for using the equity method**

Associate	Principal activity	Place of business	Ownership interest		Carrying amount ¹	
			2017 %	2016 %	2017 \$m	2016 \$m
China Life Pension Company ³	Pension company	China	19.99	19.99	281	283
AIMS AMP Capital Industrial REIT ²	Industrial property trust	Singapore	5	5	47	49
China Life AMP Asset Management Company Ltd	Investment management	China	15	15	23	21
Global Infrastructure Fund ²	Fund	Cayman Island	8	5	151	38
PCCP LLC ³	Investment management	United States	24.9	-	127	-
Other (individually immaterial associates)			n/a	n/a	120	58
Total investments in associates accounted for using the equity method					749	449

- 1 The carrying amount is after recognising \$29m (2016: \$28m) share of current period profit or loss of associates accounted for using the equity method.
- 2 Entities within the AMP Group have been appointed investment manager, therefore the group is considered to have significant influence.
- 3 The AMP Group has significant influence through representation on the entity's Board.

(b) Investments in significant associates held by the life entities' statutory funds measured at fair value through profit or loss

The life insurance statutory funds hold investments in various investment vehicles/funds on behalf of policyholders. These investments are not part of the core wealth management business of AMP and do not have a material impact on the financial performance or net financial position of the AMP group.

Accounting Policy – recognition and measurement**Investments in associates***Investments in associates accounted for using the equity method*

Investments in entities, other than those backing investment contract liabilities and life insurance contract liabilities, over which the AMP group has the ability to exercise significant influence, but not control, are accounted for using the equity method of accounting. The investment is measured at cost plus post-acquisition changes in the AMP group's share of the associates' net assets, less any impairment in value. The AMP group's share of profit or loss of associates is included in the Consolidated income statement. Any dividend or distribution received from associates is accounted for as a reduction in carrying value of the associate.

Any impairment is recognised in the Consolidated income statement when there is objective evidence a loss has been incurred. It is measured as the amount by which the carrying amount of the investment in entities exceeds its recoverable amount.

Investments in associates measured at fair value through profit or loss

Investments in entities held to back investment contract liabilities and life insurance contract liabilities are exempt from the requirement to apply equity accounting and have been designated on initial recognition as financial assets measured at fair value through profit or loss.

Share based-payment reserve	22	21
Retained earnings ⁵	2,941	2,884
Total equity	12,510	12,652

1 Dividend income from controlled entities \$866m (2016: \$611m) is not assessable for tax purposes. Income tax credit includes \$53m (2016: \$65m) utilisation of previously unrecognised tax losses.

2 Receivables and payables include tax-related amounts receivable from subsidiaries \$52m (2016: \$99m) and payable to subsidiaries \$75m (2016: \$42m).

3 Deferred tax assets include amounts recognised for losses available for offset against future taxable income \$87m (2016: \$49m)

4 AMP Limited entity is the issuer of: AMP Subordinated Notes; AMP Wholesale Capital Notes; AMP Capital Notes - 2015 and AMP Capital Notes - 2017. Further information on these are provided in note 3.2.

5 Changes in retained earnings comprise \$894m (2016: \$646m) profit for the year less dividends paid of \$837m (2016: \$828m).

(c) Contingent liabilities of AMP Limited entity

AMP Limited entity has entered into deeds to provide capital maintenance and liquidity support to AMP Bank Limited. At the reporting date, the likelihood of any outflow in settlement of these obligations is considered to be remote.

Notes supporting the financial information

for the year ended 31 December 2017

Section 7: Other disclosures

This section includes disclosures other than those covered in the previous sections, required for the AMP group to comply with the accounting standards and pronouncements.

- 7.1 Notes to Consolidated statement of cash flows
- 7.2 Leases
- 7.3 Provisions
- 7.4 Contingent liabilities
- 7.5 Auditors' remuneration
- 7.6 New accounting standards
- 7.7 Events occurring after reporting date

7.1 Notes to Consolidated statement of cash flows**(a) Reconciliation of cash flow from operating activities**

	2017	2016
	\$m	\$m
Net profit after income tax	873	192
Depreciation of operating assets	17	18
Amortisation and impairment of intangibles	276	937
Investment gains and losses and movements in external unitholders liabilities	(1,495)	506
Dividend and distribution income reinvested	(4,686)	(3,515)
Share-based payments	7	-
(Increase) decrease in receivables, intangibles and other assets	(152)	83
Increase in net policy liabilities	3,769	2,615
Increase (decrease) in income tax balances	244	(473)
(Decrease) in other payables and provisions	(251)	(188)
Cash flows from (used in) operating activities	(1,398)	175

(b) Reconciliation of cash

	2017	2016
	\$m	\$m
Comprises:		
Cash and cash equivalents	3,602	3,476
Short-term bills and notes (included in Debt securities)	3,620	5,334
Cash and cash equivalents for the purpose of the Statement of cash flows	7,222	8,810

Accounting policy – recognition and measurement**Cash and cash equivalents**

Cash and cash equivalents comprise cash-on-hand that is available on demand and deposits that are held at call with financial institutions. Cash and cash equivalents are measured at fair value, being the principal amount. For the purpose of the Consolidated statement of cash flows, Cash and cash equivalents also includes other highly liquid investments not subject to significant risk of change in value, with short periods to maturity, net of outstanding bank overdrafts. Bank overdrafts are shown within Interest-bearing liabilities in the Consolidated statement of financial position.

Notes to the financial statements

for the year ended 31 December 2017

Section 7: Other disclosures**7.2 Leases**

	2017	2016
	\$m	\$m
Due within one year	81	89
Due within one year to five years	279	222
Due later than five years	951	16
Total operating lease commitments	1,311	327

Non-cancellable operating leases are in relation to the AMP group's offices in various locations. AMP generally pays rent on a periodic basis at rates agreed at the inception of the lease.

At 31 December 2017, the total of future minimum sublease payments expected to be received under non-cancellable subleases was \$15m (2016: \$37m).

Accounting policy – recognition and measurement**Operating lease payments**

Operating lease payments are recognised as an expense in the Consolidated income statement on a straight-line basis over the lease term or other systematic basis representative of the patterns of the benefits obtained. Operating incentives are recognised as a liability when received and subsequently reduced by allocating lease payments between rental expense and reduction of the liability.

Notes to the financial statements

for the year ended 31 December 2017

Section 7: Other disclosures**7.3 Provisions**

	Consolidated	
	2017 \$m	2016 \$m
(a) Provisions		
Restructuring ¹	22	67
Other ²	131	138
Total provisions	153	205

	Restructuring ¹ \$m	Other ² \$m	Total \$m
(b) Movements in provisions - consolidated			
Balance at the beginning of the year	67	138	205
Additional provisions made during the year	15	71	86
Provisions used during the year	(60)	(78)	(138)
Balance at the end of the year	22	131	153

1 Restructuring provisions are recognised in respect of programs that materially change the scope of the business or the manner in which the business is conducted.

2 Other provisions are in respect of probable outgoings on client remediation projects and various other operational provisions. \$25m (2016: \$17m) is expected to be settled more than 12 months from the reporting date.

Accounting policy – recognition and measurement**Provisions**

Provisions are recognised when:

- the AMP group has a present obligation (legal or constructive) as a result of a past event;
- it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation; and
- a reliable estimate can be made of the amount of the obligation.

Provisions are measured at the present value of management's best estimate of the expenditure required to settle the present obligation at the reporting date. For provisions other than employee entitlements, the discount rate used to determine the present value reflects current market assessments of the time value of money and the risks specific to the liability.

Critical accounting estimates and judgements:

The group recognises a provision where a legal or constructive obligation exists at the balance sheet date and a reliable estimate can be made of the likely outcome. Although provisions are reviewed on a regular basis and adjusted for management's best current estimates, the judgemental nature of these items means that future amounts settled may be different from those provided.

Notes to the financial statements

for the year ended 31 December 2017

Section 7: Other disclosures

7.4 Contingent liabilities

From time to time, the AMP Group may incur obligations arising from litigation or various types of contracts entered into in the normal course of business, including guarantees issued by the parent for performance obligations to controlled entities in the AMP Group. Where it is determined that the disclosure of information in relation to a contingent liability can be expected to seriously prejudice the position of the AMP Group (or its insurers) in a dispute, accounting standards allow the AMP group not to disclose such information and it is the AMP group's policy that such information is not to be disclosed in this note.

Industry and regulatory compliance investigations

AMP is subject to review from time to time by regulators, both in Australia and offshore. In Australia, AMP's principal regulators are APRA, ASIC and AUSTRAC, though, other government agencies may have jurisdiction depending on the circumstances. The reviews conducted by regulators may be industry wide or specific to AMP and the outcomes of those reviews can vary and may lead, for example, to the imposition of penalties, the compensation of customers, enforceable undertakings or recommendations and directions for AMP to enhance its control framework, governance and systems.

There are currently a number of investigations being undertaken by ASIC, some of which are industry wide. These cover a range of matters, including adviser conduct, customer fees, the quality of advice and the monitoring and supervision by AMP of its advisers. These investigations have not been completed and the associated outcomes and costs are uncertain.

AMP is also undertaking reviews concurrently with these regulatory investigations to determine, amongst other things, where customers may have been disadvantaged. In some instances compensation has been paid and, as these reviews are ongoing, further compensation may be required to be paid to customers. Where the results of our reviews have reached the point that customer compensation is likely, specific provisions have been raised, however, a contingency remains in relation to the regulatory investigations.

More recently, the Australian financial services industry is responding to a Royal Commission into Misconduct in the Banking, Superannuation and Financial Services Industry, established on 14 December 2017. The outcomes of this Royal Commission for AMP and the industry are uncertain at this time. AMP has welcomed the opportunity to contribute to the Royal Commission and supports its intent to provide certainty to the financial system and help restore the community's trust and confidence in the industry.

Notes to the financial statements

Section 7: Other disclosures**7.5 Auditors' remuneration**

	2017	2016
	\$'000	\$'000
AMP Limited and other corporate entities in the consolidated group		
Audit services		
Audit or review of financial statements	5,536	5,377
Other audit services ¹	1,395	1,239
Total audit service fees	6,931	6,616
Non-audit services		
Taxation services	743	681
Other services ²	856	1,012
Total non-audit services fees	1,599	1,693
Total auditors' remuneration for AMP Limited and other corporate entities	8,530	8,309
Managed Investment Schemes and Superannuation Funds		
Audit services		
Audit or review of financial statements	6,977	6,753
Other audit services ¹	303	288
Total audit service fees	7,280	7,041
Non-audit services		
Taxation services	305	277
Other services ³	-	119
Total non-audit services fees	305	396
Total auditors' remuneration for managed investment schemes and superannuation	7,585	7,437
Total auditors' remuneration	16,115	15,746

1 Other audit services includes regulatory compliance and review s of controls and procedures.

2 Other non-audit services for AMP Limited and other corporate entities relate to compliance related review .

3 Other non-audit services for managed investment schemes and superannuation funds are comprised primarily with transaction related advice.

Notes to the financial statements

for the year ended 31 December 2017

Section 7: Other disclosures

7.6 New accounting standards

a) New and amended accounting standards adopted by the AMP group

A number of new accounting standards and amendments have been adopted effective 1 January 2017. These have not had a material effect on the financial position or performance of the AMP group.

b) New Accounting Standards issued but not yet effective

A number of new accounting standards and amendments have been issued but are not yet effective, none of which have been early adopted by the AMP group in this preliminary final report. These new standards and amendments, when applied in future periods, are not expected to have a material impact on the financial position or performance of the AMP group, other than as set out below

AASB 15 Revenue from Contracts with Customers

AASB 15 Revenue from Contracts with Customers (AASB 15) is effective for periods beginning on 1 January 2018. AASB 15 defines principles for recognising revenue and introduces new disclosure requirements. Under AASB 15, revenue will be recognised at an amount that reflects the consideration which an entity expects to be entitled to in exchange for transferring goods or services to a customer.

From an AMP group perspective, AASB 15 will primarily apply to fee revenue as life insurance contract related revenue will continue to fall outside the scope of AASB 15 and will be accounted for under other applicable standards. Based on the impact assessment undertaken by the AMP group, there is no material impact to the group upon adoption of AASB 15.

AASB 9 Financial Instruments

AASB 9 Financial Instruments (AASB 9) is effective for periods beginning on 1 January 2018. AASB 9 makes changes to the classification and measurement of financial instruments, introduces a new expected loss model when recognising expected credit losses (ECL) on financial assets, and also introduces new general hedge accounting requirements.

Based on the impact assessment undertaken by the AMP group, there is no material impact to the group upon adoption of AASB 9 classification and measurement, and ECL requirements. As permitted by AASB 9 the group has chosen to continue to apply the hedge accounting requirements of AASB 139 *Financial Instruments: Recognition and Measurement*.

AASB 16 Leases

AASB 16 Leases (AASB 16) is effective for periods beginning on 1 January 2019. AASB 16 requires lessees to recognise most leases on balance sheet as lease liabilities, with the corresponding right-of-use assets. Lessees have the option not to recognise 'short-term' leases and leases of 'low-value' assets.

Impact assessment for the adoption of AASB 16 is ongoing. The AMP group is not considering early adopting AASB 16.

AASB 17 Insurance Contracts

AASB 17 Insurance Contracts (AASB 17) is effective for periods beginning on 1 January 2021. The new standard will introduce significant change to the accounting for life insurance contracts and the reporting and disclosures in relation to those contracts.

The new standard, of itself, does not change the underlying economics or cash flows of the life insurance business. However, it is anticipated that there will be an impact on profit emergence profiles from life insurance contracts. Subject to any changes to regulation or legislation which may be made in response to the new standard, there may also be an impact on the determination of capital requirements and income tax.

The detailed requirements of the standard are complex and, in some cases, the final impact of these requirements will not be determined until interpretations and regulatory responses to the new standard are developed. The AMP group is currently undertaking an assessment of the potential impact of this standard.

7.7 Events occurring after reporting date

As at the date of this report, the directors are not aware of any matters or circumstances that have arisen since the end of the financial year that have significantly affected, or may significantly affect:

- the AMP group's operations in future years;
- the results of those operations in future years; or
- AMP group's state of affairs in future financial years.

Details of movements in controlled entities

for the year ended 31 December 2017

Changes in controlled entities comprise entities acquired and disposed through (a) activities in respect of investment entities controlled by the AMP life insurance entities' statutory funds and (b) purchase, sale, formation, and deregistration of minor operating controlled entities.

Details of investments in associated entities and joint venture entities

as at 31 December 2017

The majority of investment assets held by AMP are in the Australian life insurance statutory funds and measured at fair value through profit or loss. At any one time, the life insurance statutory funds hold investments in various vehicles, including associated entities, on behalf of policyholders. These investments are not part of the core wealth management business of AMP and did not have a material impact on the financial performance of the group. Investments in other associated entities which are accounted for using the equity method comprise a number of minor operating entities.
