

Notice to the ASX and Media regarding Fatfish Internet Group Limited's 12.5% purchase of Altairian Capital Holdings Limited and Update

Thursday, 8th of February 2018

Following the announcement on the 18th of December, Altairian Group is pleased to report today's completion of the purchase of 12.5% of Altairian Capital Holdings Limited ("ACHL") by Fatfish Internet Group Limited ("FIGL").

ACHL's first company, Altairian Capital Limited has been incorporated in England & Wales and has begun the process of obtaining FCA authorisation and building the offshore fund entities required as a fund management group. This accelerated process is expected to be completed in mid-March.

Altairian Capital's flagship cryptocurrency focussed "*Global Currencies Fund*" will be open for subscriptions from Institutional and professional investors only and the Global investor roadshow will begin in Sydney in March 2018.

Additionally, Fatfish Internet Group will host an analyst call-in (TBC) in which Altairian's CIO will present the vision for the fund and the company.

Finally, the Altairian Group is delighted to announce that Equity Capital Markets veteran Kyle Stewart will join as group Chief Operating Officer and Head of Trading. Mr. Stewart was previously Head of Trading at Citigroup (Asia), Jefferies and Knight Capital Group in Asia. Most recently, he re-trained as a full stack developer, and will oversee the development of the group's cryptocurrency trading engines and exchange-facing architecture. This key hire is inline with Altairian's vision of merging world-class investment and trading talent with best-in-class cryptoasset technology and security.

James Harris, CIO Altairian Group

Kin Wai Lau, CEO Fatfish Internet Group Limited
