The directors of King Island Scheelite Limited (**Company**) present their report together with the consolidated financial report for the six months ended 31 December 2017 and the auditor's review report thereon.

## DIRECTORS

The directors of the Company at any time during or since the end of the interim period are:

Johann JOOSTE-JACOBS	(Executive Chairman)	Appointed 30 November 2012

## REVIEW OF OPERATIONS

### Key Points

- The Tasmanian Environmental Protection Agency (**EPA**) approved the Dolphin Project Environmental Effects Report (**EER**) and accordingly issued Environmental Protection Notice (**EPN**) 7442-2 on 2 October 2017.
- The Board continues to examine the viability of alternative processing methodologies, with crushing test work currently being undertaken to investigate more efficient breakage of ore prior to gravity separation.
- The remaining balances of convertible notes (**Convertible Notes**) was converted into shares on 29 December 2017.
- 9,000,000 new options were issued to directors on 20 December 2017, having been approved by shareholders at the AGM.
- \$1,092,159 cash on hand as at 31 December 2017 (June 2017 \$1,502,394).

### Dolphin Project

The EER, allowing for an eight-year open cut mine, was completed and submitted to the EPA for its review during the December 2016 quarter. Following some additional studies, the EPA approved the EER and accordingly, issued EPN 7442-2 on 2 October 2017.

All relevant approvals for the operation of an open cut mine have now been obtained. Prior to commencement of operations, detailed operating plans must be submitted to various authorities. The Company is currently drafting the most important of these.

KIS is trialing a fine crushing machine (**VSI**) in place of grinding, to assess the possibility of producing a feed to gravity separation that has less fine scheelite than produced in a conventional flowsheet. Less fine scheelite would lead to better recovery of scheelite into concentrate.

Initial results indicate that the VSI is able to efficiently reduce the ore to the size required for the first concentration stage. Test work is ongoing to assess the metallurgical performance of the crushed ore versus conventionally crushed material.

The Company remains confident that the results of the additional test work currently being undertaken to develop the optimum flow sheet will be complete by the second quarter of 2018. The Company will continue discussions with potential offtake partners during this time, anticipating an investment decision later in 2018.

# DIRECTORS' REPORT (continued)

The current APT price is approximately USD 31,000 (AUD 38,900) per tonne, with WO<sub>3</sub> concentrate typically trading at a discount of 20% to APT.

## Issue of Redeemable Convertible Notes

- The \$2,000,000 Convertible Notes, made up of four Convertible Notes each with a face value of \$500,000, were convertible into shares at the Company's option.
- Interest accrued on the Convertible Notes over the total period was \$169,562.

3. Finalise work on the potential of staging the development of the mine, commencing with a lower production profile producing a lower grade concentrate.
4. Finalise the Definitive Feasibility Study, including offtake and financing.

# NOTES TO THE INTERIM FINANCIAL STATEMENTS

## SECTION A KEY FINANCIAL INFORMATION AND PREPARATION BASIS

### A1 REPORTING ENTITY

King Island Scheelite Limited (**Company**) is a company domiciled in Australia. These condensed consolidated interim financial statements ("interim financial statements") as at and for the six months ended 31 December 2017 comprise the Company and its subsidiaries (together referred to as the "Group"). The Group is primarily focused on redeveloping the well-understood and high-grade tungsten deposit on King Island.

The consolidated annual financial report of the Group as at and for the year ended 30 June 2017 is available upon request from the Company's registered office at Level 26, 259 George Street, Sydney NSW 2000.

### A2 STATEMENT OF COMPLIANCE

These interim financial statements are general purpose financial statements prepared in accordance with *AASB 134 Interim Financial Reporting* and the *Corporations Act 2001*, and with *IAS 34 Interim Financial Reporting*.

They do not include all of the information required for a full annual financial report. However, selected explanatory notes are included to explain events and transactions that are significant to an understanding of the changes in the Group's financial position and performance since the last annual consolidated annual financial report of the Group as at and for the year ended 30 June 2017.

These interim financial statements were approved by the Board of Directors on 16 February 2018

The Company is not of a kind referred to in *ASIC Corporations Instrument 2016/191* dated 1 April 2016 and in accordance with the Class Order, amounts in these interim financial statements and directors' report have been rounded to the nearest dollar, unless otherwise stated.

### A3 BASIS OF PREPARATION

In preparing these interim financial statements, Management has made judgements, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets and liabilities, income and expense. Actual results may differ from those estimates.

The significant judgements made by Management in applying the Group's accounting policies and the key sources of estimation uncertainty were the same as those that applied to the last annual consolidated annual financial report of the Group as at and for the year ended 30 June 2017.

### A4 GOING CONCERN

During the half year period to 31 December 2017, the Company incurred a loss of \$610,541 and net cash outflows from operating activities of \$404,603. Cash and cash equivalents at 31 December 2017 were \$1,092,159.

Notwithstanding this, the financial report has been prepared on the basis of a going concern. This basis presumes that funds will be available to finance future operations and that the realisation of assets and settlement of liabilities will occur in the normal course of business.

The Directors have prepared a cash flow forecast for the period to March 2019 and conducted a review of discretionary expenditure in order to preserve funds to ensure liabilities will be settled as and when they fall due. The Directors are satisfied there is sufficient funds available to settle liabilities as they become due and payable for the period of at least twelve months from the date of signing this interim financial report. In order to commercialise the Dolphin Project to generate future revenues, additional funding will be required.

The Board is currently reviewing various alternative capital raising options to fund working capital requirements. A final decision is anticipated in March.

### Borrowings

Borrowings are initially recognised at fair value, net of transaction costs incurred. Borrowings are subsequently measured at amortised cost. Any difference between proceeds (net of transaction costs) and the redemption amount is recognised in the income statement over the period of the borrowings using the effective interest method. Fees paid on the establishment of loan facilities, which are not an incremental cost relating to the actual drawdown facility, are recognised as prepayments and amortised on a straight-line basis over the term of the facility.

Borrowings are removed from the statement of financial position when the obligation specified in the contract is discharged, cancelled or expires. The difference between the carrying amount of a financial liability that has been extinguished or transferred to another party and the consideration paid, including any non-cash assets transferred or liabilities assumed, is recognised in other income and expenses.

Borrowings are classified as current liabilities unless the Company has an unconditional right to defer settlement of the liability for at least 12 months after the reporting period.

### Fair Values

The carrying amounts of financial liabilities, which are Level 3 instruments, are reasonable approximations of their fair values.

#### Exploration

In order to maintain current rights of tenure to exploration tenements, the Group is required to perform minimum exploration work to meet the minimum expenditure requirements specified by the Tasmanian Government.

A Dolphin Project tenement commitment for the year ended 31 December 2018 totalling \$175,000 is in place and all Dolphin Project licences and leases are in good standing. An exploration drilling program in EL19/2001 is planned to commence in February 2018, which will satisfy this tenement commitment.

#### Adjoining land

On 12 July 2005 the Company entered into an agreement with a third party vendor to acquire a 5 hectare block of land immediately on the northern boundary of the mine lease to ensure that an appropriate buffer zone is in place between the planned mine and Grassy township. The terms of this purchase were an initial payment of \$700,000 plus an additional \$100,000 payable upon the Company obtaining a permit for planning and development approval to carry on an extractive industry, both of which have been paid in full. There is a further \$100,000 payable to the third party vendor contingent upon the commencement of operations.

#### Hunan Nonferrous Metals Corporation Ltd

### King Island Council

On 1 July 2011, the Company entered into two agreements with King Island Council that have since been registered under Part 5 of the *Land Use Planning Approvals Act 1993 (TAS)*. These agreements provide that the Company pay, in each financial year, the amounts of \$50,000 inclusive of GST to the King Island Council for upgrading and improvement of Grassy infrastructure; and \$50,000 inclusive of GST to a Trust Fund, mainly for the purpose of upgrading and developing the community facilities in Grassy and surrounding areas.
