## Xref Integrates with fit2work

Xref Limited (ASX:XF1), the human resources technology company, today reported its latest platform integration with [fit2work](#), an arm of the online workforce management software provider, Mercury Group. Mercury Group was recently acquired by [Equifax](#).

The Mercury Group offers advanced, streamlined and easy-to-manage pre-employment screening and workforce solutions to customers. The integration will enable customers to move from one platform to the other, in both directions, allowing Xref customers to carry out reference checks from Mercury, as well as enabling current Mercury customers to access Xref via the fit2work platform.

**Matt Tebbe GM A/NZ Workforce Solutions, Equifax said:** *“Extending our relationship with Xref to our newly acquired platform demonstrates our commitment to continuing to offer best of breed solutions to our customers in the Australian employment market.”*

**Executive Director / CEO Lee-Martin Seymour said:** *“Our ultimate aim is to offer customers the solutions that work for them and their organisations. Our ability to do this comes from the strength of the relationships we build with other smart HR solutions that complement our own. Mercury has had an amazing journey and has a wonderful team, we’re delighted to be working with them.”*

**Executive Director / CTO Tim Griffiths said:** *“We are always exploring new ways to expand the platform and offer a world-class user experience to customers, candidates and their referees. Strategic partnerships are key to the ongoing success of the platform, and our ability to continually innovate for the benefit of customers is an evolution of grassroots relationships formed in our infancy.”*

**Chairman / Brad Rosser said:** *“Xref has not only earned the privilege to be involved in market trends and conversations, but has also learnt how to turn opportunities into real world success. The relationships the Company has formed are based on the team’s foresight for real outcomes and its ability to identify win-win initiatives for both parties.”*

Xref’s software as a service (SaaS) platform collects 60% more data, five times faster than traditional methods, and, by automating a vital task, protects companies from fraud, discrimination and privacy breaches.
