

Mobilicom releases MCU-RVT and SkyHopper VU Mobile HD Video & Data Receiver

- **Expands capabilities into content consumption and information sharing terminals**
- **The new product address both Mobilicom & SkyHopper target applications**
- **Offers a high-end device at a highly competitive price point for existing & prospective customers**
- **With SkyHopper VU the company increases revenue potential and expands potential market share to 50% of the drone's hardware value**
- **Product release marks major company objective with fourth product release, three months earlier than anticipated**

19 March 2018 – Mobilicom Limited has released the MCU-RVT (Remote Video Terminal) and SkyHopper VU (Viewer), mobile video & data receivers that allow Mobilicom to offer content consumption and information sharing capabilities to current and prospective customers.

Mobilicom MCU-RVT (Remote Video Terminal) is a unified ruggedized receiver terminal, advanced tablet and battery pack in compact formfactor. It is targeted at enterprise & governmental sectors within security, public safety, disaster relief and unmanned applications, offering a high-end device at a very competitive price point. MCU-RVT is designed to the highest standards to meet targeted applications prone to severe conditions and complex needs. It enables real-time HD video and broadband data content consumption, shared and distributed to multiple viewers simultaneously, which is critical in the operations being coordinated by target customers.

The SkyHopper VU (Viewer) offers a mobile HD video & telemetry receiver terminal for multiple viewers, specifically designed for commercial & industrial drones and robotics. It is targeted within security & surveillance, mining and resources applications. The SkyHopper VU improves the operational capabilities of any mobile team by providing real-time HD video & broadband data reception, essential for situation awareness & efficient operations.

By offering content consumption and a viewing terminal product, SkyHopper makes an important step to become an end-to-end, high-end component provider for the drone market. With this addition to the SkyHopper offering the company addresses up to 50% of the drone's overall hardware solution value, thereby enabling a higher revenue potential to Mobilicom. As Mobilicom and SkyHopper services additional essential components of the drone system solution, its customers will see benefits across quality, cost and efficiency by going to a single supplier to address multiple needs.

SkyHopper VU is the fourth product release from SkyHopper by Mobilicom, a major company objective it has reached three months earlier than anticipated in the company execution plan.

ASX Announcement

In preparation for the Mobilicom MCU-RVT and SkyHopper VU release this week, Mobilicom's team has already demonstrated the products to select customers, establishing market anticipation for the new product.

"Yet again we are proud to achieve an important company milestone ahead of schedule. The release of the product to both Mobilicom and SkyHopper markets extends our offering and better positions the company as a holistic end-to-end provider to the industry," stated Mobilicom's CEO Oren Elkayam.

About Mobilicom

Mobilicom is a high-tech company that designs, develops and markets solutions for mission critical and remote mobile private communication networks without the need for, or use of, any existing infrastructure. Mobilicom's products and technology are based on an innovative approach that merges 4G communication with Mobile MESH technologies into a unified solution, with a number of product families that have been commercially deployed. Mobilicom develops in-house and fully owns all assets for its unique technology and solutions, including: 4G modem, MESH networking, radios, HW & SW applications, among others. The technology is backed by its patent holding and know-how.
