

ASX Announcement

Fighting Metabolic Syndrome and diabetes:

- **New Patient Self-Management System from Lifespot Health is launched**

Melbourne, 21 March 2018 – Lifespot Health Limited (“Lifespot Health” or “Company”) is pleased to announce that after three years of development, its wholly owned subsidiary BodyTel has released its new patient self-management system for metabolic syndrome and diabetes. The system provides ongoing monitoring of parameters for blood sugar, blood pressure, blood coagulation and body weight. The system works with Bluetooth sensors from several leading medical equipment manufacturers that deliver their data to the patient's smartphone. The patient then has the ability to trace, edit and analyse the data (e.g. diary, graphs) and to share it with the Medical Data Cloud. This cloud can also connect other authorized users, like family members or close friends, to notify them in case of any deviations from predefined values. Further functionalities are under development.

BodyTel's new platform, that is offered as a white label platform-as-a-service solution via large medical device companies, fits the markets' requirements. In addition, the BodyTel platform is open to integrate new application cases. This creates a highly scalable operating business.

Lifespote Health is currently engaged in ongoing negotiations with major companies from the medical device sector about the introduction and further development of the BodyTel infrastructure.

According to the 2017 Home Healthcare Study, the global home healthcare market is projected to reach USD 364.7 billion by 2022, with a Compound Annual Growth Rate (CAGR) of 8.80 percent. 422 million people

worldwide suffered from diabetes in 2016 according to the International Diabetes Federation, with a projected number of 642 million by 2040.

“We are very proud that we can now start the sales offensive in this huge market.” said Heiner Emden, CEO and MD of Bodytel GmbH. “Today we have signed agreements with our existing client B.BRAUN for further development projects to be completed within the first half of 2018”.
