

Fluence Awarded Aspiral™ Wastewater Project in Changping District, Beijing, China

- Municipal wastewater treatment plant for Changping District government**
- First MABR Plant in Beijing area and with new local partner Glory Land (Beijing) Science & Technology Co., Ltd.**
- Effluent produced will outperform China's Class 1A standards**

Melbourne, New York May 3, 2018

Fluence Corporation Limited (ASX: FLC) announced today that it has secured a contract from the Changping District government for the purchase of an Aspiral™ S1 smart-packaged MABR-based solution (formerly known as C-MABR) for use in a municipal wastewater treatment plant. The plant will be located in Changping District, Municipality of Beijing, Hebei province, China.

This is the first contract won through Fluence's new local partners Glory Land (Beijing) Science & Technology Co., Ltd., which will also provide the civil works. Once completed, the plant will be used by the Changping District government to treat domestic wastewater from an innovative underground treatment installation.

Fluence's Aspiral™ S1 unit is designed to treat wastewater to effluent standards which exceed Class 1A quality in order to comply with Beijing local standards. The unit will treat 20 m³/d (5,000 GPD) and is scheduled to be commissioned as soon as October 2018. It is expected that this project will allow Fluence to leverage further opportunities for its decentralized, smart-packaged wastewater treatment solutions in China's capital, which has the strictest effluent standards in all of China.

Commenting on this most recent award in China, Fluence Managing Director & CEO Henry Charrabé said: "Following yesterday's unveiling of the rebranding of our Aspiral family of wastewater treatment solutions, it gives me great pleasure to announce today that we continue to make progress on our growth strategy in China with this sale of an Aspiral™ S1 in a new province and with a new partner. We've standardized features and options of our packaged units that make these innovative solutions easy to customize, install, use, maintain, and even expand. We're confident that, within this family of products, we have a solution to satisfy any customers' need for any municipal domestic wastewater treatment challenge in China."

Commenting on its partnership with Fluence, Glory Land Chairman Mr. Huashan Wu, noted, "We believe that Fluence's MABR technology is advanced and are quite confident that it satisfies the Municipality of Beijing's increasingly stringent standards for effluent discharge. We believe this is the beginning of a fruitful partnership between Fluence and Glory Land".

About Fluence Corporation Limited (ASX: FLC)

Fluence has experience operating in over 70 countries worldwide and employs more than 300 highly trained water professionals around the globe. The Company provides local, sustainable treatment and reuse solutions, while empowering businesses and communities worldwide to make the most of their water resources.

Fluence offers an integrated range of services across the complete water cycle, from early stage evaluation, through design and delivery to ongoing support and optimization of water related assets. With established operations in North America, South America, the Middle East and Europe, Fluence is also expanding into China's rural wastewater treatment market.

Global consultancy Frost and Sullivan recently awarded Fluence Corporation "2018 Global Decentralized Water and Wastewater Treatment Company of the Year", noting in their award dissertation:

"While typical decentralized water treatment systems are relatively expensive, complicated, and inefficient, Fluence Corporation leverages innovative and smart technology solutions backed by decades of industrial know-how to excel in water and wastewater treatment solutions. Fluence's excellence becomes apparent through its success, as the company continues to expand its existing offerings as well as partnerships with other prominent companies in the industry. With its easy to use, sustainable, smart and cost-effective solutions as well as a remarkable year of growth, innovation, and leadership, Fluence Corporation earns Frost & Sullivan's 2018 Global Company of the Year Award in the decentralized water and wastewater treatment industry."
