

## **ASX ANNOUNCEMENT** **Lifespot Health Limited**

ASX: LSH 5th June 2018

### **B.Braun to launch Omnitest 5 BT with Body-Tel for measuring blood glucose**

- **New B.Braun Omnitest 5 BT launch date July 2018 with BodyTel software**
- **B.Braun discontinues the support for older sensors & substitutes old sensors**
- **First regions Germany and UK, further countries will follow this year**

Lifespot Health Ltd. is pleased to announce that B.Braun, one of the largest global manufacturers of medical grade diagnostic devices will launch their new Omnitest 5 BT meter for measuring blood glucose in July 2018. The Omnitest 5 BT fully integrated Bluetooth connected software, developed by BodyTel GmbH incorporates connection to the Body-Tel platform and provides diabetes patients with an advanced system that enables data saving and sharing via the cloud-based Body-Tel platform.

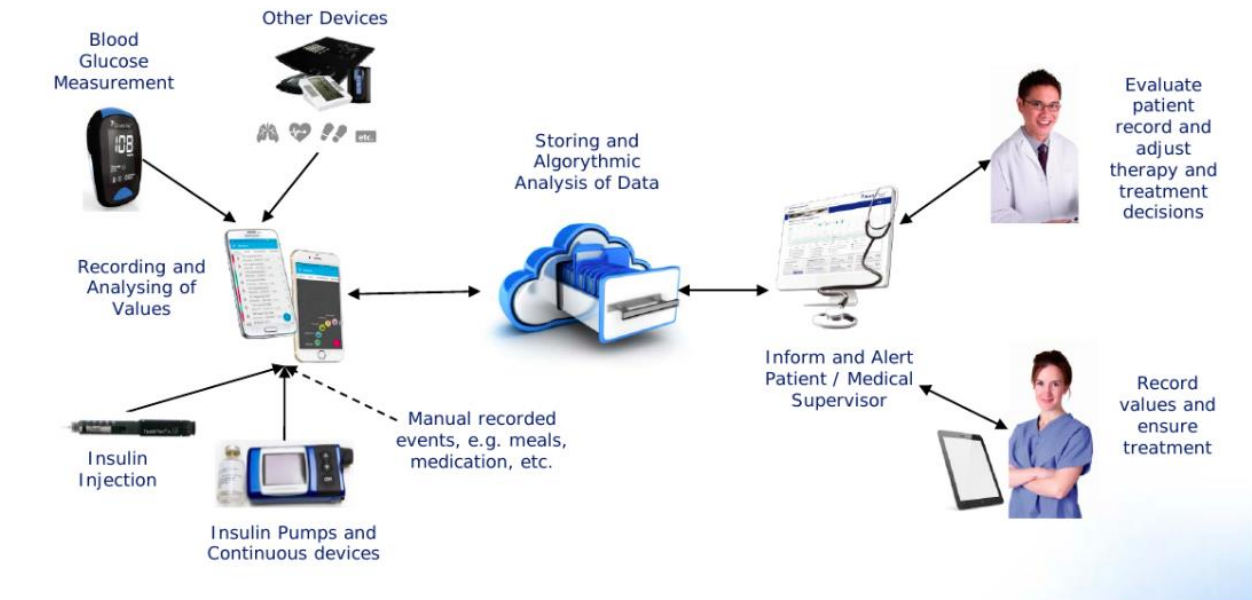

Heiner Emden, Executive Director of Lifespot Health Ltd. & Managing Director of BodyTel GmbH said “we are delighted to see the great work we have done with B.Braun come to life with this new product launch. Now diabetes patients will be able to better manage their blood sugar with the integrated smart device and better manage their condition using their smart phone or web platform with Body-Tel. We think this is the beginning of a global roll-out of the most advanced cloud-based management system for diabetes patients, their healthcare professional and their families.”

Body-Tel is an integrated digital diagnostic and monitoring system that combines enhanced sensor technology with self-learning algorithms, allowing patients and healthcare professionals to efficiently monitor chronic diseases and critical conditions on their personal and professional digital devices including Smartphone, iPad / Tablets and desktop.

Located in Germany the Company’s team of medically focussed digital developers have a rigorous quality management system (QMS) that is ISO 13485 and IEC/EN 62304 certified. The Company’s QMS renewal audit was conducted and re-certified in May this year. These certifications and the Company’s capability in digital health development have led to the establishment of a strong project pipeline in 2018 with B. Braun and other diagnostic and device manufacturers and marketers in Europe.

The Company's current business development focus is to drive to commercialisation of over ten development projects during 2018 and 2019 that will lead to ongoing licencing and service contracts of the Body-Tel platform.

The Company will continue to provide updates on progress and new developments of B.Bruan, Buerer and other new accounts as milestones are reached.
