

ASX Announcement 25 June 2018

HAITI - Termination

3D Resources Ltd. ("3D Resources" or "the Company") announces that it has terminated its Haiti agreements with Resource Générale Corporation Inc ("RGC") (formerly VCS Mining Inc) and Sono Global Holdings Inc ("Sono") in respect to its current investments in Ayiti Resources SA and Delta Société Minière SA which hold the Grand Bois and Morne Bossa gold projects respectively. This decision has been taken because of the lack of progress achieved to date due to the Company's inability to obtain necessary permits to import equipment into Haiti to facilitate drilling necessary to complete feasibility studies. The decision to terminate has also been influenced by various conflicts which have arisen with the Company's Haitian partners following the calling of force majeure.

Under the terms of its termination the Company is seeking a refund of its expenditure on the projects and compensation for loss.

The parties are in discussions to determine whether they are able to restructure the agreements under which the Company would develop the Grand Bois and Morne Bossa projects. The Company continues to believe the Grand Bois and Morne Bossa projects continue to represent an attractive investment opportunity if it can acquire complete control and providing the costs of holding the projects until the proposed new Mining Act in Haiti is passed are acceptable, at which time the Company believes it would be able to resume work on the projects.

As previously announced the Company is already reviewing other project opportunities in a variety of commodities.
