INVICTUS APPOINTS GETECH TO REPROCESS LEGACY DATASET FOR CABORA BASSA PROJECT

Highlights

- **Getech appointed to provide data management and technical support for Cabora Bassa Project and preparing to mobilise to Zimbabwe**
- **Getech will provide services that encompass initial data management, reprocessing and reinterpretation of US\$30million legacy Mobil dataset**
- **Low cost, high impact work program in progress to mature Cabora Bassa Project and the TCF+ Mzarabani conventional gas-condensate target to farm out**

Invictus Energy Limited ("Invictus" or "the Company"), is pleased to announce that it has appointed Getech Group plc (Getech) to provide data management and technical support to Invictus for the Cabora Bassa Project.

Getech is a leading AIM-listed supplier of petroleum consultancy services to companies and governments in the oil and gas industry and has extensive experience in Africa. Getech will provide support to the Cabora Bassa Project as follows:

- data reprocessing
- technical analysis
- basin modelling, hydrocarbon generation and expulsion
- identification and development of additional prospects and leads
- prospective resource assessment
- farm out support

Invictus Managing Director Scott Macmillan commented on the appointment, "now that the harmonised elections in Zimbabwe have been concluded, the administration is focused on continuing to attract foreign investment and resurrecting the economy. We are excited to appoint Getech to undertake the reprocessing and reinterpretation work that will complement the internal work by our subsurface team. The aim of this work is to reprocess the legacy data Mobil acquired by utilising the latest seismic processing techniques which have improved significantly since the data was acquired over 25 years ago.

INVICTUS
ENERGY LIMITED

We will then obtain a robust view of the subsurface which will enable us to map out any further prospects and leads within our high potential acreage in addition to the world class Mzarabani Prospect. We have got an aggressive work program and timeline to mature the Cabora Bassa Project to commence a farm out campaign over the coming months. We look forward to advancing the project and updating the market on our progress in due course as our work program delivers results”.

About the Cabora Bassa Project

The Cabora Bassa Project encompasses the Mzarabani Prospect, a TCF+ conventional gas-condensate target. The prospect is defined by a robust dataset acquired by Mobil in the early 1990s that includes seismic, gravity, aeromagnetic and geochemical data.
