#### **Summary of the offer**

Eagle Mountain confirms that it has today lodged with ASIC a prospectus ("**Prospectus**") for a non-renounceable entitlement offer of 23,125,000 New Options at an issue price of \$0.01 per New Option to registered shareholders with an address in Australia, New Zealand, Switzerland or Singapore at 5:00pm (WST) on 7 September 2018 ("**Record Date**"), on the basis of 1 New Option for every 4 shares held at the Record Date, to raise up to approximately \$231,250 (before costs) ("**the Entitlement Offer**").

The New Options will be unlisted. If all New Options are exercised, Eagle Mountain will raise up to \$9.25 million (before costs).

ASX Announcement | Date 3 September 2018

In addition to the Entitlement Offer and the Shortfall Offer, the Company also makes an offer of Piggy Back Options to all persons who subscribe for New Options under either the Entitlement Offer or the Shortfall Offer, on the basis of one Piggy Back Option issued for every one New Option exercised ("**Piggy Back Option Offer**"). The Piggy Back Options issued upon the exercise of New Options will be exercisable at \$0.80 each on or before 15 December 2019. The issue of Piggy Back Options under the Piggy Back Options Offer is conditional upon shareholder approval.

### ***Use of funds***

The Company is about to commence its highly anticipated 6,000 metre diamond drilling program at the Silver Mountain copper-gold project in Arizona. Since listing on the ASX in March, the drill program has now doubled in size following successful exploration campaigns and will mark the first time a modern comprehensive drilling campaign has been conducted over the project area.

Drilling will target the four unique styles of mineralisation found within the Silver Mountain Project, which lies on the same geological setting that hosts world-class porphyry copper mines such as Bagdad and Miami and also BHP/Rio's Resolution project (one of the largest undeveloped copper deposits in the world). They also lie on the southern extension of the metallogenic belt that hosts United Verde and Iron King mines.

Funds raised from the Entitlement Offer and Shortfall Offer will contribute to costs of the offers and working capital. The exercise of New Options will provide additional funding to allow Eagle Mountain to continue with its drilling program at the Silver Mountain Project in the event of successful drill results in the initial stages of the program. The ability to continue drilling will save time and cost by avoiding the need to demobilise the drilling rigs and infrastructure and then remobilise at a later date.

### ***Lead Manager***

The Company has engaged Peloton Capital Pty Ltd as Lead Manager. The Lead Manager will be entitled to receive:

- a management fee of \$23,125 (plus GST) in relation to the Entitlement Offer; and
- a capital raising fee of 4% (plus GST) of the total amount of shortfall arranged and placed by the Lead Manager under the Shortfall Offer.

# 1. Investment Overview

---

## 1.1 Introduction

Eagle Mountain is an Australian public copper-gold exploration company listed on ASX, which is focused on the strategic exploration and development of the highly-prospective Silver Mountain Project located just outside of Phoenix, Arizona.

The accelerated pace of exploration since its ASX listing in March 2018, supported by state-of-the-art geophysical technologies, has significantly improved the Company's understanding of its flagship Silver Mountain Project.

The Company is now laying the groundwork for an aggressive exploration program in the first half of its 2018/2019 financial year.

## 1.2 Purpose of the Rights Offer and Shortfall Offer

The purpose of the Rights Offer and Shortfall Offer is to offer New Options to raise up to approximately \$231,250 (before costs) on the issue of New Options, and up to \$9,250,000 (before costs) upon the exercise of New Options. The exercise of New Options will provide additional funding to allow Eagle Mountain to continue with its drilling program at the Silver Mountain Project in the event of successful drill results in the initial stages of the program. The ability to continue drilling will save time and cost by avoiding the need to demobilise the drilling rigs and infrastructure and then remobilise at a later date.

The drilling program, which will begin in September 2018, has doubled in size since Eagle Mountain listed on the ASX in March of this year, and will mark the first time a modern comprehensive drilling campaign has been conducted over the Silver Mountain Project area.

Drilling will target the four unique styles of mineralisation found within the Silver Mountain Project, which lies on the same geological setting that hosts world-class porphyry copper mines such as Bagdad and Miami and also BHP/Rio's Resolution project (one of the largest undeveloped copper deposits in the world). They also lie on the southern extension of the metallogenic belt that hosts United Verde and Iron King mines.

Refer to Section 2.4 for further details.

## 1.3 Company's assets

The Company's primary asset is the Silver Mountain Project which is owned by Eagle Mountain through its wholly owned subsidiary Silver Mountain LLC.

The Silver Mountain Project currently comprises four prospects, being the Pacific Horizon, Scarlett, Red Mule and Rhyolite prospects.

Details of the Company's assets and current activities are set out in the announcements made to ASX and are available on the ASX website, [www.asx.com.au](http://www.asx.com.au), using the Company's ASX code 'EM2', or the Company's website at [eaglemountain.com.au](http://eaglemountain.com.au).

## 1.4 Key investment risks

The risks set out below have been identified as being key risks specific to an investment in the Securities offered by the Company pursuant to this Prospectus. These risks may adversely affect the Company's financial position, prospects and price of its Securities.

- (a) **New Options are short-dated with an exercise price above the current market price for Shares:** The New Options are exercisable at \$0.40 each and expire on 15 December 2018. As at 31 August 2018 the closing market price of Shares quoted on ASX was \$0.32 (refer to Section 8.8 for further information about the historical market price of Shares). There is a risk that the Company's Share price may remain below the New Option exercise price of \$0.40 and the New Options may never become 'in the money' before their expiry date.
- (b) **Exploration, geological and development risks:** The success of Eagle Mountain depends on the delineation of economically mineable reserves and resources, access

to required development capital, movement in the price of commodities, maintaining title to Eagle Mountain's Mining Claims and obtaining all consents and approvals necessary for the conduct of its exploration activities. The actual costs of exploration may materially differ from Eagle Mountain estimates. Eagle Mountain cannot give any assurance that cost estimates and their underlying assumptions will be realised in practice. This may materially and adversely affect Eagle Mountain's viability.

- (c) **Future capital requirements:** Eagle Mountain's ongoing activities are likely to require substantial further financing in the future, in addition to amounts raised pursuant to the Offers. Any additional equity financing may be dilutive to Shareholders, may be undertaken at lower prices than the Offer Price or may involve restrictive covenants which may limit Eagle Mountain's operations and business strategy. Although the Directors believe that additional capital can be obtained, there cannot be any assurance that appropriate capital or funding, if and when needed, will be available on terms favourable to Eagle Mountain or at all.
- (d) **Reliance on key personnel:** Recruiting and retaining qualified personnel is important to Eagle Mountain's success. Eagle Mountain has a small number of employees and may be adversely impacted by employees ceasing their employment with Eagle Mountain.
- (e) **Commodity price fluctuations:** In the event of exploration and development success, any future revenue derived from the future sale of copper and gold will expose Eagle Mountain to commodity price and exchange rate risks. Commodity prices fluctuate and are affected by numerous factors beyond the control of Eagle Mountain. These factors include world demand for commodities, forward selling by producers and the level of production costs. Moreover, prices are also affected by macroeconomic factors such as expectations regarding inflation, interest rates and global and regional demand for, and supply of, these commodities.

Refer to Section 6 for further details of the key risks relevant to an investment in the Company.

## 1.5 The Board

The Board presently comprises three Directors and one Alternate Director.

Biographies of the Directors are detailed below.

The Board considers that Rick Crabb and Roger Port are independent Directors because they are free from any business or other relationship with the Company that could materially interfere with, or reasonably be perceived to materially interfere with, the independent exercise of their judgement as Directors.

## 2.2 Shortfall Offer

(a) **Offer**

Any New Options not subscribed for under the Rights Offer by Eligible Shareholders pursuant to their Entitlement will form the Shortfall.

The Shortfall Offer is a separate offer under this Prospectus of the New Options which comprise the Shortfall, at an issue price of \$0.01 per New Option (i.e. the same Offer Price as the Rights Offer).

Eligible Shareholders and other persons nominated by the Lead Manager may apply under the Shortfall Offer, provided that they are eligible under all applicable securities laws to receive the Shortfall Offer.

Each New Option issued pursuant to the Shortfall Offer when exercised will entitle the holder to be issued one Share.

Shares issued upon the exercise of New Options will be fully paid and will rank equally in all respects with the Existing Shares on issue. Further details of the rights attaching to Shares are set out in Section 5.2.

Persons who subscribe for New Options issued under the Shortfall Offer are also offered Piggy Back Options under the Piggy Back Options Offer, as described in Section 2.3.

The Shortfall Offer is not underwritten and is not subject to a minimum subscription requirement.

The Company reserves the right to withdraw the Shortfall Offer at any time before New Options are issued pursuant to it. In that event, relevant Application Moneys will be refunded without interest in accordance with the Corporations Act.

Refer to Section 3.7 for details of how to apply for New Options under the Shortfall Offer.

(b) **Offer conditional**

The issue of New Options under the Shortfall Offer to Related Parties of the Company (e.g. Directors or entities controlled by Directors) is conditional upon Shareholder approval being obtained at a general meeting of the Company. If such Shareholder approval is required, the Company proposes to seek such approval at its annual general meeting to be held on or before 30 November 2018 (**General Meeting**) and in any event within 3 months of the Prospectus Date.

(c) **Allocation**

The Directors, in consultation with the Lead Manager, will have discretion as to how to allocate the Shortfall. Preference will not be conferred on Eligible Shareholders. New Options will be allocated in a manner considered to be appropriate to Applicants under the Shortfall Offer.

The Company cannot guarantee that Applicants to the Shortfall Offer will receive the number of New Options applied for or any at all. If an Applicant does not receive any or all of the New Options applied for under the Shortfall Offer, the excess Application Moneys will be returned to the Applicant without interest.

The Company will not allocate New Options under the Shortfall Offer to the extent that the Applicant's voting power in the Company would, upon exercise of the New Options and together with the Applicant's Associates, exceed the takeover thresholds in the Corporations Act (i.e. acquiring a controlling interest in 20% or more of the issued Shares, or increasing an existing controlling interest of more than 20%, subject to certain exceptions permitted by law).

(d) **Placement of balance**

If, after close of the Shortfall Offer, any Shortfall has not been subscribed for, the Directors reserve the right to place some or all of those New Options within 3 months after the close of the Shortfall Offer.

## 2.3 **Piggy Back Options Offer**

Holders of New Options issued under the Rights Offer or the Shortfall Offer are also offered Piggy Back Options, to be issued by the Company on the basis of 1 Piggy Back Option for every 1 New Option exercised. Piggy Back Options will be granted for nil additional cash consideration if and when New Options are exercised. Exercise of the New Options will constitute an Application for Piggy Back Options.

Piggy Back Options issued upon the exercise of New Options will be exercisable at \$0.80 each on or before 15 December 2019. Further details of the terms of the Piggy Back Options are set out in Section 5.3.

Each Piggy Back Option issued pursuant to the Piggy Back Options Offer when exercised will entitle the holder to be issued one Share.

The Piggy Back Options Offer is not subject to a minimum subscription requirement. The Company will not apply for quotation of the Piggy Back Options offered under this Prospectus.

The Piggy Back Options Offer will open on the same date as the Rights Offer and Shortfall Offer, being Tuesday, 11 September 2018, and will close at 5:00pm (WST) on Saturday, 15 December 2018.

The issue of Piggy Back Options under the Piggy Back Options Offer is conditional upon Shareholder approval being obtained at the General Meeting for the issue of the Piggy Back Options, for the purposes of Listing Rule 7.1. If such Shareholder approval is not obtained, the Piggy Back Options Offer will not proceed.

A prospectus for the issue of Piggy Back Options, and the offer of Shares that may be issued upon the exercise of Piggy Back Options, will be sent to holders of New Options at the time that New Options are issued in order to facilitate the quotation of Shares issued upon the exercise of Piggy Back Options.

## 2.4 Proposed use of funds

The purpose of the Offers of New Options is to raise funds for the Company's ongoing exploration of the Silver Mountain Project.

The Company will raise up to approximately \$231,250 (before costs) from the issue of New Options, if the Rights Offer and Shortfall Offer are fully subscribed.

If all New Options offered under this Prospectus are subscribed for, the Company will raise approximately an additional \$4,625,000 (before costs) assuming 50% of the New Options are exercised, and an additional \$9,250,000 (before costs) assuming 100% of the New Options are exercised.

The table below shows how the Company intends to apply the funds raised in each of the three scenarios:

Use of funds	Full Subscription (Rights Offer and Shortfall Offer)	Full Subscription and 50% of New Options Exercised	Full Subscription and 100% of New Options Exercised
Cash on hand (as at 30 June 2018)	\$6,795,421	\$6,795,421	\$6,795,421
Funds raised	\$231,250	\$4,856,250	\$9,481,250
<b>Total funds available</b>	<b>\$7,026,671</b>	<b>\$11,651,671</b>	<b>\$16,276,671</b>
<b>Use of funds</b>			
Drilling and assaying	\$3,472,000	\$6,672,000	\$10,397,000
Geology, geophysics and geochemistry	\$2,286,000	\$3,086,000	\$3,586,000
Costs of the Offers	\$48,831	\$62,550	\$75,156

<b>Total</b>	<b>\$7,026,671</b>	<b>\$11,651,671</b>	<b>\$16,276,671</b>

### Notes:

1. The table shows the Company's proposed use of funds assuming the Rights Offer and Shortfall Offer close fully subscribed, and assuming 50% of the New Options are exercised, and 100% of the New Options are exercised. These are illustrative examples only, and there can be no guarantee that the Rights Offer and Shortfall Offer will close fully subscribed, nor that any of the New Options will be exercised.
2. The Company has prepared a one year exploration budget and considers that the amounts specified in the table above will be sufficient to carry out its exploration activities over this period, in respect of each scenario listed.
3. Costs of the Offers include the other costs identified in Section 8.5.

4. Working capital includes corporate administration and operating costs and may be applied to directors' fees, ASX and share registry fees, legal, tax and audit fees, insurance and travel costs.
5. If funds raised are less than full subscription, the Company will allocate those funds first towards the costs of the Offers, and then to working capital.

The information set out in the above table is a statement of present intention as at the Prospectus Date. The exact amount of funds spent by the Company will depend on many factors that cannot be ascertained as at the Prospectus Date. Accordingly, the Directors reserve the right to alter how the funds raised will be applied.

On completion of the Offers, the Board considers that the Company will have sufficient funds to carry out the objectives stated in the above table. If the Rights Offer and Shortfall Offer do not close fully subscribed, there will be no material adverse effect on the Company's ability to continue as a going concern or its debt levels, as the Company has cash reserves as at 30 June 2018 of \$6,795,421.

Details of the Company's current activities are set out in the announcements made to ASX and are available on the ASX website, [www.asx.com.au](http://www.asx.com.au), using the Company's ASX code 'EM2', or the Company's website at [eaglemountain.com.au](http://eaglemountain.com.au).

This Prospectus is distributed in connection with an offer of Securities in Singapore that will not be issued to any person other than a person to whom this Prospectus is sent with the consent of the Company. A person receiving a copy of this document in Singapore may not treat the same as constituting an invitation to that person unless such an invitation could lawfully be made to them without compliance with any registration or legal requirements, or where such registration or legal requirements have been complied with.

## 2.8 Switzerland resident Shareholders

The Entitlements and New Options may not be publicly offered in Switzerland and will not be listed on the SIX Swiss Exchange (**SIX**) or on any other stock exchange or regulated trading facility in Switzerland. This document is personal to the recipient only and not for general circulation in Switzerland.

## 2.9 Excluded Shareholders

The Rights Offer is not made to Shareholders who on the Record Date have a registered address outside Australia, New Zealand, Singapore or Switzerland (**Excluded Shareholders**).

Neither the Prospectus, the Entitlement and Acceptance Form or any Application Form constitutes an offer or invitation in any place in which, or to any person to whom, it would not be lawful to make such an offer or invitation.

In making the decision to not extend the Rights Offer to Excluded Shareholders, the Company has taken into account:

- the small number of Shareholders outside Australia, New Zealand, Singapore and Switzerland;
- the number and value of New Options that would be offered to Shareholders outside Australia, New Zealand, Singapore and Switzerland; and
- the cost of complying with the legal requirements and requirements of regulatory authorities in the overseas jurisdictions.

The Rights Offer is made to all Eligible Shareholders. The Company is not required to determine whether or not any registered Eligible Shareholder holds Shares on behalf of persons who are resident outside Australia, New Zealand, Singapore or Switzerland (including nominees, custodians and trustees) or the identity or residence of any beneficial owners of Shares.

Any Eligible Shareholders who hold Shares on behalf of persons who are resident outside Australia, New Zealand, Singapore or Switzerland, are responsible for ensuring that any dealing with New Options issued under the Rights Offer do not breach the laws and regulations in the relevant overseas jurisdiction, and should seek independent professional advice and observe any applicable restrictions relating to the taking up of Entitlement or the distribution of this Prospectus or the Entitlement and Acceptance Form.

The distribution of this Prospectus and accompanying Application Forms (including electronic copies) outside Australia, New Zealand, Singapore or Switzerland may be restricted by law and therefore persons who come into possession of this Prospectus should seek advice on and observe any such restrictions. Any failure to comply with such restrictions may constitute a violation of applicable securities laws.

## **2.10 Applicants from outside of Australia and New Zealand**

This Prospectus does not constitute an offer of Securities in any jurisdiction where, or to any person to whom, it would not be lawful to issue the Prospectus or make the Offers.

It is the responsibility of any Applicant who is resident outside of Australia or New Zealand to ensure compliance with all laws of any country relevant to their Application, and any such Applicant should consult their professional adviser as to whether any government or other consents are required, or whether any formalities need to be observed to enable them to apply for and be issued offered Securities. Return of a duly completed Application Form will constitute a representation and warranty by an Applicant that there has not been any breach of such regulations.

The Company has not taken any action to register or qualify the Securities offered pursuant to this Prospectus, or the Offers, or otherwise to permit a public offering of the Securities offered, in any jurisdiction outside Australia.

Your Entitlement and Acceptance Form or BPay® payment must be received by no later than **5.00pm (WST) on the Closing Date**.

If you do not accept all of your Entitlement then the balance of your Entitlement will lapse and the New Options that are not subscribed for will form part of the Shortfall.

#### 3.3 Accepting your Entitlement in full and applying for additional New Options under the Shortfall Offer

If you wish to accept your Entitlement in full and apply for New Options under the Shortfall Offer, either:

- (a) complete the Entitlement and Acceptance Form for all of your Entitlement **and** specify the number of additional New Options you wish to apply for in accordance with the instructions on the form. Return your completed form together with a cheque for the Application Moneys to the Company's Share Registry – refer to Section 3.5; or
- (b) make a payment through the BPay® facility for all of your Entitlement **and** the number of additional New Options you wish to apply for in accordance with the instructions on the Entitlement and Acceptance Form.

Your Entitlement and Acceptance Form or BPay® payment must be received by no later than **5.00pm (WST) on the Closing Date**.

The allocation and issue of New Options under the Shortfall Offer will be determined by the Directors in their discretion, in consultation with the Lead Manager. The allocation policy in relation to the Shortfall Offer is set out in Section 2.2(c).

### 3.4 Allowing your Entitlement to lapse

If you do not wish to accept any of your Entitlement, you are not required to take any action. If you do nothing then:

- (a) your Entitlement will lapse and the New Options not subscribed for will form part of the Shortfall; and
- (b) your percentage shareholding in the Company may be diluted and reduce, if the New Options are subsequently exercised.

### 3.5 Lodging your Entitlement and Acceptance Form

Unless you are making payment by BPay®, completed Entitlement and Acceptance Forms and accompanying cheques for Application Moneys must be mailed to:

**Eagle Mountain Mining Limited**

c/- Computershare Investor Services Pty Limited

GPO Box 505

Melbourne, Victoria, 3001, Australia

All cheques must be drawn on an Australian bank or bank draft made payable in Australian dollars to “**Eagle Mountain Mining Limited**” and crossed “Not Negotiable”.

You must ensure that your completed Entitlement and Acceptance Form (or payment by BPay® - refer to Section 3.6 below) is received by **5.00pm (WST) on the Closing Date**.

The Entitlement and Acceptance Form does not need to be signed to be a binding acceptance of your Entitlement New Options. If the Entitlement and Acceptance Form is not completed correctly it may still be treated as valid. The Company’s decision as to whether to treat the acceptance as valid and how to construe, amend or complete the Entitlement and Acceptance Form is final.

### 3.6 Payment by BPay®

Payment by BPay® should be made according to the instructions set out on the Entitlement and Acceptance Form using the BPay® Biller Code and Customer Reference Number shown on the form. You can only make a payment via BPay® if you are the holder of an account with an Australian financial institution that supports BPay® transactions.

The reference number shown on each Entitlement and Acceptance Form (**Reference Number**) is used to identify your holding. If you have multiple holdings you will have multiple Reference Numbers. You must use the Reference Number to pay for each holding separately. Failure to do so may result in an underpayment. If you pay by BPay® and do not pay for your full Entitlement, the remaining Entitlement will form part of the Shortfall.

If you pay by BPay®:

- (a) you do not need to return the Entitlement and Acceptance Form but are taken to have made the declarations on that form; and
- (b) if you do not pay for your Entitlement in full, you are deemed to have taken up your Entitlement in respect of such whole number of New Options which is covered by your Application Moneys.

Your financial institution may implement cut-off times with regards to electronic payment and you should therefore take this into consideration when making payment. You are responsible for ensuring that your BPay® payment is received by the Company before **5.00pm (WST) on the Closing Date**. The Company is not responsible for any postal or delivery delays or delay in the receipt of a BPay® payment.

### **3.7 Applications for Shortfall through the Lead Manager**

Persons who receive a firm allocation or other offer of New Options under the Shortfall Offer from the Lead Manager (either directly or via their stockbroker) may apply for New Options by arrangement with the Lead Manager.

Each such Applicant must submit a completed Shortfall Application Form together with the relevant Application Money in accordance with the Lead Manager's directions.

By making an Application to the Lead Manager, an Applicant will be taken to have confirmed that they have received a copy of the Prospectus together with the Shortfall Application Form.

### **3.8 Application Moneys to be held on trust**

Application Money will be held by the Company on trust in accordance with the requirements of the Corporations Act until the New Options to which the Application Money pertains are issued under an Offer, or a refund of Application Money occurs in the circumstances described in this Prospectus.

The Company will retain any interest earned on Application Money, including in the event of any refund of Application Money.

Applications and Application Moneys may not be withdrawn by an Applicant once they have been received by the Company.

### **3.9 Allotment and issue of New Options**

New Options under the Rights Offer and Shortfall Offer are expected to be issued and Holding Statements despatched as soon as practicable after the Closing Date, in accordance with the ASX Listing Rules and the timetable set out in the Key Offer Information section. New Options under the Shortfall Offer will be issued on a progressive basis.

It is the responsibility of Applicants to determine their allocation prior to trading New Options. Applicants who sell New Options before they receive their Holding Statements do so at their own risk.

### **3.10 ASX quotation of New Options**

The Company will not apply for quotation of the New Options offered under this Prospectus. The New Options will remain a class of unquoted Options.

Upon exercise of a New Option, a holder will receive one Share. The Company will apply for quotation of the Shares issued upon exercise of the New Options.

### **3.11 No brokerage**

Brokerage or transfer/stamp duty is not payable in relation to an Offer.

### **3.12 CHESS**

The Company participates in the Clearing House Electronic Sub-register System (**CHESS**). ASX Settlement, a wholly owned subsidiary of ASX, operates CHESS in accordance with the Listing Rules and the ASX Settlement Rules. The Company operates an electronic issuer-sponsored sub-register and an electronic CHESS sub-register. The two sub-registers together make up the Company's principal register of Securities.

Under CHESS, the Company will not issue certificates to successful Applicants. Instead, the Company will provide Applicants with a Holding Statement (similar to a bank account statement) that sets out the number of New Options allotted to them under this Prospectus.

This statement also advises Shareholders of either their Holder Identification Number (**HIN**) in the case of a holding on the CHESS sub-register or Security Holder Reference Number (**SRN**) in the case of a holding on the issuer sponsored sub-register.

If you are registered on the issuer sponsored sub-register, your statement will be dispatched by the Company's Share Registry and will contain the number of New Options issued to you under this Prospectus and your security holder reference number.

A CHESS Statement or issuer sponsored statement will routinely be sent to Shareholders at the end of any calendar month during which the balance of their shareholding changes. Shareholders may request a statement at any other time, however, a charge may be made for additional statements.

### **3.13 Privacy**

The Company collects information about each Applicant from all Application Forms for the purpose of processing the Applications and, if the Applicant is successful, to administer their security holding in the Company.

By submitting an Application Form, you agree that the Company may use the information in the form for the purposes set out in this privacy disclosure statement.

The Company and the Share Registry may disclose your personal information for purposes related to your investment to their agents and service providers including but not limited to those listed below or as otherwise authorised under the Privacy Act (if and as applicable):

- the Share Registry for ongoing administration of the Company's register;
- the Lead Manager for the purposes of managing the Offers and determining any shortfall in New Options; and
- the printers and the mailing house for the purposes of the preparation and distribution of Holding Statements and for the handling of mail.

If an Applicant becomes a security holder of the Company, the Corporations Act requires the Company to include information about the security holder (name, address and details of the securities held) in its public register. This information must remain in the Company's register even if that person ceases to be a security holder of the Company. Information contained in the Company's register is also used to facilitate distribution payments and corporate communications (including the Company's financial results, annual reports and other information that the Company may wish to communicate to its security holders) and compliance by the Company with legal and regulatory requirements.

If an Applicant does not provide the information required on an Application Form, the Company may not be able to accept or process their Application.

Under the Privacy Act, a person may request access to that person's personal information held by (or on behalf of) the Company or the Share Registry. An Applicant can request access to their personal information by writing to the Company through the Share Registry.

### **3.14 Taxation implications**

The taxation obligations and the effects of participating in an Offer can vary depending on the circumstances of each individual Applicant. Applicants who are in doubt as to their taxation position should seek professional advice. It is the sole responsibility of Applicants to inform themselves of their taxation position resulting from participation in an Offer.

The Directors do not consider that it is appropriate to give potential Applicants advice regarding the taxation consequences of applying for New Options, as it is not possible to provide a comprehensive summary of the possible taxation positions of potential Applicants.

Neither the Company nor any of its officers, employees or advisers accepts any responsibility or liability for any taxation consequences to Applicants in relation to an Offer.

For personal use only

- (b) the unaudited pro forma consolidated statement of financial position of the Company as at 30 June 2018 incorporating the effect of the Offers at full subscription.

The unaudited pro forma consolidated statement of financial position has been derived from the financial statements of the Company and adjusted to reflect pro forma assets and liabilities of the Company as if completion of the Rights Offer and Shortfall Offer had occurred by 30 June 2018. The consolidated statement of financial position is to be read in conjunction with the notes to the financial statements as published in the Company's Financial Report for the year ended 30 June 2018 available on the Company's website, [eaglemountain.com.au](http://eaglemountain.com.au)

The historical and pro-forma information is presented in an abbreviated form. It does not include all of the disclosures required by the Australian Accounting Standards applicable to annual financial statements.

The pro forma statement of financial position has been prepared on the basis that there are no material movements in the assets and liabilities of the Company between 30 June 2018 and the completion of the Offers except for:

- at full subscription, the issue of 23,125,000 New Options at \$0.01 each, thereby raising up to \$231,250 of capital pursuant to this Prospectus; and

No allowance has been made for expenditure incurred in the normal course of business from 30 June 2018 to the Closing Date.

**Notes:**

1. The movement in cash incorporates the funds raised from the Offers assuming full subscription less costs of the Offers. If the Rights Offer is fully subscribed, and the New Options are all exercised prior to their expiry, an additional \$9,250,000 (before costs) will be raised by the Company prior to the end of calendar year 2018 which will enable the Company to continue with its planned aggressive exploration program in respect of the Silver Mountain Project. Refer to Section 2.4 for further details of how the Company proposes to apply these funds.
2. The movement in contributed equity reflects the issue of New Options under the Rights Offer net of costs.

#### 4.5 Details of substantial Shareholders

A "substantial holding" is defined under section 9 of the Corporations Act to mean a relevant interest in 5% or more of the voting shares of a company.

The table below sets out the Shareholders with a substantial holding as at the Prospectus Date.

Substantial Shareholder	Number of Existing Shares held	% of total Shares on issue
Silver Mountain Mining Nominee Pty Ltd ATF The Silver Mountain Mining Trust	36,650,001	39.62%

**Notes:**

1. The party in the table above is an Existing Shareholder.
2. Mr Charles Bass, the Managing Director and Chief Executive Officer of the Company, has an indirect interest in all Existing Shares held by Silver Mountain Nominee ATF The Silver Mountain Mining Trust, as Silver Mountain Nominee is an entity controlled by Mr Bass' spouse, and the beneficiaries of the Silver Mountain Trust include children of Mr Bass.
3. The table above does not include interests pursuant to Options, nor the potential holdings if Shares are issued on the exercise of Options.

Silver Mountain Mining Nominee Pty Ltd ATF The Silver Mountain Mining Trust (**Silver Mountain**) is entitled to participate in the Rights Offer and subscribe for its Entitlement, provided that it is an Eligible Shareholder at the Record Date. However, its ability to exercise its New Options will be subject to the takeover thresholds in the Corporations Act, as to do so would increase its existing controlling interest of greater than 20%.

If Silver Mountain subscribes for New Options, it may only exercise its New Options and acquire Shares in the following circumstances:

- (a) where such acquisition results in Silver Mountain increasing its shareholding interest in the Company by no more than 3% every six months; or
- (b) where the Company obtains Shareholder approval for Silver Mountain to acquire a relevant interest that would otherwise contravene the 20% takeover threshold (i.e. where Silver Mountain proposes to acquire an interest that is more than 3% greater than its shareholding interest held on the date six months prior).

Assuming Silver Mountain's shareholding interest does not change prior to the Record Date and no other Shares are issued, Silver Mountain's Entitlement under the Rights Offer will be 9,162,500 New Options.

The following table shows Silver Mountain's estimated shareholding interest following close of the Rights Offer and Shortfall Offer and exercise of its New Options (assuming it subscribes for its full Entitlement), and whether such exercise is possible without the Company obtaining Shareholder approval.

Scenario	Shares on issue at Prospectus Date	Shares issued on exercise of New Options	Total Shares held by Silver Mountain	Total Shares on issue	Silver Mountain's % of total Shares on issue
Rights Offer and Shortfall Offer close fully subscribed and all participants exercise their New Options	92,500,001	23,125,000	45,812,501	115,625,001	39.62% - Exercise of New Options possible as holding increases by less than 3%
Rights Offer and Shortfall Offer close fully subscribed and 75% of participants exercise their New Options	92,500,001	17,343,750	45,812,501	109,843,751	41.71% - Exercise of New Options possible as holding increases by less than 3%
Rights Offer and Shortfall Offer close fully subscribed and 50% of participants exercise their New Options	92,500,001	11,562,500	45,812,501	104,062,501	44.02% - Exercise of New Options not possible unless Shareholder approval is obtained prior to exercise of New Options
Rights Offer and Shortfall Offer close fully subscribed and only Silver Mountain exercises its New Options	92,500,001	9,162,500	45,812,501	101,662,501	45.06% Exercise of New Options not possible unless Shareholder approval is obtained prior to exercise of New Options

The Directors consider that, as the New Options are short-dated Options which expire on 15 December 2018, if the New Options become 'in the money' (i.e. the market price of Shares becomes greater than the New Option exercise price of \$0.40), it is likely that all New Option holders will elect to exercise their New Options, and assuming Silver Mountain acquires all of its Entitlement to New Options and does not transfer its New Options to a non-associated third party, it will be entitled to exercise all of its New Options as its shareholding interest will increase by less than 3% as outlined in the table.

Alternatively, if Silver Mountain subscribes for its full Entitlement and no other New Options are exercised, Silver Mountain will only be entitled to exercise the number of New Options

that will not result in its shareholding interest increasing by more than 3%. The remaining New Options will only be able to be exercised if the Company obtains Shareholder approval for Silver Mountain to do so in a general meeting (as otherwise the resulting acquisition of Shares will breach the takeover threshold). As at the Prospectus Date, the Directors are not proposing to seek such Shareholder approval, but may determine to do so in the future.

It is possible that if Silver Mountain acquires New Options, it may elect to transfer some or all of these New Options to a person or persons who are not associates of Silver Mountain, who may then exercise the New Options and acquire Shares.

#### 4.6 Effect of the Rights Offer and Shortfall Offer on Existing Shareholders' interests

As at the Prospectus Date, the Company has 92,500,001 Existing Shares and 16,000,000 Existing Options on issue.

If all Eligible Shareholders subscribe for their Entitlements in full, each Eligible Shareholder's percentage shareholding should remain substantially the same as at the Record Date, save for adjustments as a result of Excluded Shareholders not being able to subscribe under the Rights Offer. In such instance, the Offers should not have a material effect on control of the Company.

The table below sets out the estimated dilutive effect of the Rights Offer and Shortfall Offer on Existing Shareholders, assuming various subscription scenarios and that other Shares are not issued (including on the exercise of Options or conversion of Performance Rights) prior to the close of the Offers.

Scenario	Shares to Eligible Shareholders following exercise of New Options issued under Rights Offer	Shares to Applicants following exercise of New Options issued under Shortfall Offer	Dilution to Existing Shareholders
100% subscription under Rights Offer	23,125,000	Nil	0%
75% subscription under Rights Offer	17,343,750	5,781,250	5%
50% subscription under Rights Offer	11,562,500	11,562,500	10%
25% subscription under Rights Offer	5,781,250	17,343,750	15%
0% subscription under Rights Offer	Nil	23,125,000	20%

**Note:** The percentage dilution stated in the table above represents the percentage of Shares that will be issued to the Applicants under the Shortfall Offer upon the exercise of New Options. Applicants under the Shortfall Offer may be Eligible Shareholders.

#### 4.7 Potential dilutive effect of convertible securities

The table below sets out the potential dilutive effect on the Existing Shares on issue if Shares are issued upon the exercise of all Existing Options, New Options and Piggy Back Options and the conversion of all Existing Performance Rights, assuming full subscription under each Offer.

<b>Event</b>	<b>Cumulative number of Shares pre-issue</b>	<b>Shares issued</b>	<b>Cumulative number of Shares post-issue</b>	<b>Dilution</b>
Shares issued on exercise of all New Options	92,500,001	23,125,000	115,625,001	25.00%
Shares issued on exercise of all Piggy Back Options	115,625,001	23,125,000	138,750,001	20.00%
Shares issued on exercise of Existing Options	138,750,001	16,000,000	154,750,001	11.53%
Shares issued on conversion of Existing Performance Rights	154,750,001	180,000	154,930,001	0.12%

**Note:**

The interests shown in the table above assume that:

1. the Existing Options and Existing Performance Rights do not lapse prior to exercise or conversion;
2. other Shares are not issued prior to the exercise of Options or conversion of Performance Rights; and
3. the events occur in the order listed in the table.

**4.8 Effects of the Offers on activities of the Company**

Refer to Section 2.4 for details of how the Company intends to apply the funds raised from the Rights Offer and Shortfall Offer, and the funds which will be raised if the New Options are exercised, assuming various New Option exercise scenarios.

An exercise of only some of the New Options will not affect the rights of the Option Holder to the balance of the New Options held.
  - (m) New Options will be deemed to have been exercised on the later of the date the exercise notice is lodged with the Company and the date the Company receives full payment of the Exercise Price.
  - (n) Within 10 Business Days after receiving an application for exercise of New Options and payment by the Option Holder of the Exercise Price, the Company must issue the Option Holder the number of Shares specified in the application.

  - (q) These terms and conditions of New Options may be amended as necessary by the Board in order to comply with the Listing Rules, or any directions of ASX regarding the terms and conditions of New Options, provided that, subject to compliance with the Listing Rules, the economic and other rights of the Option Holder are not diminished or terminated following such amendment.

## 5.2 Terms and conditions of Shares

## 6. Risk Factors

---

### 6.1 Introduction

Activities in the Company and its controlled entities, as in any business, are subject to risks which may impact on the Company's future performance. There can be no guarantee that the Company will achieve its stated objectives.

Prior to deciding whether to apply for Securities offered under this Prospectus, Shareholders should read the entire Prospectus and review announcements made by the Company to ASX (at [www.asx.com.au](http://www.asx.com.au) under the code 'EM2') in order to gain an appreciation of the Company, its activities, operations, financial position and prospects.

An investment in Securities offered by this Prospectus should be considered speculative. Such Securities carry no guarantee with respect to the payment of any dividends, returns of capital and will remain as unquoted Securities.

Investors should consider the risk factors set out in Section 1.4 above and in Sections 6.2 and 6.3 below which the Directors believe represent some of the key, specific and general risks that investors should be aware of when evaluating the Company and deciding whether to invest, or increase their investment in the Company. These risk factors are not intended to be an exhaustive list of all of the risk factors to which the Company is exposed.

### 6.2 Key Company specific risks

The following risks have been identified as being key risks specific to an investment in Eagle Mountain. These risks have the potential to have a significant adverse impact on Eagle Mountain and may affect Eagle Mountain's financial position, prospects and price of its listed securities.

(a) **New Options are short-dated with an exercise price above the current market price for Shares**

The New Options are exercisable at \$0.40 each and expire on 15 December 2018. As at 31 August 2018 the closing market price of Shares quoted on ASX was \$0.32 (refer to Section 8.8 for further information about the historical market price of Shares). There is a risk that the Company's Share price may remain below the New Option exercise price of \$0.40 and that the New Options may never become 'in the money' before their expiry date.

(b) **Reliance on key personnel**

Eagle Mountain's success depends to a significant extent upon its key management personnel, as well as other employees and technical personnel including sub-contractors. Eagle Mountain has a small management team. The loss of the services of Eagle Mountain's key personnel could have an adverse effect on Eagle Mountain at this early stage of development, particularly as finding an effective replacement may be difficult.

(c) **Liquidity and volatility**

Eagle Mountain is a small company in terms of its market capitalisation. Any investment in it should be regarded as speculative. As a consequence, there is a risk, particularly in times of share market turbulence or negative investor sentiment, that there will not be a highly liquid market for Eagle Mountain's Shares or that the price of Eagle Mountain's Shares may decrease considerably. There may be relatively few buyers or sellers of securities on ASX at any given time and the market price may be highly volatile. This may result in Shareholders wishing to sell their Shares in Eagle Mountain in circumstances where they may receive considerably less than the price paid under the Share Offer (where applicable).

(d) **Future capital requirements**

Eagle Mountain's ongoing activities are likely to require substantial further financing in the future, in addition to amounts raised pursuant to the Offers. Any additional equity financing may be dilutive to Shareholders, may be undertaken at lower prices than the Offer Price or may involve restrictive covenants which may limit Eagle Mountain's operations and business strategy.

Although the Directors believe that additional capital can be obtained, there cannot be any assurance that appropriate capital or funding, if and when needed, will be available on terms favourable to Eagle Mountain or at all. If Eagle Mountain is unable to obtain additional financing as needed, it may be required to reduce, delay or suspend its operations which may result in a material adverse effect on Eagle Mountain's activities and its ability to continue as a going concern.

(e) **No profit to date and limited operating history**

Eagle Mountain has incurred operating losses since its inception and does not have a significant history of business operations. It is therefore not possible to evaluate Eagle Mountain's prospects based on past performance. Since Eagle Mountain intends to conduct further exploration activities on the Silver Mountain Project, the Directors anticipate making further losses in the foreseeable future.

While the Directors have confidence in the future revenue-earning potential of Eagle Mountain, there can be no certainty that Eagle Mountain will achieve or sustain profitability or achieve or sustain positive cash flow from its operating activities.

### 6.3 Industry specific risks

Mineral exploration, development and mining activities are high-risk undertakings and there can be no assurance that any exploration or development activity in regard to Eagle Mountain's current properties, or any properties that may be acquired in the future, will result in the discovery or exploitation of an economic resource.

Mineral exploration, development and mining may be hampered by circumstances beyond the control of Eagle Mountain and are speculative operations which by their nature are subject to a number of inherent risks, including the following:

(a) **Exploration, geological and development risks**

Mineral exploration and development is a speculative and high risk activity that requires large amounts of expenditure over extended periods of time and may be impeded by circumstances and factors beyond Eagle Mountain's control. Eagle Mountain's ability to succeed in this process involves (amongst other things):

- (i) discovery and proving-up, or acquiring, an economically recoverable mineral resource or reserve;
- (ii) access to adequate capital throughout the acquisition/discovery and project development phases of a mineral exploration project;
- (iii) maintaining title to the Silver Mountain Project area;
- (iv) obtaining required development consents and approvals necessary for the acquisition, exploration, development and production phases of the project; and
- (v) accessing the necessary experienced operational staff, the applicable financial management and recruiting skilled contractors, consultants and employees.

The exploration program determined by the Directors is based upon the Directors' best professional assessment and estimates which have been based on limited

geological information available in relation to the area of the Silver Mountain Project. There can be no assurance that the application of these funds on the forthcoming exploration program, or subsequent exploration program, will result in the realisation of Eagle Mountain's objectives such as the discovery of an economic mineral resource. Even if an apparently viable mineral resource is identified, there is no guarantee that it can be economically exploited. Conclusions drawn during mineral exploration are subject to the uncertainties associated with all sampling techniques and to the risk of incorrect interpretation of geological, geochemical, geophysical, drilling and other data.

By their nature, the estimates and assumptions on which Eagle Mountain's exploration program is based are subject to significant uncertainties and, accordingly, the actual costs may materially differ from these estimates and assumptions. No assurance can be given that the cost estimates and the underlying assumptions will be realised in practice, which may materially and adversely affect Eagle Mountain's viability.

Eagle Mountain's exploration activities are subject to all the hazards and risks normally encountered in the exploration of minerals, including but not limited to:

- (i) geological and climatic conditions;
- (ii) operational and technical risks;
- (iii) changes in laws, regulations and government policy; and
- (iv) risks associated with operating in remote areas and other similar considerations.

Whether positive income-flows result from exploration and development expenditure incurred by Eagle Mountain is dependent on many factors including successful exploration, establishment of production facilities, cost control, commodity price movements, successful contract negotiations for production and stability in the local political environment.

In addition, significant expenditure may be required to establish necessary metallurgical and mining processes to develop and exploit any mineral reserves identified on the Silver Mountain Project or any other project area operated by Eagle Mountain in the future. There can be no assurance that Eagle Mountain will have sufficient working capital or resources available to do this.

(b) **Operational and technical risks**

The operations of Eagle Mountain may be affected by various factors, including but not limited to:

- (i) failure to locate or identify mineral deposits;
- (ii) failure to achieve predicted grades in exploration and mining;
- (iii) operational and technical difficulties encountered in mining;
- (iv) insufficient or unreliable infrastructure, such as power, water and transport;
- (v) difficulties in commissioning and operating plant and equipment;
- (vi) mechanical failure or plant breakdown;
- (vii) unanticipated metallurgical problems which may affect extraction costs;
- (viii) adverse weather conditions;
- (ix) industrial and environmental accidents;

- (x) industrial disputes and labour shortages; and
- (xi) unexpected shortages or increases in the costs of consumables, spare parts, plant and equipment.

(c) **Commodity price fluctuations**

Eagle Mountain's potential earnings will be largely derived from the sale of mineral commodities (including gold and base metals). Accordingly, Eagle Mountain's future revenues and cash flow will be impacted by fluctuations in the price and available markets of these commodities. Any future revenue derived through any future sales of valuable minerals exposes the potential income of Eagle Mountain to commodity price risks.

Commodity prices fluctuate and may be affected by numerous factors beyond the control of Eagle Mountain including:

- (i) current and expected future supply and demand for relevant commodities in the region and globally;
- (ii) forward-selling by producers;
- (iii) the level of production costs in major commodity-producing regions;
- (iv) macroeconomic factors such as expectations regarding inflation and interest rates; and
- (v) the development of new technologies including any substitute products in relation to the current uses of particular commodities.

Changes in commodity prices may have a positive or negative effect on Eagle Mountain's project development, plans and activities, including its ability to fund those activities. Eagle Mountain cannot provide any assurance as to the prices it will achieve for any mineral commodities it produces. Any substantial decline in the price of those commodities or in transport or distribution costs may have a material adverse effect on Eagle Mountain and the value of its Securities.

(d) **Exchange rate fluctuations**

Eagle Mountain's financial statements are expressed in Australian dollars. International prices of most commodities are denominated in United States dollars and some of the expenditure incurred by Eagle Mountain will also be denominated in United States dollars and Canadian dollars. This will expose Eagle Mountain to the fluctuations and volatility of the rate of exchange between the United States dollar, Canadian dollar and the Australian dollar, subject to any currency hedging Eagle Mountain may undertake. The exchange rate is affected by numerous factors beyond the control of Eagle Mountain, including international markets, interest rates, inflation and the general economic outlook.

(e) **Environmental risks**

The operations and proposed activities of Eagle Mountain are subject to State and Federal laws and regulations concerning the environment. As with most exploration projects and mining operations, Eagle Mountain's proposed activities are expected to have an impact on the environment, particularly if advanced exploration or mine development proceeds. Such impact can give rise to substantial costs for environmental rehabilitation, damage, control and losses.

The potential environmental impacts of Eagle Mountain's proposed activities could be expected to require statutory approvals to be obtained by Eagle Mountain. There is no guarantee that such approvals would be granted and failure to obtain any environmental approvals that may be required from relevant government or regulatory authorities may impede or prevent Eagle Mountain from undertaking its planned

activities. If there are environmental rehabilitation conditions attaching to the Mining Claims of Eagle Mountain, failure to meet such conditions could also lead to forfeiture of the Mining Claims (or any additional mining claims, permits or other interests held by Eagle Mountain in the future). Eagle Mountain will attempt to conduct its activities to the highest standard of environmental obligation, including compliance with all environmental laws.

Eagle Mountain is unable to predict the impact of any changes to environmental laws, regulations or policies that may be adopted in the future. Eagle Mountain cannot guarantee that any new environmental laws, regulations or stricter enforcement policies, once implemented, will not result in significant increases in Eagle Mountain's expenses and could have a material adverse effect on Eagle Mountain and the value of its Securities.

(f) **Tenure risks**

Interests in exploration and mining claims and permits in Arizona are governed by the mining laws of Arizona and the United States and are evidenced by the granting of patented mining claims, unpatented mining claims and Arizona state exploration permits.

Each mining claim and permit is subject to various conditions which must be complied with, including an annual property tax in respect of patented mining claims, an annual rental payment in respect of unpatented mining claims, and a specific term of grant and annual expenditure conditions in respect of Arizona state exploration permits.

Eagle Mountain will follow the mandated processes under the relevant Arizona and United States legislation to ensure continuity of its mining tenure and planned activities. However, Eagle Mountain could lose title to, or its interest in, the Mining Claims (or any additional mining claims, permits or other interests acquired by Eagle Mountain in the future) if the conditions attaching to the claim or permit are not satisfied.

In addition, while patented and unpatented mining claims grant the holder the exclusive right to mine the claim area, Arizona state exploration permits may not provide exclusive access to the permit area as other co-existing permits or mineral leases may exist. If a commercial discovery is made on a conflicting permit or lease and the holder proposes to commence mining operations, this may result in part of Eagle Mountain's permit area being "cordoned off" which could potentially restrict the development rights of Eagle Mountain in order to accommodate the development of the other resource. Whilst no permits or leases have been granted which conflict with Eagle Mountain's permits at the Prospectus Date, there can be no assurance that conflicting permits or leases will not be granted in the future.

(g) **Competition**

The industry in which Eagle Mountain will be involved is subject to domestic and global competition. Some of the competing companies have greater financial and other resources than Eagle Mountain and, as a result, may be in a better position to compete for future business opportunities. While Eagle Mountain will undertake all reasonable due diligence in its business decisions and operations, Eagle Mountain will have no influence or control over the activities or actions of its competitors. As such, there can be no assurance that Eagle Mountain will be able to compete effectively with these companies.

## 6.4 **General investment risks**

The business activities of Eagle Mountain are subject to various general economic and investment risks that may impact on the future performance of Eagle Mountain. Some of these risks can be mitigated by the use of safeguards and appropriate systems and controls, but some are outside the control of Eagle Mountain and cannot be mitigated. There are a number of general economic and investment risk factors that apply to companies generally

and may include economic, financial, market or regulatory conditions. These risk factors include, but are not limited to, the following:

(a) **General economic conditions**

Economic conditions, both domestic and global, may affect the performance of Eagle Mountain. Factors such as fluctuations in currencies, commodity prices, inflation, interest rates, supply and demand and industrial disruption may have an impact on operating costs and share market prices. Eagle Mountain's future possible revenues and Share price can be affected by these factors, all of which are beyond the control of Eagle Mountain and its Directors.

(b) **Equity market conditions**

Shares listed on the securities market, and in particular securities of small companies at any early stage of commercial development, can experience extreme price and volume fluctuations that are often unrelated to the operating performances of such companies. The market price of securities may fall as well as rise and may be subject to varied and unpredictable influences on the market for equities in general. These security market conditions may affect the value of Eagle Mountain's quoted Shares regardless of Eagle Mountain's operating performance.

General factors that may affect the market price of securities include economic conditions in both Australia and internationally, investor sentiment, local and international share market conditions, changes in interest rates and the rate of inflation, variations in commodity prices, the global security situation and the possibility of terrorist disturbances, changes to government regulation, policy or legislation, changes which may occur to the taxation of companies as a result of changes in Australian and foreign taxation laws, changes to the system of dividend imputation in Australia, and changes in exchange rates.

(c) **Changes in government policy and legislation**

Any material adverse changes in relevant government policies or legislation of Australia or internationally may affect the viability and profitability of Eagle Mountain, and consequent returns to investors.

(d) **Investment risk**

The New Options offered pursuant to this Prospectus should be considered speculative due to the nature of Eagle Mountain's business. There is no guarantee as to payment of dividends, return of capital or the market value of the Shares underlying the New Options. In particular, the price at which an investor may be able to trade Shares may be above or below the price paid for those Shares.

Prospective investors must make their own assessment of the likely risks and determine whether an investment in Eagle Mountain is appropriate having regard to their own particular circumstances.

(e) **Insurance**

Eagle Mountain intends to adequately insure its operations in accordance with industry practice. However, in certain circumstances, Eagle Mountain's insurance may not be of a nature or level to provide adequate insurance cover. The occurrence of an event that is not covered or only partially covered by insurance could have a material adverse effect on the business, financial condition and results of Eagle Mountain.

(f) **Other**

Other risk factors include those normally found in conducting business, including litigation resulting from the breach of agreements or in relation to employees (through personal injuries, industrial matters or otherwise) or any other cause, strikes, lockouts,

loss of service of key management or operational personnel, non-insurable risks, delay in resumption of activities after reinstatement following the occurrence of an insurable risk and other matters that may interfere with the business or trade of Eagle Mountain.
