

Mobilicom wins substantial government contract bringing immediate revenue stream

- **Contract with Israel Ministry of Defense – Mobilicom chosen as sole provider**
- **Initial purchase order exceeds \$200,000**
- **Mobilicom solution comprises its MCU & Mini Controller products and addresses an unmet need in government & enterprise sector**
- **Excellent global sales potential with additional purchase orders expected in the short term**

25 September 2018 – Mobilicom Limited (Mobilicom) is pleased to announce that it has secured a new government contract with the Israeli Ministry of Defense, with an initial purchase order exceeding \$200,000.

The contract pertains to a complete avionic kit and controlling system developed by Mobilicom using the company's MCU and Mini Controller products. The unique solution is designed for deployment in government and homeland security operations and delivers the high level of security, encryption and protection that is required for government and enterprise sector.

This solution has already been successfully field tested and deployed in Israeli federal government and homeland security operations and has been validated by the Israeli Ministry of Defense.

Mobilicom's CEO Oren Elkayam commented: "We are excited to secure such a significant new contract with a tier one customer. For Mobilicom to be able to provide this solution and prove its value in a short period of time is a testament to the quality of our technology and capabilities.

"Given our position as sole provider on this contract and discussions to date we are confident in receiving additional purchase orders in the near future. There is also excellent potential for other significant international opportunities."

About Mobilicom

Mobilicom Limited (ASX: MOB) is a hi-tech company that designs, develops and delivers communication solutions for mission-critical and remote mobile private networks that can operate without the need for existing infrastructure. Mobilicom products and technologies are based on an innovative approach that merges 4G and Mobile MESH technologies. With versatile network topologies and a large product portfolio, Mobilicom offers several product families that have been commercially deployed. Mobilicom has developed proprietary technology for a product portfolio that is fully designed and developed in-house with the utmost flexibility and scalability to optimise to customer needs.

Mobilicom has two entities. The first is Mobilicom's core business entity, with solutions that cater to mission-critical communication in the Government and Enterprise sector with applications of Offshore Oil, Gas and Energy; Homeland Security and Public Safety and Unmanned Vehicles. The second is its Skyhopper entity, a provider of end-to-end hardware and software solutions which targets the Commercial and Industrial Drones and robotics sector. SkyHopper's holistic approach enables Dr.one manufacturers and service providers to focus on their own business objectives by reducing time-to-market, minimising resource expenditures and increasing their chances for success.
