ASX Announcement

5G Networks announce Telstra Wholesale Executive as CMO and Telstra Senior Network Architect in key management position.

NEWS RELEASE Tuesday 2nd October 2018

5G Networks (ASX:5GN) is excited to announce Telstra Wholesale executive, Mr Glenn Flower as its new Chief Marketing Officer (CMO).

Mr Flower has been Head of Marketing and Communications at Telstra Wholesale for a number of years and will join the Company's executive team and lead both the marketing and product functions at 5G Networks.

The Company is also excited to announce the appointment of Telstra's Senior Network Architect, Mr Vishal Patel as its new National Networks Manager who will lead the Company's National Multiprotocol Label Switching (MPLS) Network.

Mr Joe Demase, 5G Networks Managing Director stated:

"We are extremely excited about an experienced executive like Glenn joining our growing organisation. His expertise and experience in executive leadership and managing agile business transformation and digital technology is industry leading; not to mention his extensive background in data networks, applications and cloud technology. The addition of Vishal is also instrumental. His extensive experience and profound understanding in the telecommunications sector will provide immense value to our national MPLS Network rollout strategy. I am very pleased to have the calibre of Glenn and Vishal join the 5G Networks team as we expand our service proposition and bolster the Company for continued growth".

Glenn has previously led the launch strategy for Telstra's Cloud services and managed the integrated IP network product portfolio for Telstra Enterprise and Government for several years. A respected executive for driving innovation and digitisation, Glenn has recently transformed the marketing function and optimised the digital assets at Telstra Wholesale with impressive results for driving revenue opportunities.

Commenting on his appointment as CMO, Mr Flower said,

"I am delighted to be joining such a thriving, dynamic organisation absolutely focussed on the customer. The opportunities for uniting market leading technologies with strong networking foundations are enormous; which is great news for our current and future customers. The 5G Network business has so many assets; from hosting & cloud services to superfast networks and managed IT. Importantly, our proposition will continue to be centred upon delivering an outstanding customer experience built upon world class application performance; it will be awesome to play a role in that for our customers".

Mr Patel brings over 15 years' experience in the telecommunications sector, spanning across the Middle East, India and Australia at leading companies including Nokia. Currently responsible for managing and delivering Telstra's network services and strategy to some of Australia's largest enterprises and top ASX listed companies, Vishal brings a valuable and profound understanding in network infrastructure. While adding Mr Patel as the Company's National Networks Manager, 5G Networks continues the expansion of its capability and MPLS Network across Australia.

Complimenting his telecommunications background, Mr Patel has been heavily involved in major Telstra projects including Telstra's Ethernet Evolution, Telstra's Business Broadband Enhancement and a raft of MPLS implementation projects across Australia.

Mr Flower and Mr Patel will begin with 5G Networks later in October.

About 5G Networks

5G Networks is a licenced telecommunications carrier operating across Australia. With diversified network access technologies, 5G Networks offer its high speed network and cloud infrastructure services to the mid market, enterprise and government sectors.

With 12 offices across Australia supported by an expert team of over 200 employees, 5G Networks offers Network, Cloud, Managed Services, Hardware and Software and Voice over Internet Protocol (VOIP) services. The national reach and coverage provides clients with the end to end control,responsiveness and data speeds necessary to fully capture the value of cloud based computing.

Falling under the 5G Networks Group are its Anittel and Hostworks subsidiaries, with over 15 years' experience servicing the Australian market.
